FOR IMMEDIATE RELEASE
April 18, 2013

FIFTH THIRD ANNOUNCES FIRST QUARTER 2013 NET INCOME TO COMMON SHAREHOLDERS OF $413 MILLION OR $0.46 PER SHARE

- 1Q13 net income available to common shareholders of $413 million, or $0.46 per diluted common share, vs. $390 million or $0.43 per share in 4Q12, up 7% and $421 million or $0.45 per share in 1Q12, up 2%
- 1Q13 results included a benefit of $34 million pre-tax (~$22 million after-tax, or ~$0.02 per share) on the valuation of the warrant Fifth Third holds in Vantiv
  - Significant items in 4Q12 included a positive net pre-tax impact related to Vantiv shares and warrants of $138 million (~$90 million after tax, or ~$0.10 per share) and pre-tax expense for FHLB debt extinguishment of $134 million (~$87 million after-tax, or ~$0.09 per share); significant 1Q12 items included a positive net pre-tax impact related to Vantiv shares and warrants of $127 million (~$83 million after-tax, or ~$0.09 per share)
  - Excluding these items, earnings per diluted common share of $0.44^ increased $0.08, or 22%, from 1Q12
- 1Q13 return on assets (ROA) of 1.41%; return on average common equity of 12.5%; return on average tangible common equity** of 15.4%
- Pre-provision net revenue (PPNR)** of $653 million in 1Q13
  - Net interest income (FTE) of $893 million, down 1% sequentially due primarily to lower day count; net interest margin 3.42%; average portfolio loans up 2% sequentially driven by 6% sequential growth in C&I loans
  - Noninterest income of $743 million included $34 million gain on Vantiv warrant and $17 million in investment securities gains; compared with $880 million in prior quarter which included net gains of $138 million related to Vantiv shares and warrant
  - Noninterest expense of $978 million, down 16% from 4Q12 which included FHLB debt termination charge
- 1Q13 effective tax rate of 30.4% compared with 26.8% in 4Q12 and 28.6% in 1Q12; 1Q13 income taxes included seasonal increase of $12 million related to expiration of stock options; 4Q12 income taxes included $10 million benefit from the termination of certain leases
- Credit trends remain favorable
  - 1Q13 net charge-offs of $133 million (0.63% of loans and leases) vs. 4Q12 NCOs of $147 million and 1Q12 NCOs of $220 million; lowest NCO level since 2Q07; 1Q13 provision expense of $62 million compared with 4Q12 provision of $76 million and 1Q12 provision of $91 million
  - Loan loss allowance decreased $71 million sequentially reflecting continued improvement in credit trends; allowance to loan ratio of 2.08%, 147% of nonperforming assets, 187% of nonperforming loans and leases, and 3.3 times 1Q13 annualized net charge-offs
  - Total nonperforming assets (NPAs) of $1.2 billion including loans held-for-sale (HFS) declined $86 million, or 7%, sequentially; portfolio NPA ratio of 1.41% down 8 bps from 4Q12, NPL ratio of 1.11% down 8 bps from 4Q12
  - Total delinquencies (includes loans 30-89 days past due and over 90 days past due) at lowest levels since 1Q01
- Strong capital ratios*
  - Tier 1 common ratio 9.70%**, up 19 bps sequentially (Basel III pro forma estimate of ~8.9%)
  - Tier 1 capital ratio 10.83%, Total capital ratio 14.35%, Leverage ratio 10.03%
  - Tangible common equity ratio** of 9.03% excluding unrealized gains/losses; 9.28% including them
  - Repurchased ~8 million common shares in 1Q13; average share count reduced by 14 million shares including impact from 4Q12 and 1Q13 share repurchases; new 100 million share repurchase authorization in March
- Book value per share of $15.42; tangible book value per share** of $12.62 up 2% from 4Q12 and 8% from 1Q12

** Capital ratios estimated; presented under current U.S. capital regulations. The pro forma Basel III Tier I common equity ratio is management's estimate based upon its current interpretation of the three draft Federal Register notices proposing enhancements to regulatory capital requirements published in June 2012. The actual impact to the Bancorp's Tier I common equity ratio may change significantly due to revisions to the agencies' final rules. See pp.15-16 for more information.*

Fifth Third Bancorp (Nasdaq: FITB) today reported first quarter 2013 net income of $422 million, compared with net income of $399 million in the fourth quarter of 2012 and net income of $430 million in the first quarter of 2012. After preferred dividends, first quarter 2013 net income available to common shareholders was $413 million, or $0.46 per diluted share, compared with fourth quarter net income of $390 million, or $0.43 per diluted share, and net income of $421 million, or $0.45 per diluted share, in the first quarter of 2012.

First quarter 2013 noninterest income results included a $34 million positive valuation adjustment on the Vantiv warrant; a $7 million gain on the sale of certain Fifth Third Asset Management (FTAM) advisory contracts; and a $7 million charge related to the valuation of the Visa total return swap. Net gains on investment securities were $17 million. First quarter 2013 noninterest expense results included a $9 million benefit from the sale of affordable housing investments and $9 million in charges to increase litigation reserves. First quarter income tax expense was higher by $12 million due to the seasonal expiration of employee stock options.

