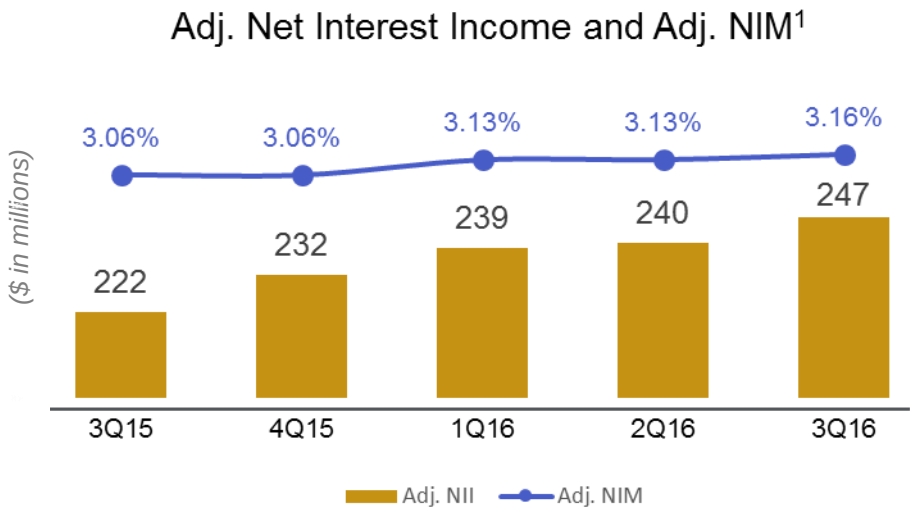
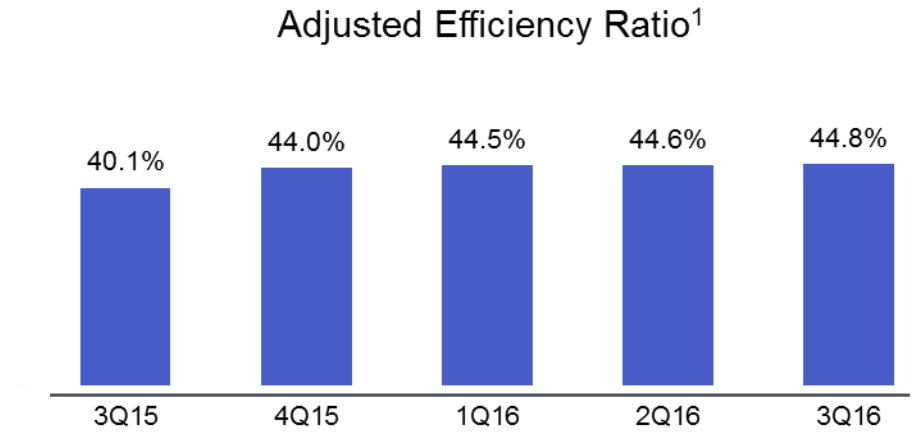
[2] Adjusted net interest margin excludes ASC 310-30 discount accretion income.
[3] Adjusted efficiency ratio represents adjusted noninterest expense divided by the aggregate of net interest income and noninterest income. Adjusted noninterest expense excludes amortization of tax credit and other investments, amortization of premiums on deposits acquired and repurchased agreements' extinguishment costs.
[2] Adjusted, pre-tax, pre-provision profitability ratio represents the aggregate of net interest income and noninterest income less adjusted noninterest expense, divided by average assets.

