

OpenText World EMEA gets underway, unveiling the newest Cloud Editions Innovations and reimagining the Future of Information Management

4/24/2023

Latest innovations prepare businesses for 2030 to be more connected, intelligent, secure and responsible

WATERLOO, ON , April 24, 2023 /PRNewswire/ -- Today at **OpenText World EMEA – Innovation Summits 2023**, **OpenText™** (NASDAQ: OTEX), (TSX: OTEX) announces OpenText Cloud Editions (CE) 23.2, with over 75,000 new innovations released in the last 12 months to help customers accelerate their cloud-based digital transformation. This milestone, part of the company's extensive **Project Titanium** roadmap, enables customers to further drive productivity and profitability while streamlining experiences and security in a multi-cloud world. OpenText is thrilled to welcome newly acquired Micro Focus customers and colleagues to OpenText World EMEA as it demonstrates and discusses the many exciting innovations and integrations now available.

"OpenText is on the cusp of a new technological era with rapid acceleration towards Business 2030 and information-led transformations. Every industry will be digitally transformed by generation digital, leveraging new rules for corporate accountability and new requirements for technology," said Mark J. Barrenechea, CEO & CTO, OpenText. "I am excited to announce Project Titanium delivered with Cloud Editions 23.2, and announce our next generation roadmap, Titanium X. We are helping customers solve their most complex problems from climate innovation, modern supply chains and acceleration innovation."

With this release, OpenText has delivered on the promise of Titanium. OpenText is now offering a full suite of Public Cloud multi-tenant SaaS solutions in content management, cybersecurity, service management, and application delivery. Moreover, OpenText has expanded the geographical footprint and compliance standards of the OpenText Cloud and brought forward a second generation of capabilities on the private cloud for those in regulated industries or with complex environments. Lastly, Titanium has brought OpenText's next generation of APIs for partners and customers to build their own applications (e.g., Content Capture, eSignature, Document Archive, and Messaging Notifications).

During his keynote address today, Mark J. Barrenechea will sit down with long-time OpenText customer and partner Evonik, to discuss their digital transformation and ongoing cloud and content journeys. "With sustainability and

business modernization increasingly becoming top of mind in the industrial sector, Evonik is more committed than ever to employing effective, efficient and compliant innovations," said Dirk Ramhorst, CIO and Head of IT of Evonik. "We are thrilled to join OpenText on stage to discuss the rollout of our major transformation, and how OpenText cloud and content solutions are helping to reduce our technical and legal risks, manage unstructured content and accelerate towards modernization."

This week, at OpenText World EMEA, CE 23.2 innovations being revealed include:

Increase and strengthen connections to customers, partners, and employees across your entire organization

Understand, distill, and gain actionable insight from vast amounts of information:

- Integration of **OpenText™ Extended ECM** and **OpenText™ Documentum™** with IDOL enables businesses to explore content connections to make smarter, faster decisions with the help of AI-powered insights.
- Automatic identification, extraction and filing of business-critical content from third-party applications to the OpenText™ Extended ECM or Documentum repository reduces content sprawl and delivers insights into connections and relationships surrounding content through visual knowledge graphs.

Enhance productivity workflows so workforces across all industries can work smarter:

- New **OpenText Connectors for Microsoft Power Automate** let customers seamlessly connect any business process to over 1,000 popular applications that power everyday work.
- Connecting these applications to **OpenText™ Extended ECM**, **OpenText™ Core Share** and **OpenText™ eDOCS** empowers users to build and extend their own productivity workflows and eliminate information silos across a massive landscape of applications.

Connect ecosystems and address the convergence of digital, communication and voice experiences: with

OpenText™ Experience Cloud 23.2 :

- Seamlessly connecting customer and employee experience delivers a Total Experience with a composable, open and secure platform.
- A single-workplace user experience provides employees with greater visibility into tasks, tools and content and improves decision making backed by data-driven insights.

Implement immediate and responsible business practices

Simplify implementation and enforcement of more responsible sourcing practices with **OpenText™ Active Risk**

Monitor :

- Proactive assessment and management of supply chain risk around ESG compliance and beyond is enabled by aggregating information from third-party sources, including **EcoVadis** and **Dun & Bradstreet**.
- Integration with **OpenText™ Trading Grid™** allows companies to gain a consolidated view into their suppliers and review risk related to specific business activity, so users can take corrective action backed by actionable insights.

Automate the digital value chain with **OpenText ValueEdge23** :

- This platform and suite of DevOps tools from the Application Delivery Management (ADM) portfolio enables organizations to automate the digital value chain to get smarter applications to market faster.
- Major new capabilities include strategic planning, codeless quality, and real-world performance engineering to improve speed-to-value by accelerating the development-to-production flow.

Operate in an efficient and responsible manner to optimize future spending decisions:

- **HCMX (Hybrid Cloud Management X) FinOps Express** helps foster a culture of financial responsibility, improves decision-making with intelligent insights, and delivers the centralized control that organizations need to reduce their cloud bill.
- Originally part of the IT Operations Management (ITOM) portfolio, this solution enables customers to monitor their cloud spend with granularity while gathering powerful insights to optimize the usage of their clouds, allowing for a significant reduction in overall cloud waste, overspending, and business inefficiencies.

Eliminate maintenance and upgrade effort by moving on-premises deployments to the **OpenText™ Private Cloud** :

- Available to Operations Bridge Premium customers, this offering can accelerate modernization efforts for AIOps to reduce the mean time to resolve incidents, boosting IT service performance and IT operations productivity.

Protect customers and partners with a holistic security portfolio

Act fast to prevent lost productivity and revenue when critical systems go down without warning:

- Enhancements to **Carbonite® Recover** provide Managed Service Providers (MSPs) the flexibility to create their own disaster-recovery-as-a-service offering on the **Google Cloud Platform**.
- Businesses can choose public or private cloud storage, while enabling management of diverse environments through a single console and gaining improved efficiency through greater automation and orchestration.

For more on all the Cloud Editions 23.2 innovations please read our **blogs**. For the first time in-person since 2019,

OpenText kicks off Open World EMEA from April 24 - 27. The global hybrid event – with roadshows in Munich, Paris and London – will unveil the latest OpenText innovations, engage with customers locally, and showcase the future of information management. Additional information and live demonstrations will be presented by OpenText during OpenText World EMEA - keynote sessions with CEO & CTO, Mark J. Barrenechea and EVP & CPO, Muhi Majzoub.