Fourth quarter 2012 noninterest income included a $157 million gain on the sale of Vantiv shares; a $19 million negative valuation adjustment on the Vantiv warrant; and a $15 million charge related to the valuation of the Visa total return swap. Net gains on investment securities were $2 million. Fourth quarter noninterest expense included $134 million of debt extinguishment costs associated with the termination of Federal Home Loan Bank (FHLB) debt and $13 million in charges to increase litigation reserves. Results also included an additional $29 million of charges to increase the mortgage representation and warranty reserve due to new Freddie Mac guidance for potential 2004-2006 repurchase claims. Fourth quarter 2012 taxes were reduced by approximately $10 million due to the termination of certain leases.

First quarter 2012 results included $115 million in pre-tax gains on the initial public offering of Vantiv, Inc., $46 million in positive valuation adjustments on the Vantiv warrant and put option, as well as $34 million of charges recorded in equity method earnings in other noninterest income related to Vantiv's bank debt refinancing and debt termination charges. First quarter 2012 results also included $23 million in income from an agreement reached on certain outstanding disputes for non-income tax related assessments in noninterest expense; a $19 million charge to noninterest income related to the Visa total return swap, additions to litigation reserves of $13 million, debt termination charges of $9 million, and severance expense of $6 million. Net gains on investment securities were $9 million.

"First quarter earnings results demonstrated continued strong momentum for Fifth Third," said Kevin Kabat, CEO of Fifth Third Bancorp. "Net income to common shareholders of $413 million was among the best results in company history. Return on average assets was 1.41 percent and return on average tangible common equity* was 15.4 percent.

"Loan growth remained strong and net interest income results were higher than expected. Average loans increased 2 percent sequentially, driven by 4 percent growth in average commercial loans with continued strength in C&I lending, up 6 percent from the fourth quarter. Residential mortgage lending also remained strong. Fee income results were solid despite the negative effects of seasonality in the first quarter.

"Credit trends continued to be favorable, with net charge-offs declining 10 percent, to 0.63 percent of average loans and leases, the lowest level since the second quarter of 2007. Nonperforming assets declined 7 percent. Loan loss reserve levels and coverage ratios remain strong at 2.08 percent of loans and 187 percent of nonperforming portfolio loans.

"We completed our repurchase activity related to our 2012 capital plan in early April. Total repurchases in 2012 and the first quarter of 2013 were 50 million shares, including those related to after-tax gains on the sale of Vantiv shares. Period end shares have declined 5 percent since year-end 2011. Despite these actions, our strong common equity capital ratios have increased 35 basis points over this period. Additionally, in March, we announced a 10 percent increase in the

quarterly common stock dividend, to $0.11. Given our capacity for internal capital generation, we would expect to continue to return capital to shareholders in a responsible manner, absent unforeseen developments."

Net interest income of $893 million on a fully taxable equivalent basis decreased $10 million from the fourth quarter and reflected a $12 million decrease due to lower day count in the first quarter. Excluding the impact of day count, the benefit of loan growth partially offset the effect of loan repricing and lower reinvestment rates on the securities portfolio. Net interest income also benefited from a decline in interest expense driven by a reduction in long-term debt expense reflecting the full quarter impact of the FHLB debt termination in the fourth quarter of approximately $9 million.

The net interest margin was 3.42 percent, a decrease of 7 bps from 3.49 percent in the previous quarter. The decline in net interest margin was primarily driven by lower loan and securities yields and was partially offset by the benefit of 3 bps from the full quarter impact of the FHLB debt termination in the fourth quarter and 2 bps from the effect of lower day count in the first quarter.

Compared with the first quarter of 2012, net interest income decreased $10 million and the net interest margin decreased 19 bps, driven by lower asset yields partially offset by higher average loan balances, lower long-term debt expense, run-off in higher-priced CDs and mix shift to lower cost deposit products.

Securities

Average securities and other short-term investments were $16.8 billion in the first quarter of 2013 compared with $16.8 billion in the previous quarter and $16.7 billion in the first quarter of 2012.

Total average loans and leases (excluding held for sale)	$85,903	$83,943	$82,888	$82,586	$81,500	2%	5%
Average loans held for sale	2,977	2,237	1,941	1,922	2,257	33%	32%

Average loan and lease balances (excluding loans held-for-sale) increased $2.0 billion, or 2 percent, sequentially and increased $4.4 billion, or 5 percent, from the first quarter of 2012. Period end loan and lease balances (excluding loans held-for-sale) decreased $106 million sequentially and increased $3.6 billion, or 4 percent, from a year ago. These comparisons reflect the securitization of $500 million of auto loans in March 2013. This reduced average portfolio loans for the quarter by $169 million.

Average commercial portfolio loan and lease balances were up $1.9 billion, or 4 percent, sequentially and increased $3.7 billion, or 8 percent, from the first quarter of 2012. Average C&I loans increased 6 percent sequentially and 16 percent compared with the first quarter of 2012. Average commercial mortgage and commercial construction loan balances combined declined 2 percent sequentially and 12 percent from the same period in the previous year. Commercial line usage, on an end of period basis, was 31 percent of committed lines in the first quarter of 2013 compared with 31 percent in the fourth quarter of 2012 and 32 percent in the first quarter of 2012.