Third Quarter 2016 Earnings Drivers



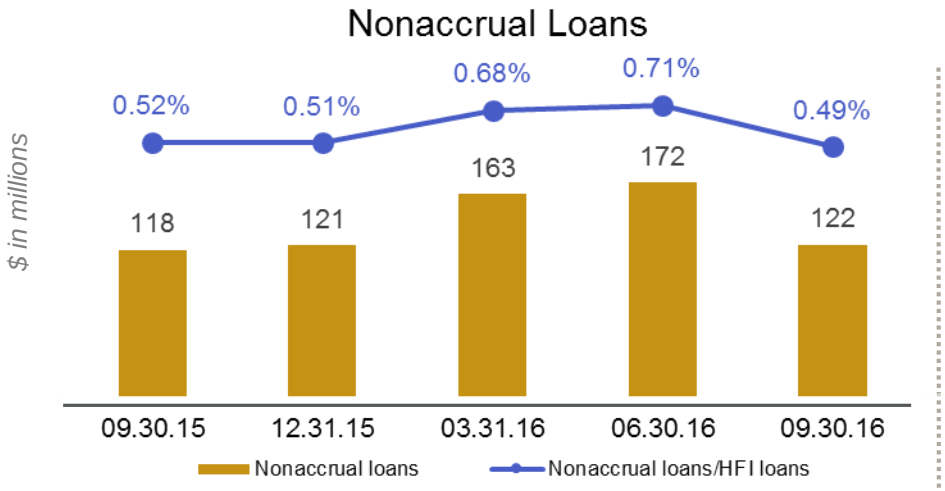
- Excluding accretion income, adjusted net interest income grew 3% QoQ.
- Adjusted NII growth fully offset QoQ decline in accretion income. Accretion in 3Q16 declined to $7 mm.
- Excluding accretion, the adjusted (core) NIM modestly expanded linked quarter to 3.16%.
- YoY improvement in core NIM reflects improvement in adjusted loan yields (ex. accretion) and an increased contribution from DDAs in the funding mix.
- Modest pressure on NIM remains a headwind, however.

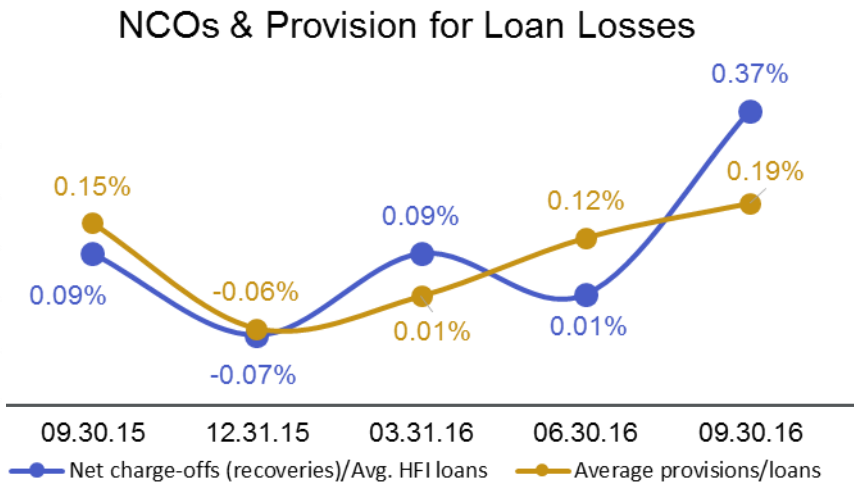


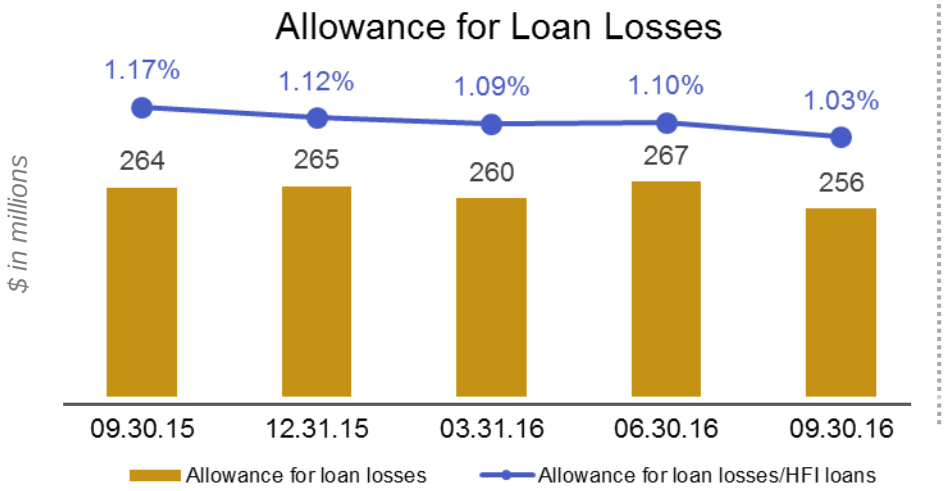
- Excluding tax credit investment amortization, core operating expenses of $138 mm in 3Q16 were within guidance.
- Guidance for 4Q16 assumes flat operating core expenses.
- Even in a year of elevated investments to improve compliance and risk management programs, the adjusted core efficiency ratio has been essentially steady at 45%.
- Decline in investment spending to offset organic growth in expenses, for overall flat expense growth, a favorable earnings lever for near to medium term.

