

OpenText Enterprise Data and AI Solutions to be Available on AWS European Sovereign Cloud

2026-04-13

OpenText will offer customers a hybrid sovereign cloud architecture that supports regulated European Union organizations with secure, AI-ready data platforms, complementing what is available in North America today

WATERLOO, ON, April 13, 2026 /PRNewswire/ -- **OpenText™** (NASDAQ/TSX: OTEX), a global leader in secure information management for AI, announced today that it will make a number of its world leading enterprise data and AI solutions available on the AWS European Sovereign Cloud, a new independent cloud for Europe.

By making its hybrid sovereign cloud offering available via the AWS European Sovereign Cloud, Canada-based OpenText expands its ability to provide a hybrid sovereign cloud in Europe, giving customers the flexibility to leverage the cloud capabilities of AWS while keeping sensitive data and governance firmly anchored within European boundaries.

OpenText™ Content Management, OpenText™ Documentum Content Management, OpenText™ Core Application Security and OpenText™ Core Service Management will be available on the AWS European Sovereign Cloud, further supporting OpenText's growing European client base. OpenText's solutions deliver structured, secure content management, making data ready for AI-powered analytics and automation that accelerate data-driven decision-making; while providing clients with the same security, availability, and performance they expect from AWS. This enables OpenText customers to meet stringent operational autonomy and data residency requirements within the European Union (EU).

"OpenText has spent years building trusted, secure content solutions for the world's most regulated industries and regions including FedRAMP-authorized, IRAP-assessed, and Protected B-aligned deployments," said Shannon Bell, Chief Digital Officer and Chief Information Officer, OpenText. "Making our solution available on the AWS European Sovereign Cloud brings that expertise to a sovereign cloud purpose-built for the European Union. Together with AWS, we are giving customers the confidence to innovate at scale without compromising on control."

The AWS European Sovereign Cloud is a fully featured, independently operated sovereign cloud backed by strong technical controls, sovereign assurances, and legal protections designed to meet the needs of European

governments and enterprises. The AWS European Sovereign Cloud infrastructure is entirely located within the EU and operates independently from existing Regions. Customers using the AWS European Sovereign Cloud will benefit from the full power of AWS including the same service portfolio, security, availability, performance, familiar architecture, APIs, and innovations such as the AWS Nitro System.

Customers can begin planning their transition to the AWS European Sovereign Cloud today.

About OpenText

OpenText™ is a global leader in data management for enterprise AI, helping organizations protect, govern, and activate their data with confidence. Our technologies turn data into information with context to form the knowledge base for enterprise AI. Learn more at www.opentext.com.