Average consumer portfolio loan and lease balances were flat sequentially and increased $705 million, or 2 percent, from the first quarter of 2012. During the quarter, $500 million in auto loans were reclassified to held-for-sale in anticipation of their securitization and sale, which took place at the end of March. This reduced average portfolio loans for the quarter by $169 million. Including that effect, average auto loans were flat sequentially and increased 1 percent from the first quarter of 2012 due to increased originations. Average residential mortgage loans increased 2 percent sequentially and 12 percent from a year ago, reflecting the continued retention of certain shorter term residential mortgage loans. Home equity loan balances declined 3 percent sequentially and 7 percent year-over-year due to lower demand and production.

Average loans held-for-sale balance growth was primarily driven by higher residential mortgage held-for-sale balances as well as auto loans that were moved to held-for-sale prior to being securitized and sold at the end of March. Average loans held-for-sale balances of $3.0 billion increased $740 million sequentially, reflecting a $588 million increase in residential mortgage loans and a $135 million increase in auto loans, and increased $720 million compared with the first quarter of 2012. Period end loans held-for-sale of $2.7 billion decreased $248 million from the previous quarter and increased $1.1 billion from the first quarter of 2012 reflecting fluctuations in residential mortgage held-for-sale balances.

(a) Includes commercial customer Eurodollar sweep balances for which the Bancorp pays rates comparable to other commercial deposit accounts.

Average core deposits increased $631 million, or 1 percent, sequentially and increased $3.2 billion, or 4 percent, from the first quarter of 2012. Average transaction deposits, which are included in core deposits, increased $743 million, or 1 percent, from the fourth quarter of 2012 primarily driven by higher money market and interest checking balances, partially offset by lower demand deposits, and savings balances. Year-over-year transaction deposits increased $3.8 billion, or 5 percent, driven by higher money market, demand deposits, and interest checking balances, partially offset by lower savings and foreign office balances. Other time deposits, primarily CDs, decreased 3 percent sequentially and 13 percent compared with the first quarter of 2012.

Commercial average transaction deposits decreased 2 percent sequentially and increased 3 percent from the previous year. Sequential performance reflected lower demand deposit balances due to seasonality and migration to interest checking balances. Year-over-year growth was primarily driven by higher inflows to interest checking, demand deposit and money market account balances, partially offset by lower foreign office balances. Average public funds balances were $5.5 billion compared with $5.0 billion in the fourth quarter of 2012 and $6.2 billion in the first quarter of 2012.

Consumer average transaction deposits increased 4 percent sequentially and increased 7 percent from the first quarter of 2012. The sequential increase reflected seasonally higher money market and demand deposits, which were partially offset by lower interest checking and savings balances. Year-over-year growth was driven by increased money market, demand deposit, and interest checking balances partially offset by lower savings balances. Consumer CDs included in core deposits declined 3 percent sequentially, driven by customer reluctance to purchase CDs given the current low rate environment, and declined 13 percent year-over-year driven by maturities of higher-rate CDs.

Total wholesale funding	$17,683	$16,354	$17,431	$17,533	$16,596	8%	7%

Average wholesale funding of $17.7 billion increased $1.3 billion, or 8 percent, sequentially and increased $1.1 billion, or 7 percent, from the first quarter of 2012. The sequential and year-over-year comparisons reflect the issuance of certificates $100,000 and over and higher short-term borrowings, primarily short-term FHLB borrowings, partially offset by a decrease in long-term debt balances. The reduction in average long-term debt balances reflects the full quarter impact of the $1.0 billion termination of FHLB debt in the fourth quarter partially offset by the partial quarter impact of the issuance of $1.3 billion in bank notes at the end of February 2013.

NM: Not Meaningful

Noninterest income of $743 million decreased $137 million sequentially, or 16 percent, and decreased $26 million, or 3 percent, compared with prior year results. The sequential decrease was primarily driven by the $157 million gain from the sale of Vantiv shares in the fourth quarter, partially offset by Vantiv warrant valuation adjustments (gains of $34 million in

the first quarter of 2013 versus losses of $19 million in the fourth quarter 2012). Otherwise, the sequential comparison reflected lower mortgage banking and corporate banking revenue. The year-over-year comparison primarily reflected the impact to first quarter 2012 results of $115 million in gains from Vantiv's IPO, $34 million in charges recorded in equity method earnings related to Vantiv's debt refinancing and related termination charges, and a $46 million positive valuation adjustment on the Vantiv warrant and put option.

First quarter 2013 results also included $7 million in gains on the sale of certain FTAM advisory contracts. Current quarter's results also included a $7 million charge related to the valuation of the total return swap entered into as part of the 2009 sale of Visa, Inc. Class B shares. Negative valuation adjustments on this swap were $15 million in the fourth quarter of 2012 and $19 million in the first quarter of 2012. Excluding these items, the aforementioned Vantiv-related impacts, and investment securities gains in all periods, noninterest income of $692 million decreased $63 million, or 8 percent, from the previous quarter and increased $40 million, or 6 percent, from the first quarter of 2012.

Service charges on deposits of $131 million decreased 3 percent from the fourth quarter and increased 1 percent compared with the same quarter last year. Retail service charges decreased 6 percent sequentially due to seasonally lower consumer overdraft occurrences in the first quarter. Compared with the first quarter of 2012, retail service charges decreased 6 percent primarily due to changes in our overdraft policies during 2012. Commercial service charges decreased 1 percent sequentially but increased 6 percent from a year ago. The improved performance year-over-year was primarily due to pricing changes implemented during 2012.