[1]Please see reconciliation of GAAP to non-GAAP financial measures in the Company's financial releases.

Asset Quality Metrics



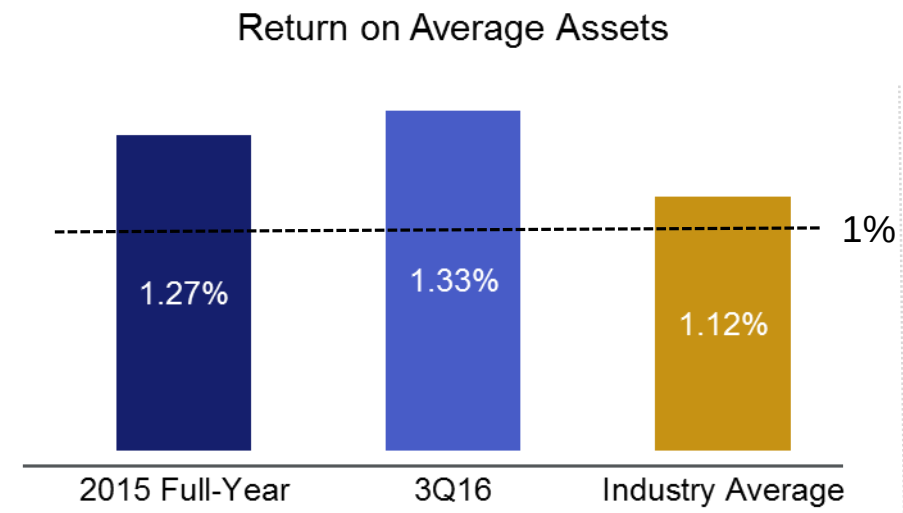


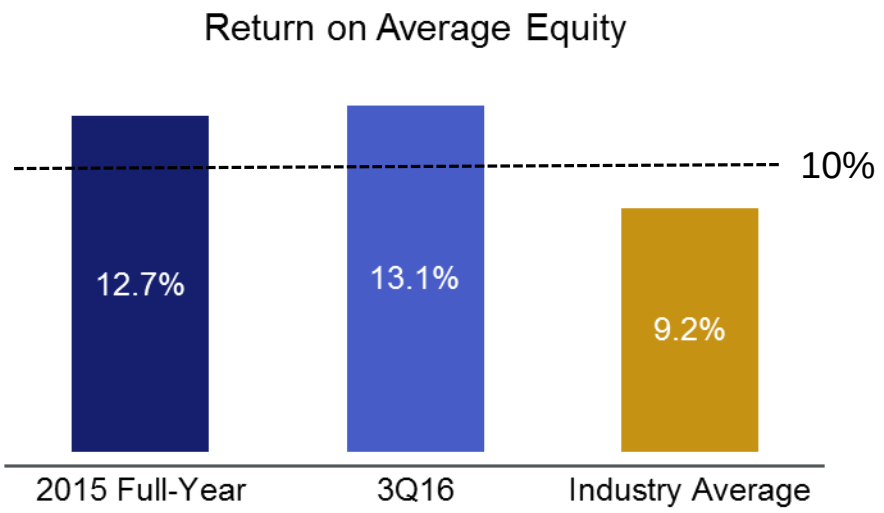


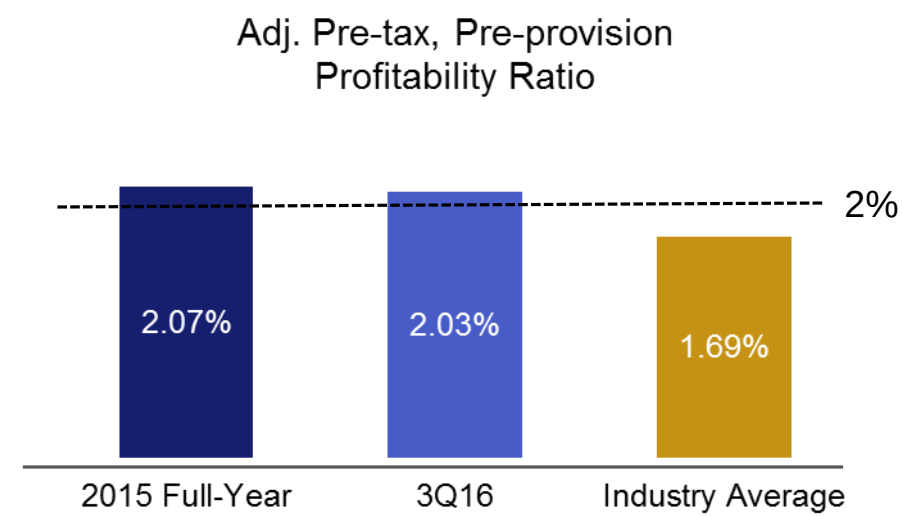
- Increase in NCO ratio in 3Q16 related to three larger commercial loans that had been placed on nonaccrual status a year ago.
- The loans were originated several years ago; the borrowers were in unrelated industries. These loans were not in specialized industry verticals.
- Of the loans charged off in 3Q16, approximately 75% of the charge-off amounts had previously been provided for in the ALLL as of 06.30.16.

