Q2 2019 Financial & Operating Results Conference Call

Brucejack Mine Generates \$41 Million Cash from Operations

August 02, 2019

Forward-Looking Information

This Presentation contains “forward-looking information” and “forward looking statements” “future oriented financial information” and/or “financial outlooks” within the meaning of applicable Canadian and United States securities legislation (collectively herein referred to as “forward-looking information”). The purpose of disclosing future oriented financial information and financial outlooks is to provide a general overview of management’s expectations regarding the anticipated results of operations and costs thereof and readers are cautioned that future oriented financial information and financial outlook may not be appropriate for other purposes. Wherever possible, words such as “plans”, “expects”, “guidance”, “projects”, “assumes”, “budget”, “strategy”, “scheduled”, “estimates”, “forecasts”, “anticipates”, “believes”, “intends”, “modeled”, “targets” and similar expressions or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved, or the negative forms of any of these terms and similar expressions, have been used to identify forward-looking information. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance are not statements of historical fact and may be forward-looking statements. Forward-looking information may include, but is not limited to, information with respect to: the estimation of Mineral Reserves and Resources, including the updates thereto; realization of Mineral Reserve and Resource estimates; our estimated life of mine and life of mine plan for the Brucejack Mine; production and processing estimates; capital, sustaining and operating cost estimates and timing thereof; estimated economic results of the Brucejack Mine, including net cash flow and net present value; the expected grade of gold and silver production; predicted metallurgical recoveries for gold and silver; geological and mineralization interpretations; development of the Brucejack Mine; the Brucejack Mine production rate and the ramp-up to 3,800 tonnes per day production rate; capital modifications and upgrades, underground development, and estimated expenditures and timelines in connection therewith, including with respect to the ramp-up to 3,800 tonnes per day production rate; our planned mining (including mining methods), expansion, exploration and development activities, including our infill, expansion and underground exploration drill programs and our grassroots exploration program, and the results, costs and timing thereof; timelines and similar statements relating to the economic viability of the Brucejack Mine, including mine life, total tonnes mined and processed and mining operations; production and cost guidance; our operational grade control program, including plans with respect to our infill drill program and our local grade control model; grade reconciliation, updated geological interpretation and mining initiatives with respect to the Brucejack Mine; our operational strategy; our future operational and financial results, including estimated cash flows, and the timing thereof; payment of our debt and other obligations, including the source of funds and timing thereof; the future price of gold and silver; our liquidity and the adequacy of our financial resources; our intentions with respect to our capital resources; results, analyses and interpretations of exploration and drilling programs; timing, receipt, and anticipated effects of, and anticipated capital costs in connection with approvals, consents and permits under applicable legislation; litigation matters; environmental matters; our effective tax rate and the recognition of our previously unrecognized income tax attributes; statements regarding United States dollar cash flows, currency fluctuations and the recurrence of foreign currency translation adjustments; plans regarding our compensation policy and practices; and management and board of directors succession plans. Forward-looking information is subject to a variety of known and unknown risks, uncertainties and other factors that could cause actual events or results to materially differ from those expressed or implied by the forward-looking information, including, without limitation, those related to: uncertainty as to the outcome of legal proceedings; the effect of indebtedness on cash flow and business operations; the effect of restrictive covenants in our agreements; our ability to satisfy commitments under our Offtake Agreement; assumptions regarding expected capital costs, operating costs and expenditures, production schedules, economic returns and other projections; our production and production cost estimates, including the accuracy thereof; commodity price fluctuations, including gold price volatility; the accuracy of our Mineral Resource and Reserve estimates (including with respect to size, grade and recoverability) and the geological, operational and price assumptions on which they are based; our ability to maintain or increase our annual production of gold at the Brucejack Mine or discover, develop or acquire Mineral Reserves for production; dependency on the Brucejack Mine for our future operating revenue; the development of our properties; general economic conditions; the inherent risk in the mining industry; and significant governmental regulations, including environmental regulations; and such other risks, uncertainties and factors as are identified in our Annual Information Form dated March 28, 2019, Form 40-F dated March 28, 2019, most recently filed MD&A and other applicable disclosure documents as filed in Canada on SEDAR at www.sedar.com and in the United States through EDGAR at the United States Securities and Exchange Commission’s (“SEC”) website at www.sec.gov (collectively, the “Pretivm Disclosure Documents”). This list is not exhaustive of the factors that may affect any of our forward-looking information. Our forward-looking information is based on the assumptions, beliefs, expectations and opinions of management on the date the statements are made, many of which may be difficult to predict and beyond our control. In connection with the forward-looking information contained in this Presentation, we have made certain assumptions about, among other things: our business and that no significant events will occur outside of our normal course of business; planned exploration and development activities and the costs and timing thereof; future prices of gold and silver and other metal prices; the accuracy of our Mineral Resource and Mineral Reserve estimates; the geology and mineralization of the Brucejack Project; operating conditions; capital and operating cost estimates; production and processing estimates; the results, costs and timing of future exploration and drilling; timelines and similar statements relating to the economic viability of the Brucejack Project; timing and receipt of governmental, regulatory and third party approvals, consents, licenses and permits; obtaining required renewals for existing approvals, consents, licenses and permits; the adequacy of our financial resources and our ability to raise any necessary additional capital on reasonable terms; our ability to satisfy the terms and conditions of our debt obligations; commodity prices; currency exchange rates and interest rates; political and regulatory stability; requirements under applicable laws; market competition; sustained labour stability and availability of equipment; positive relations with local groups; favourable equity and debt capital markets; stability in financial and capital markets; and such other factors and assumptions as are set out in the Pretivm Disclosure Documents. The foregoing list of assumptions and factors is not exhaustive. Although we believe that the assumptions inherent in the forward-looking information are reasonable, they are subject to significant business, social, economic, political, regulatory, competitive and other risks and uncertainties, contingencies and other factors that could cause actual actions, events, conditions, results, performance or achievements to be materially different from those projected in the forward-looking information. Forward-looking information is not a guarantee of future performance. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. We do not assume any obligation to update forward-looking information, whether as a result of new information, future events or otherwise, or to explain any material difference between subsequent actual events and such forward-looking information, other than as required by applicable law. For the reasons set forth above, readers should not place undue reliance on forward-looking information.