Corporate banking revenue of $99 million decreased 13 percent from the fourth quarter of 2012 driven by lower syndication fees, business lending fees, and derivative fees, which benefited in the fourth quarter from higher activity in anticipation of changes to tax rules. Corporate banking revenue increased 2 percent from the same period last year driven by higher institutional sales and foreign exchange fees as a result of investments in our capital markets capabilities.

Mortgage banking net revenue was $220 million in the first quarter of 2013, a 15 percent decrease from the fourth quarter of 2012 and a 7 percent increase from the first quarter of 2012. First quarter 2013 originations were a record $7.4 billion, compared with $7.0 billion in the previous quarter and $6.4 billion in the first quarter of 2012. First quarter 2013 originations resulted in gains of $169 million on mortgages sold, compared with gains of $239 million during the previous quarter and $174 million during the first quarter of 2012. The decline from the prior quarter and prior year reflected lower gain on sale margins. Mortgage servicing fees this quarter were $61 million, compared with $64 million in the previous quarter and $61 million in the first quarter of 2012. Mortgage banking net revenue is also affected by net servicing asset value adjustments, which include mortgage servicing rights (MSR) amortization and MSR valuation adjustments (including mark-to-market adjustments on free-standing derivatives used to economically hedge the MSR portfolio). These net servicing asset valuation adjustments were negative $10 million in the first quarter of 2013 (reflecting MSR amortization of $53 million and MSR valuation adjustments of positive $43 million); negative $45 million in the fourth quarter of 2012 (MSR amortization of $52 million and MSR valuation adjustments of positive $7 million); and negative $31 million in the first quarter of 2012 (MSR amortization of $46 million and MSR valuation adjustments of positive $15 million). The mortgage servicing asset, net of the valuation reserve, was $766 million at quarter end on a servicing portfolio of $65 billion.

Net gains on securities held as non-qualifying hedges for the MSR portfolio were $2 million in the first quarter of 2013, compared with net losses of $2 million in the fourth quarter of 2012 and no gains or losses in the first quarter of 2012.

Investment advisory revenue of $100 million increased 8 percent sequentially and increased 4 percent year-over-year. Sequential growth reflected higher tax-related private client services revenue, which is seasonally stronger in the first quarter, and an increase in brokerage fees resulting from increased production as well as improvement in equity and bond market values. The year-over-year increase was due to higher brokerage fees and private client services revenue partially offset by the absence of mutual fund fees largely due to the sale of certain Fifth Third funds in the third quarter of 2012.

Card and processing revenue of $65 million in the first quarter of 2013 decreased 1 percent sequentially and increased 11 percent from the first quarter of 2012. The sequential decrease reflected lower transactions volumes compared with seasonally strong fourth quarter volumes. The year-over-year increase reflected the impact of higher transaction volumes, higher levels of consumer spending, and new products.

Other noninterest income totaled $109 million in the first quarter of 2013, compared with $215 million in the previous quarter and $175 million in the first quarter of 2012. The sequential decrease was driven by the $157 million gain from the sale of Vantiv shares in the fourth quarter. The year-over-year comparison reflected $115 million in gains from Vantiv's IPO and the $34 million charge recorded in equity method earnings related to Vantiv's debt refinancing and related termination charges in the first quarter of 2012. First quarter 2013 results also included $7 million in gains on the sale of certain FTAM advisory contracts. Other noninterest income also includes effects of the valuation of the Vantiv warrant and changes in income related to the valuation of the Visa total return swap. For the quarters ending March 31, 2013, December 31, 2012, and March 31, 2012, the impact of warrant valuation adjustments were positive $34 million, negative $19 million, and positive $46 million, respectively, and changes in income related to the Visa total return swap were losses of $7 million, $15 million, and $19 million, respectively. Excluding the items detailed above, other noninterest income of $75 million decreased approximately $17 million from the previous quarter and increased approximately $8 million from the first quarter of 2012.

Net credit-related costs recognized in other noninterest income were $10 million in the first quarter of 2013 versus $13 million last quarter and $14 million in the first quarter of 2012. First quarter 2013 results included $2 million of net gains on sales of commercial loans held-for-sale and $1 million of fair value charges on commercial loans held-for-sale, as well as $10 million of losses on other real estate owned (OREO). Fourth quarter 2012 results included $4 million of net gains on sales of commercial loans held-for-sale and $3 million of fair value charges on commercial loans held-for-sale, as well as $10 million of losses on OREO. First quarter 2012 results included $5 million of net gains on sales of commercial loans held-for-sale, $1 million of fair value charges on commercial loans held-for-sale, and $17 million of losses on OREO.

Net gains on investment securities were $17 million in the first quarter of 2013, compared with investment securities gains of $2 million in the previous quarter and $9 million in the first quarter of 2012.