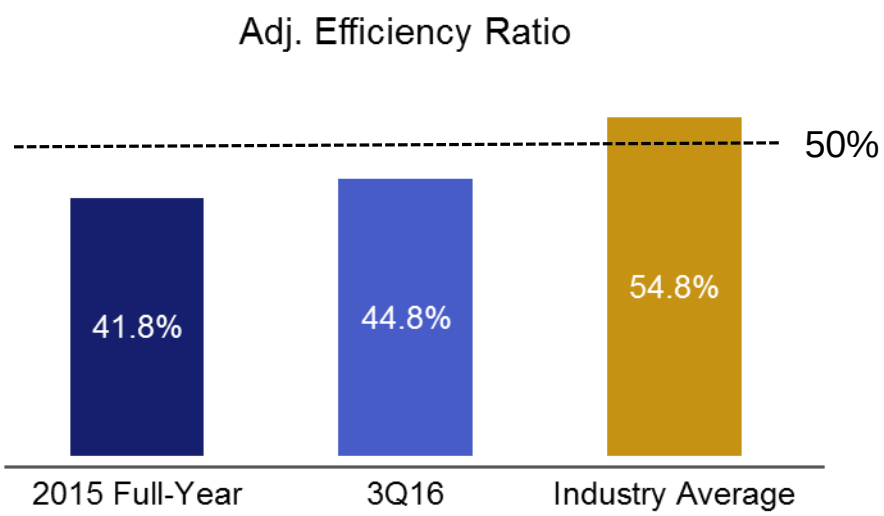
* Asset quality ratios exclude purchased credit impaired loans. HFI represents held-for-investment.

Outperforming Peers on Key Profitability Metrics







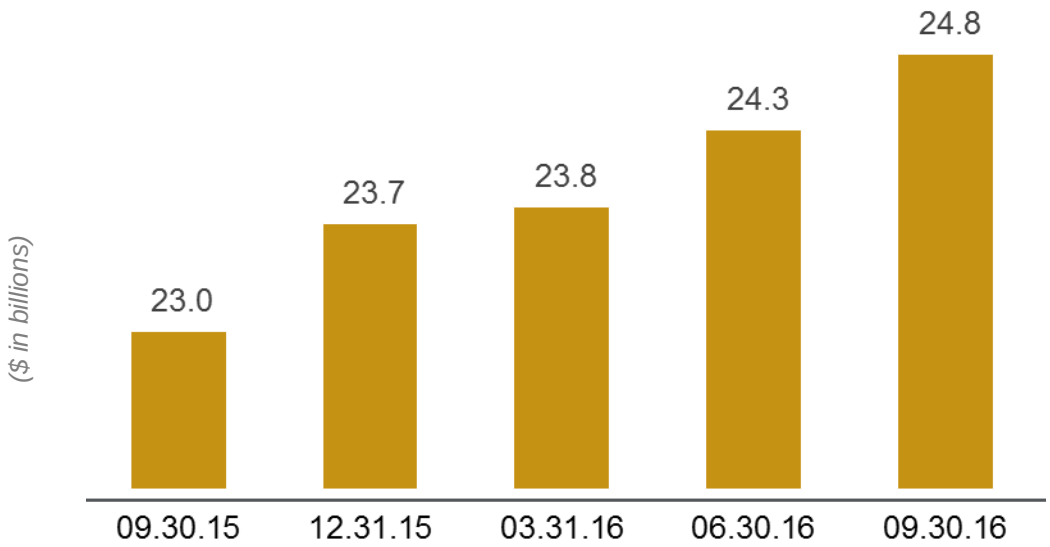


Adj. PTPP ratio and Adj. efficiency ratio calculations exclude repurchase agreements' extinguishment costs, amortization of tax credit and other investments and amortization of premiums on deposits acquired.

