NEWS RELEASE

CyberSaint Recognized in 2024 Gartner® Hype Cycle™ for Cyber Risk Management

2024-08-21

CyberSaint believes this recognition highlights the CyberStrong platform for automating cyber risk management and empowering CISOs with board-level insights

BOSTON--(BUSINESS WIRE)-- **CyberSaint**, a leader in cyber risk management, was recognized in the 2024 Gartner Hype Cycle™ for Cyber Risk Management as a Sample Vendor for Cyber Governance, Risk and Compliance (Cyber GRC) and Cybersecurity Continuous Control Monitoring (CCM). CyberSaint affirms this recognition marks a significant milestone in the organization's continued commitment to delivering innovative solutions that enhance organizations' cybersecurity posture and drive business value.

A SEMINAL MOMENT

Compliance (cyber GRC) is critical for securing assets, ensuring that a modern cyber GRC tool can automate these processes and align with an organization's risk management strategy. It can provide visibility of relevant cyber risks, supporting resilience and reputation. Real-time reporting and analytics enable swift actions and investments, enhancing controls and improving the overall security posture.

"We are honored to be recognized in the 2024 Gartner Hype Cycle for Cyber Risk Management," said **Jerry Layden**, CEO of CyberSaint. "We believe this acknowledgment reinforces our mission to provide organizations with the necessary tools to confidently address complex challenges within today's cybersecurity landscape. Our platform is designed to integrate cybersecurity into every aspect of business operations, ensuring that cyber risk management is not just a compliance requirement but a strategic enabler for success."

Gartner states, "CCM tools in cybersecurity help security and IT teams reduce the manual efforts for security control management, partially relieving staff burden and enabling them to focus on higher-value tasks and reducing costs. The tools also provide constant monitoring of security controls, allowing faster detection of potential threats and minimizing breaches and regulatory noncompliance, which prevents significant financial and reputational damage."

"We feel that to be named in the Gartner Hype Cycle is a testament to our team's dedication to innovation and our commitment to delivering solutions that make a tangible impact," added **Padraic O'Reilly**, Chief Innovation Officer and Founder of CyberSaint. "As cyber threats continue to evolve, our focus remains on providing our customers with the capabilities they need to stay ahead of the curve, mitigate risks, and achieve their business goals."

"By 2026, 60% of cybersecurity functions will implement business-impact-focused risk assessment methods, aligning cybersecurity strategies with organizational objectives", Gartner states. "The strategic innovations on the Hype Cycle not only enhance the value of cyber-risk management, but also ensure that cybersecurity efforts directly contribute to the organization's bottom line, thus promoting a secure and efficient digital business environment."