Noninterest expense of $978 million decreased 16 percent from the fourth quarter of 2012 and was flat versus the first quarter of 2012. First quarter 2013 expenses included a $9 million benefit from the sale of affordable housing investments and $9 million in charges to increase litigation reserves. Fourth quarter 2012 expenses included $134 million of debt extinguishment costs associated with the termination of $1 billion of FHLB debt; $26 million of additional expenses associated with the increase in the representation and warranty reserve; and $13 million in charges to increase litigation reserves. First quarter 2012 expenses included a $23 million benefit from an agreement reached on certain outstanding disputes for non-income tax related assessments, $14 million in additions to litigation reserves, $9 million in debt termination charges, and $6 million in severance expense. Excluding these items, noninterest expense of $978 million decreased $12 million, or 1 percent, compared with the fourth quarter of 2012 and increased $11 million, or 1 percent, compared with the first quarter of 2012. The sequential decrease was largely due to lower credit-related costs and compensation-related expenses partially offset by increased employee benefits expense due to seasonally higher FICA and unemployment costs of approximately $27 million.

Credit costs related to problem assets recorded as noninterest expense totaled $24 million in the first quarter of 2013, compared with $68 million in the fourth quarter of 2012 and $34 million in the first quarter of 2012. First quarter credit-related expenses included provisioning for mortgage repurchases of $20 million, compared with $44 million in the fourth quarter and $15 million a year ago. (Realized mortgage repurchase losses were $20 million in the first quarter of 2013, compared with $15 million last quarter and $17 million in the first quarter of 2012.) Fourth quarter 2012 mortgage repurchase provision included $26 million of additional expense to increase the representation and warranty reserve as a result of additional information obtained from Freddie Mac regarding changes to their selection criteria for future mortgage repurchases and file requests. Provision for unfunded commitments was a benefit of $11 million in the current quarter, compared with an expense of $3 million last quarter and a benefit of $2 million a year ago. Derivative valuation adjustments related to customer credit risk were positive $1 million, $2 million, and $4 million for this quarter, last quarter and the year ago quarter, respectively. OREO expense was $4 million this quarter, compared with $5 million last quarter and $5 million a year ago. Other problem asset-related expenses were $12 million in the first quarter, compared with $19 million the previous quarter and $19 million in the same period last year.

Net charge-offs were $133 million in the first quarter of 2013, or 63 bps of average loans on an annualized basis, the lowest level since the third quarter of 2007. Net charge-offs declined 10 percent compared with fourth quarter 2012 net charge-offs of $147 million, and declined 39 percent versus first quarter 2012 net charge-offs of $220 million.

Commercial net charge-offs were $54 million, or 44 bps, down $2 million compared with $56 million, or 46 bps, in the fourth quarter driven by declines in C&I net charge-offs. Commercial net charge-offs were at the lowest level since the third quarter of 2007. C&I net charge-offs were $25 million, down $11 million from $36 million in the previous quarter. Commercial mortgage net charge-offs totaled $26 million, compared with $17 million in the prior quarter. Commercial construction net charge-offs were $3 million in the first quarter, down $1 million compared with the previous quarter. The homebuilder / developer portfolio now totals $309 million, down from a peak of $3.3 billion in the second quarter of 2008. We recorded $1 million of net charge-offs on these loans in the first quarter of 2013.

Consumer net charge-offs were $79 million, or 89 bps, down $12 million sequentially. Net charge-offs on residential mortgage loans in the portfolio were $20 million, down $3 million from the previous quarter. Home equity net charge-offs were $30 million, down from $34 million in the fourth quarter of 2012. Net charge-offs on brokered home equity loans represented 34 percent of first quarter home equity losses; such loans are 14 percent of the total home equity portfolio. The home equity portfolio included $1.3 billion of brokered loans, down from a peak of $2.6 billion in 2007; originations of these loans were discontinued in 2007. Net charge-offs in the auto portfolio of $4 million decreased $5 million compared with the prior quarter. Net charge-offs on consumer credit card loans were $20 million, up $1 million from fourth quarter. Net charge-offs in other consumer loans were $5 million, down $1 million compared with the previous quarter.

(a) Excludes government insured advances.

(b) Does not include nonaccrual loans held-for-sale.

(c) Excludes $21.5 million of restructured nonaccrual loans and $7.6 million of restructured accruing loans associated with a consolidated variable interest entity in which the Bancorp has no continuing credit risk.

Total nonperforming assets, including loans held-for-sale, were $1.2 billion, a decline of $86 million, or 7 percent, from the previous quarter. Nonperforming assets held-for-investment (NPAs) were $1.2 billion, or 1.41 percent, of total loans, leases and OREO, and decreased $76 million, or 6 percent, from the previous quarter. Nonperforming loans held-for-investment (NPLs) at quarter end were $951 billion or 1.11 percent of total loans, leases and OREO, and decreased $78 million, or 8 percent, from the previous quarter.

Commercial portfolio NPAs were $828 million, or 1.66 percent of commercial loans, leases and OREO, and decreased $55 million, or 6 percent, from the fourth quarter. Commercial portfolio NPLs were $639 million, or 1.28 percent of commercial loans and leases, and decreased $58 million from last quarter driven by declines in commercial mortgage and C&I NPLs. Commercial mortgage portfolio NPAs were $409 million, down $25 million from the previous quarter. C&I portfolio NPAs of $332 million decreased $20 million from the prior quarter. Commercial construction portfolio NPAs were $78 million, a decline of $10 million from the previous quarter. Commercial real estate loans in Michigan and Florida represented 49 percent of commercial real estate NPAs and 36 percent of our total commercial real estate portfolio. Within the overall commercial loan portfolio, residential real estate builder and developer portfolio NPAs of $79 million declined $9 million from the fourth quarter, of which $48 million were commercial mortgage assets, $21 million were

commercial construction assets and $10 million were C&I assets. Commercial portfolio NPAs included $159 million of nonaccrual troubled debt restructurings (TDRs), compared with $177 million last quarter.