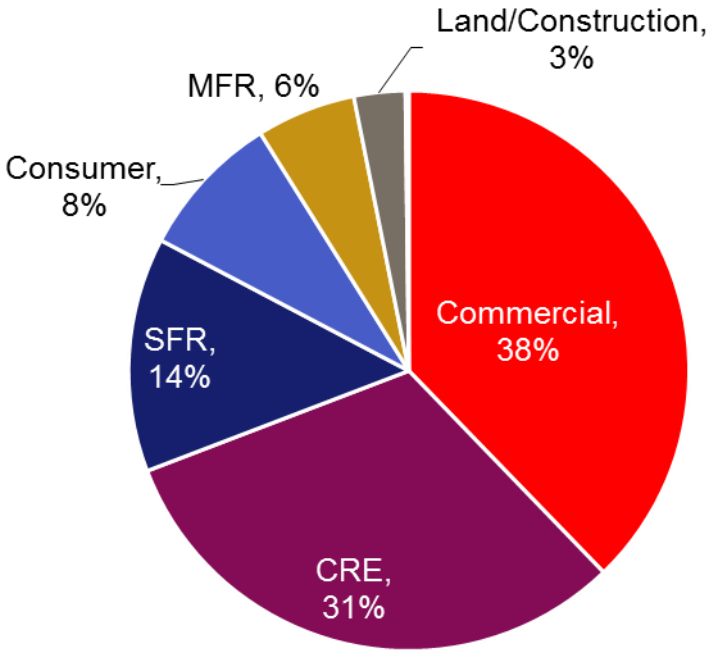
Note: Industry average based on FDIC's 2Q16 Quarterly Banking Profile for FDIC Insured Banks with Asset size $10 bn to $250 bn.

Diversified Loan Portfolio Driven by C&I Growth

$24.8 billion loans as of 09.30.16



Loan Distribution (as of 09.30.16)



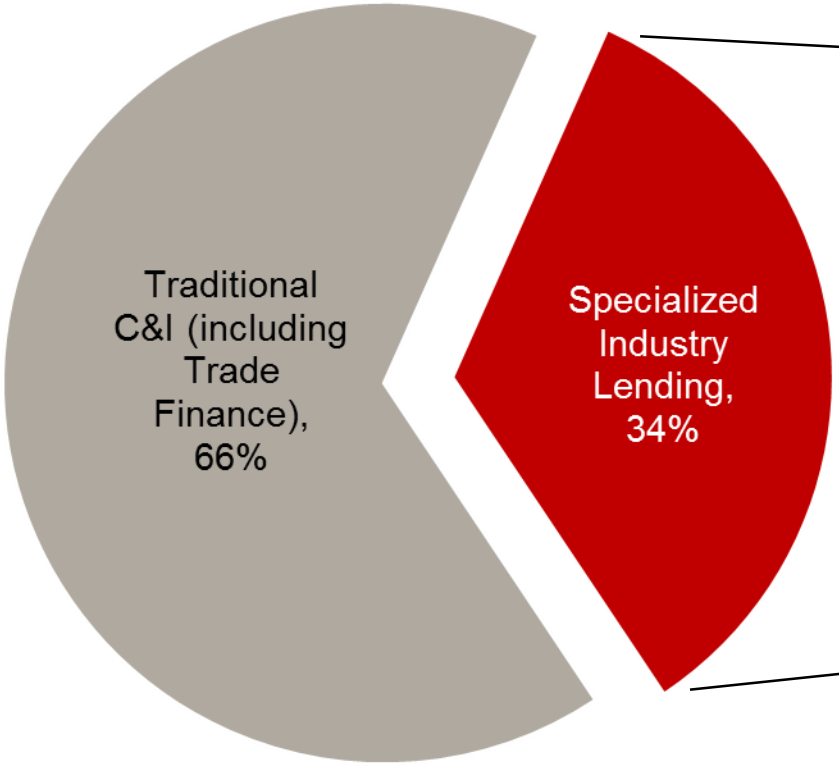
- Total loans as of 09.30.16 were $24.8 bn, up $485 mm or 8% annualized from 06.30.16.
- Line utilizations of C&I loans were stabilized at 68% as of 09.30.16, compared to 69% as of 06.30.16.

