NEWS RELEASE

Frogger Token Positioned to Lead the Next Memecoin Run!

2025-05-21

London, UK, May 21, 2025 (GLOBE NEWSWIRE) -- **Frogger** enters a space that has already seen great successes from frog-themed meme coins such as Pepe (\$PEPE) Apu Apustaja (\$APU) FWOOG (\$FWOG) HOPPY (\$HOPPY) and many more!

Frog memecoins are established within the decentralised space and have been consistently set in motion by high profile references to the Pepe meme. These mentions have been made by the likes of Elon Musk and even Donald Trump. Frogger is setting the trend and aligning itself in a similar manner which led these memecoins to billions in market cap.

A key differentiator for Frogger is its broad token distribution—less than 55% is held by the top 100 holders, with Ethereum founder Vitalik Buterin as the largest holder. This distribution resembles other memecoins such as \$DOGE \$PEPE and \$SHIBA before they went parabolic.

Recognition and Growing Credibility

Frogger has already captured attention and recognition amongst multiple social media influencers and content creators. This was expected as Frogger has History, Culture and Relevance.

The 1981 arcade Frogger game was one of the most popular and most sold out during the Arcade Era grossing \$135million in North America for Sega/Gremlin becoming their most successful release.

Additionally Vitalik Buterin is the top holder having acquired Frogger organically. What's more is the Pepe Deployer is also one of the top 100 holders garnering watchful eyes within domain.

Frogger isn't just riding a wave—it is the wave. With deep roots in internet lore, cultural cachet from day one, this isn't another memecoin—it's a movement.

Tokenomics

Frogger's decentralized ethos and simple tokenomics mirror those of other major memecoins like \$SHIBA, \$PEPE, \$DOGE, \$WIF, and \$FLOKI.

A rapidly growing community, zero tax and a burnt liquidity pool.

Thanks to its minimalist contract design, transactions are seamless and scalability is built-in, ensuring new holders can join easily—crucial in the swift-moving meme coin market.

Will Frogger be the next Frog meme to hit BILLIONS in market cap?

Historically, frog memes have proven to be some of the most powerful and enduring symbols in the meme coin world. Take \$Pepe, for example — it dominated the last cycle, soaring to a fully diluted valuation exceeding \$12 billion. This undeniable success highlights one clear truth: frog-themed tokens have a unique ability to capture the hearts of retail investors.

So, the question is — could Frogger be the defining frog meme of this cycle? With its community-driven story and a rapidly growing base of over 2,000 holders, Frogger is poised to be far more than just another meme coin. It represents an evolving narrative that every participant can shape, potentially leading the next wave of meme coin culture.

Get Involved with Frogger

Frogger offers something new in the Memecoin space. An evolving frog-themed cryptocurrency attracting new investors and arcade game lovers from the 80s and 90s. The story continues to get better creating a dynamic experience.