Consumer portfolio NPAs of $382 million, or 1.06 percent of consumer loans, leases and OREO, decreased $21 million from the fourth quarter. Consumer portfolio NPLs were $312 million, or 0.87 percent of consumer loans and leases and decreased $20 million from last quarter. Of consumer NPAs, $333 million were in residential real estate portfolios. Residential mortgage NPAs were $275 million, $15 million lower than last quarter, with Florida representing 46 percent of residential mortgage NPAs and 14 percent of total residential mortgage loans. Home equity NPAs of $58 million were down $4 million compared with last quarter. Credit card NPAs were up $1 million compared to the previous quarter at $40 million. Consumer nonaccrual TDRs were $174 million in the first quarter of 2013, compared with $187 million in the fourth quarter 2012.

First quarter OREO balances included in portfolio NPA balances described above were $252 million, up $3 million from the fourth quarter, and included $190 million in commercial OREO and $62 million in consumer OREO. Repossessed personal property of $7 million consisted largely of autos.

Loans still accruing over 90 days past due were $164 million, down $31 million, or 16 percent, from the fourth quarter of 2012. Commercial balances 90 days past due of $1 million were down $23 million sequentially. Consumer balances 90 days past due of $163 million were down $8 million from the previous quarter. Loans 30-89 days past due excluding nonaccruals of $306 million decreased $24 million, or 7 percent, from the previous quarter. Commercial balances 30-89 days past due excluding nonaccruals of $37 million were up $20 million sequentially driven by one large credit and consumer balances 30-89 days past due excluding nonaccruals of $269 million decreased $44 million from the fourth quarter, reflecting declines in all categories.

Commercial nonaccrual loans held-for-sale were $19 million, compared with $29 million at the end of the fourth quarter. During the quarter, $10 million of nonaccrual held-for-sale loans were sold; $3 million of nonaccrual commercial loans from the portfolio were transferred to loans held-for-sale, and $3 million of loans from loans held-for-sale were transferred to OREO. Negative valuation adjustments of $1 million were recorded on held-for-sale loans and net gains of $3 million were recorded on loans that were sold or settled during the quarter.

(a) The tangible equity, tangible common equity, tier I common equity and tangible book value per share ratios, while not required by accounting principles generally accepted in the United States of America (U.S. GAAP), are considered to be critical metrics with which to analyze banks. The ratios have been included herein to facilitate a greater understanding of the Bancorp's capital structure and financial condition. See the Regulation G Non-GAAP Reconciliation table for a reconciliation of these ratios to U.S. GAAP.

(b) Under the banking agencies risk-based capital guidelines, assets and credit equivalent amounts of derivatives and off-balance sheet exposures are assigned to broad risk categories. The aggregate dollar amount in each risk category is multiplied by the associated risk weight of the category. The resulting weighted values are added together resulting in the Bancorp's total risk weighted assets.

(c) Current period regulatory capital data ratios are estimated.

Capital ratios remained strong, reflecting growth in retained earnings and included the impact of share repurchase activity during the quarter. Compared with the prior quarter, the Tier 1 common equity ratio* increased 19 bps to 9.70 percent. The tangible common equity to tangible assets ratio* was 9.03 percent (excluding unrealized gains/losses) and 9.28 percent (including unrealized gains/losses). The Tier 1 capital ratio increased 18 bps to 10.83 percent. The Total capital ratio decreased 7 bps to 14.35 percent and the Leverage ratio decreased 2 bps to 10.03 percent. The Tier 1 common capital ratio was reduced by 11 bps due to the repurchase of approximately $125 million in common shares announced during the quarter.

Book value per share at March 31, 2013 was $15.42 and tangible book value per share* was $12.62, compared with December 31, 2012 book value per share of $15.10 and tangible book value per share of $12.33.

As previously announced, Fifth Third entered into a share repurchase agreement with a counterparty on January 28, 2013, whereby Fifth Third would purchase approximately $125 million of its outstanding common stock. For the quarter, this transaction reduced Fifth Third's share count by 7 million shares on the initial transaction date, which had a 5 million share impact on average share count. The settlement of the forward contract occurred on April 5, 2013 and an additional 849,037 shares were repurchased upon completion of the agreement.