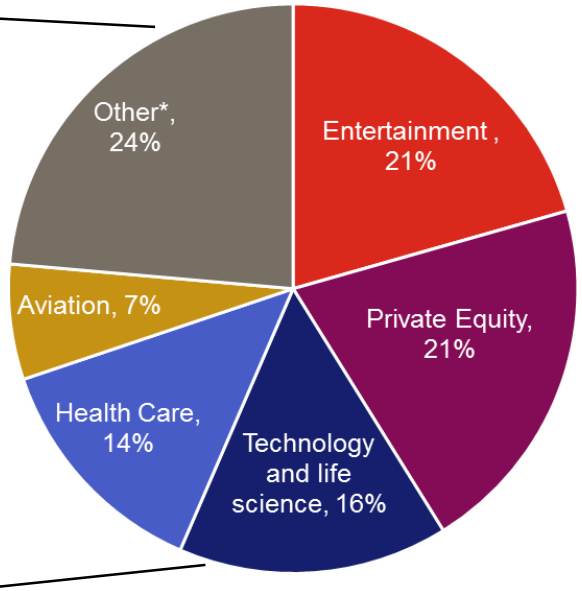
- The largest increase in loans during 3Q16 was C&I loans, which grew $194 mm or 2% linked quarter and 4% YTD.
- Specialized Industry niches are growth drivers.

- 3Q16 average loan yield was 4.18%, compared to 4.28% in 2Q16.
- Adj. loan yield (excluding accretion) was 4.05% for both 3Q16 and 2Q16.

Specialized Industry Verticals: Cross-Border Growth

Total Loans $24.8 bn — Includes — C&I loans $9.4 bn or 38% — Includes — Specialized Industry $3.2 bn or 34%





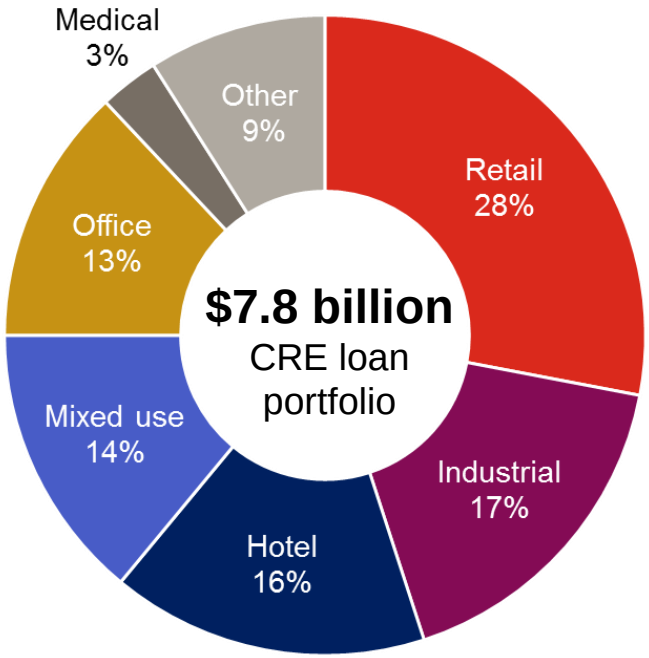
- Specialized Industry lending verticals have grown to $3.2 bn, or 19% YTD, from $2.7 bn as of 12.31.15. Growth in these niches is driven by Bridge Banking, EWBC's strategy of facilitating cross-border commercial opportunities.

Portfolio distribution data as of September 30, 2016.

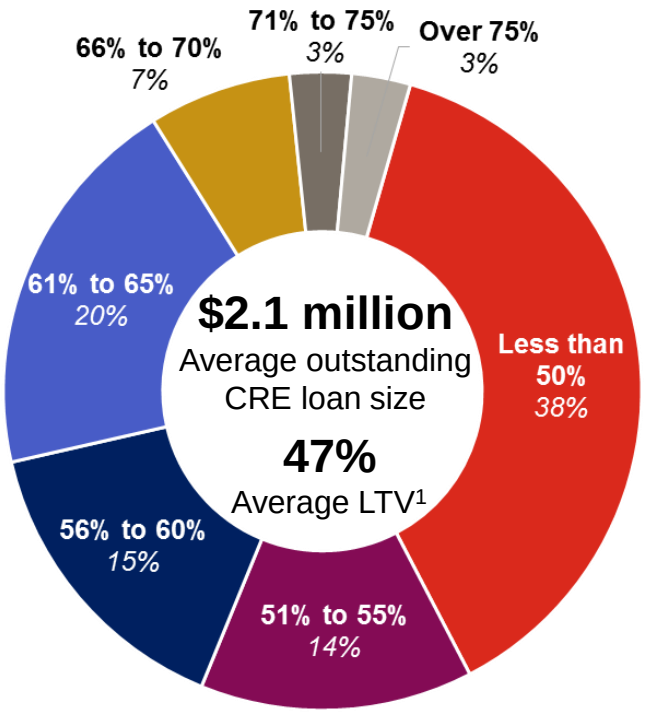
* Other Specialized Lending comprises Structured & Specialty Finance, Energy, Agriculture, and Equipment Leasing.

Diversified Commercial Real Estate Portfolio

CRE Property Type Distribution (as of 9.30.16)



CRE LTV Distribution (as of 9.30.16)

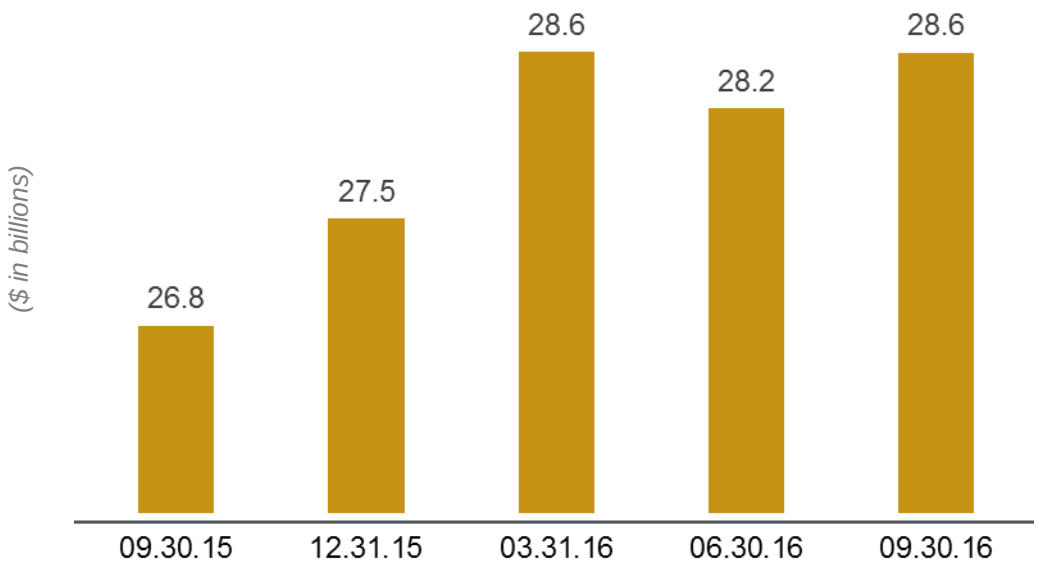


- CRE concentration under FFIEC guidelines as of 09.30.16 was 261%, compared to 265% as of 06.30.16, and down from 274% as of 12.31.15.
- Intentional curtailment of originations in the first half of the year to maintain growth of CRE below FFIEC exposure threshold of 300%.

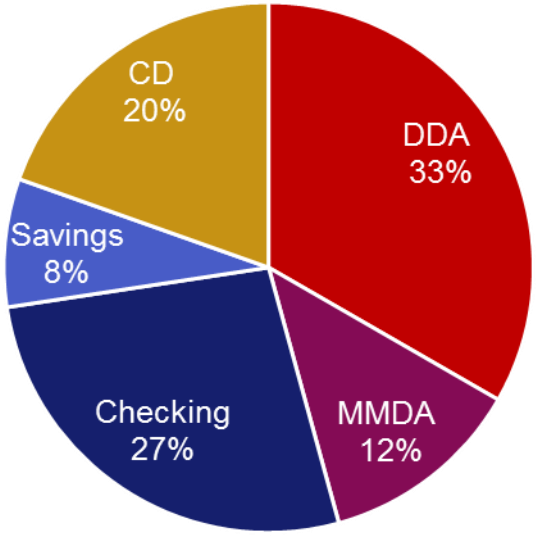
[1] LTV based on current loan balance and appraisal value at origination or renewal.