U.S. banking regulators recently proposed new capital rules for U.S. banks as well as changes to risk-weightings for assets, which implement portions of rules proposed by international banking regulators known as Basel III and Basel II. Fifth Third would be subject to the proposed "standardized approach" for risk-weightings of assets and would be subject to

** Non-GAAP measure; see Reg. G reconciliation on page 33.*

the Market Risk Rule for trading assets and liabilities. These proposals were presented for public comment, which regulators are currently studying. We continue to evaluate these proposals and their potential impact. Our current estimate of the pro-forma fully phased in Tier I common equity ratio at March 31, 2013 under the proposed capital rules is approximately 8.9 percent** compared with 9.70 percent* as calculated under the existing Basel I capital framework. The primary drivers of the change from the existing Basel I capital framework to the Basel III proposal are an increase in Tier I common equity of approximately 36 bps (primarily from the inclusion of AOCI) which would be more than offset by the impact of increases in risk-weighted assets (primarily from 1-4 family senior and junior lien residential mortgages and commitments with an original maturity of one year or less). The pro forma Tier I common equity ratio exceeds the proposed minimum Tier I common equity ratio of 7 percent comprised of a minimum of 4.5 percent plus a capital conservation buffer of 2.5 percent. The pro forma Tier I common equity ratio does not include the effect of any mitigating actions the Bancorp may undertake to offset the impact of any final capital rules. As noted, the proposed rules remain subject to public comment, interpretation, and change.

Under the Dodd-Frank Act financial reform legislation, TruPS were to be phased out of Tier 1 capital over three years beginning in 2013. The new regulations proposed by U.S. banking regulators also propose to cease Tier 1 capital treatment for outstanding TruPS, with a similar phasing period. Fifth Third's Tier 1 and Total capital levels at March 31, 2013 included $810 million of TruPS, or 74 bps of risk weighted assets. Based on regulatory developments, we will continue to evaluate the role of these types of securities in our capital structure and included the potential redemption of $750 million in TruPS in our 2013 CCAR plan (see below). To the extent these types of securities remain outstanding during and after the phase-in period they would be expected to continue to be included in Total capital, subject to final rule-making for U.S. capital standards. We expect to manage our capital structure over time – including the components represented by common equity and non-common equity – to adapt to and reflect the effect of legislation, changes in U.S. bank capital regulations that reflect international capital rules developments, regulatory expectations, and our goals for capital levels and capital composition as appropriate given any changes in rules.

Fifth Third is subject to the Federal Reserve's (FRB) Capital Plans Rule which was issued November 9, 2012. Under this rule, we are required to submit our annual capital plan to the Federal Reserve, for its objection or non-objection. The plan includes those capital actions Fifth Third intends to pursue or contemplate during the period covered by the FRB's response, which is the second quarter of 2013 through the first quarter of 2014.

On March 14, 2013, Fifth Third announced that the FRB did not object to Fifth Third's 2013 CCAR capital plan, which included the potential increase in the quarterly common stock dividend to $0.12, to be considered by the Board at its scheduled quarterly meeting in June; the potential repurchase of up to $750 million in TruPS, subject to the determination of a regulatory capital event, and replacement with the issuance of a similar amount of Tier 2-qualifying subordinated debt; the potential exercise by Fifth Third of its option to convert the $398 million in outstanding Depositary Shares representing Series G 8.5 percent convertible preferred stock into approximately 35.5 million common shares issued to the holders.[1] (Note that these securities are currently accounted for under the "if-converted" method for inclusion in common shares for earnings per share reporting purposes.) If this conversion were to occur, the capital plan incorporated the intention to repurchase an amount of common shares similar to the amount issued in the conversion up to $550 million in market value, and issue $550 million in a new class of preferred securities; the potential repurchase of common

** Non-GAAP measure; see Reg. G reconciliation on page 33.*

[1] The earliest business day that any such conversion could occur is July 1, 2013, and is subject to Fifth Third giving 20 days prior notice of the conversion date. Fifth Third has the option to mandate conversion if the closing price of Fifth Third's common stock is at or above the applicable conversion price of $15.05 for 20 of the 30 consecutive trading days immediately preceding the date Fifth Third gives notice of conversion.

shares in an amount up to $984 million, including up to $550 million related to the potential issuance of shares issued in a Series G preferred stock conversion; and the potential issuance of an additional $500 million in a new class of preferred securities to increase the non-common portion of Tier 1 capital as defined under Basel III proposed rules.[2] In addition, the capital plan incorporated the intention that we would make incremental repurchases of common shares in the amount of any after-tax gains from the sale of Vantiv, Inc. ("Vantiv") stock. These common share repurchase plans were intended to limit the further accumulation of excess common equity capital during the CCAR period. These plans were more fully described in our March 14, 2013 announcement of the FRB's response to our capital plan. Any such actions would be based on environmental and market conditions, earnings results, our capital position, and other factors, as well as approval by the Fifth Third Board of Directors, at the time.

Tax Rate

The effective tax rate was 30.4 percent this quarter compared with 26.8 percent in the fourth quarter. The first quarter 2013 tax rate was seasonally high due to the expiration of employee stock options. The fourth quarter 2012 tax rate was lower than normal due to the benefit of approximately $10 million related to the termination of certain leases.

Other

Fifth Third Bank owns 70.2 million units representing a 33 percent interest in Vantiv Holding, LLC. Based upon Vantiv's closing price of $23.74 on March 28, 2013, our interest in Vantiv was valued at approximately $1.7 billion. Next month in our 10-Q, we will update our disclosure of the carrying value of our interest in Vantiv stock which was $563 million as of December 31, 2012. The difference between the market value and our book value is not recognized in Fifth Third's equity or capital. Additionally, Fifth Third has a warrant to purchase additional shares in Vantiv which is carried as a derivative asset at a fair value of $211 million.

Fifth Third is the general partner in a partnership, which is consolidated for reporting purposes but for which Fifth Third has immaterial economic risk, with risk being borne primarily by the limited partners. During the quarter, Fifth Third recorded $2 million in charge-offs and $8 million in additional provision expense related to this partnership. The effect of these impacts is fully offset in net income attributable to noncontrolling interests recorded below Fifth Third's net income line.

Forward-Looking Statements

This news release contains statements that we believe are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Rule 175 promulgated thereunder, and Section 21E of the Securities Exchange Act of 1934, as amended, and Rule 3b-6 promulgated thereunder. These statements relate to our financial condition, results of operations, plans, objectives, future performance or business. They usually can be identified by the use of forward-looking language such as "will likely result," "may," "are expected to," "is anticipated," "estimate," "forecast," "projected," "intends to," or may include other similar words or phrases such as "believes," "plans," "trend," "objective," "continue," "remain," or similar expressions, or future or conditional verbs such as "will," "would," "should," "could," "might," "can," or similar verbs. You should not place undue reliance on these statements, as they are subject to risks and uncertainties, including but not limited to the risk factors set forth in our most recent Annual Report on Form 10-K. When considering these forward-looking statements, you should keep in mind these risks and uncertainties, as well as any cautionary statements we may make. Moreover, you should treat these statements as speaking only as of the date they are made and based only on information then actually known to us.

There are a number of important factors that could cause future results to differ materially from historical performance and these forward-looking statements. Factors that might cause such a difference include, but are not limited to: (1) general economic conditions and weakening in the economy, specifically the real estate market, either nationally or in the states in which Fifth Third, one or more acquired entities and/or the combined company do business, are less favorable than expected; (2) deteriorating credit quality; (3) political developments, wars or other hostilities may disrupt or increase volatility in securities markets or other economic conditions; (4) changes in the interest rate environment reduce interest margins; (5) prepayment speeds, loan origination and sale volumes, charge-offs and loan loss provisions; (6) Fifth Third's ability to maintain required capital levels and adequate sources of funding and liquidity; (7) maintaining capital requirements may limit Fifth Third's operations and potential growth; (8) changes and trends in capital markets; (9) problems encountered by larger or similar financial institutions may adversely affect the banking industry and/or Fifth Third; (10) competitive pressures among depository institutions increase significantly; (11) effects of critical accounting policies and judgments; (12) changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board (FASB) or other regulatory agencies; (13) legislative or regulatory changes or actions, or significant litigation, adversely affect Fifth Third, one or more acquired entities and/or the combined company or the businesses in which Fifth Third, one or more acquired entities and/or the combined company are engaged, including the Dodd-Frank Wall Street Reform and Consumer Protection Act; (14) ability to maintain favorable ratings from rating agencies; (15) fluctuation of Fifth Third's stock price; (16) ability to attract and retain key personnel; (17) ability to receive dividends from its subsidiaries; (18) potentially dilutive effect of future acquisitions on current shareholders' ownership of Fifth Third; (19) effects of accounting or financial results of one or more acquired entities; (20) difficulties from the separation of or the results of operations of Vantiv, LLC from Fifth Third; (21) loss of income from any sale or potential sale of businesses that could have an adverse effect on Fifth Third's earnings and future growth; (22) ability to secure confidential information and deliver products and services through the use of computer systems and telecommunications networks; and (23) the impact of reputational risk created by these developments on such matters as business generation and retention, funding and liquidity.

You should refer to our periodic and current reports filed with the Securities and Exchange Commission, or "SEC," for further information on other factors, which could cause actual results to be significantly different from those expressed or implied by these forward-looking statements.

(a) Current period regulatory capital data and ratios are estimated.
(b) Under the banking agencies' risk-based capital guidelines, assets and credit equivalent amounts of derivatives and off-balance sheet exposures are assigned to broad risk categories. The aggregate dollar amount in each risk category is multiplied by the associated risk weight of the category. The resulting weighted values are added together resulting in the Bancorp's total risk weighted assets.

Basel III-Estimated Tier I common equity ratio

	March 2013	December 2012	September 2012	June 2012
Tier I common equity (Basel I)	10,632	10,429	10,335	10,396
Add: Adjustment related to AOCI for AFS securities	397	429	506	551
Estimated Tier I common equity under Basel III rules [(k)]	11,029	10,858	10,841	10,947
Estimated risk-weighted assets under Basel III rules [(l)]	123,720	123,725	120,308	119,428
Estimated Tier I common equity ratio under Basel III rules	8.91%	8.78%	9.01%	9.17%

(k) Tier I common equity under Basel III includes the unrealized gains and losses for AFS securities. Other adjustments include mortgage servicing rights and deferred tax assets subject to threshold limitations and deferred tax liabilities related to intangible assets.

(l) Key differences under Basel III in the calculation of risk-weighted assets compared to Basel I include: (1) Risk weighting for commitments under 1 year; (2) Higher risk weighting for exposures to residential mortgage, home equity, past due loans, foreign banks and certain commercial real estate; (3) Higher risk weighting for mortgage servicing rights and deferred tax assets that are under certain thresholds as a percent of Tier I capital; (4) Incremental capital requirements for stress VaR; and (5) Derivatives are differentiated between exchange clearing and over-the-counter and the 50% risk-weight cap is removed.