Solid Deposit Growth & Mix

$28.6 billion deposits as of 09.30.16



Deposit Distribution (as of 09.30.16)



- Total deposits as of 09.30.16 were $28.6 bn, an increase of $375 mm or 5% annualized growth from 06.30.16.
- 3Q16 core deposits grew to $23 bn or 80% of total deposits, a favorable mix shift from 75% at the end of 3Q15.
- 3Q16 cost of deposits was 30 bps, 1 bp higher than 29 bps for 2Q16 and 2 bps higher than 28 bps for 3Q15.

Interest Rate Sensitivity

EWBC's Net Interest Income Sensitivity to Selected Interest Rate Scenarios (as of September 30, 2016)

	Net Interest Income Volatility:					
	30-Sep-2016			31-Dec-2015		
Change in Interest Rates :	% change	$ in mm	in EPS	% change	$ in mm	in EPS
+ 200 bps	21.2%	$214.8	+ $ 1.15	18.5%	$175.8	+ $ 0.81
+ 100 bps	10.8%	$109.4	+ $ 0.59	9.6%	$91.2	+ $ 0.42
- 100 bps	-4.6%	($46.6)	- $ (0.25)	-4.0%	($38.0)	- $ (0.17)
- 200 bps	-5.1%	($51.7)	- $ (0.28)	-4.6%	($43.7)	- $ (0.20)

	Net Interest Income Volatility as of 9/30/16 Given a 12-Month Demand Deposit Migration of:								
	$1.0 billion			$2.0 billion			$3.0 billion		
Change in Interest Rates :	% change	$ in mm	in EPS	% change	$ in mm	in EPS	% change	$ in mm	in EPS
+200 bps	18.2%	$184.4	+ $ 0.99	15.1%	$153.0	+ $ 0.82	12.1%	$122.6	+ $ 0.66
+100 bps	8.9%	$90.2	+ $ 0.48	6.9%	$69.9	+ $ 0.38	5.0%	$50.7	+ $ 0.27

The increase in EWBC's interest rate sensitivity between 9/30/16 and 12/31/15 was primarily due to growth in core deposits, which now make up 80% of total deposits.

- Brokered deposits are 5% of total deposits, and institutional deposits are 9% of total, both essentially stable relative to the year-ago quarter.
- Due to the growth in core deposits, a surge deposit study was conducted to identify the amount of volatile deposits and to estimate the likelihood of run-off in various interest rate environments.
- Betas: Retail Money Market – 49%; Commercial MMA – 65%; NOW – 28%; and Savings – 16%.

Note: NII sensitivity translated into $ and EPS using annualized YTD16 NII and FY 2015 NII, and the effective tax rate in each period.

Other (NPLs, premiums, discounts)	100.7	0.4%		
Total gross loans	**24,779.7**	**100.0%**		

Note: Loans gross of deferred fees, premiums, or discounts.

EWBC's loan portfolio is predominantly linked to Prime Rate and short-term LIBOR, a profile that has been consistent over time.

- Over 80% of EWBC's loan portfolio is variable rate, and <10% is fixed rate.
- Only $2.5bn of variable rate and hybrid loans, or 10% of total loans, have an index rate below floors. Approximately 38% of these would cross above floor rates with only a 25bps move in interest rates, and another 26% would cross with a second 25bps move. The weighted average distance below floors is 90bps.
- Weighted avg. next repricing/maturity date of the total loan portfolio is <1.25 years. The weighted avg. date of repricing for loans below floors is 5 months, which shortened linked quarter.

BSA / AML Update

- The Bank entered into a consent order with the Federal Reserve Bank in November 2015 regarding its BSA/AML procedures and process.
- The Bank enacted a plan for remediation which includes:
  - Replacing the former BSA transactional tracking system with a more sophisticated system, Actimize (projected implementation by YE 2016), and installing an online customer due diligence system, Dynamic Customer Insight, to collect information on new customers (already implemented).
  - During 3Q16, successfully implemented the transaction monitoring module of Actimize, a critical component of the software.
  - Brought in a new BSA Officer with strong prior BSA experience to run the department and expanded senior manager ranks in the group. Increased headcount and overall resources in the BSA department.
- Projected timeline: Bank's remediation work to be complete by YE 2016.
- Costs: BSA related consulting costs in 3Q16 were $2.8 mm, 36% lower than in 2Q16 and 57% lower than in 1Q16. All-in project costs include infrastructure and full time headcount, and those costs are tracking within budget.