Scientific and Technical Disclosure

Certain technical and scientific information contained herein relating to the Brucejack Project is derived from, and in some instances is an extract from, the Company's National Instrument 43-101 – Standards of Disclosure of Mineral Projects ("NI 43-101") – technical report (the "2019 Report") entitled "Technical Report on the Brucejack Gold Mine, Northwest British Columbia" with an effective date of April 4, 2019 prepared for Pretivm by Ivor W.O. Jones, M.Sc., P.Geo., FAusIMM, CP(Geo) of Ivor Jones Pty Ltd., Mark Horan, P.Eng. of Tetra Tech Canada Inc. ("Tetra Tech"), Jianhui (John) Huang, Ph.D., P.Eng. of Tetra Tech, Hassan Ghaffari, P.Eng. of Tetra Tech, Maritz Rykaart, Ph.D., P.Eng. of SRK Consulting (Canada) Inc., Rolf Schmitt, M.Sc., P.Geo. of Environmental Resources Management, Alison Shaw, Ph.D., P.Geo. of Lorax Environmental Services Ltd., Hamish Weatherly, M.Sc., P.Geo. of BGC Engineering Inc. ("BGC"), Trevor Crozier, M.Eng., P.Eng. of BGC, Catherine Schmid, M.Sc., P.Eng. of BGC and Ed Carey, P.Eng. of BGC. The 2019 Report is the only current NI 43-101 compliant technical report with respect to the Brucejack Project and supersedes all previous technical reports. Reference should be made to the full text of the 2019 Report, which has been filed with certain Canadian securities regulatory authorities pursuant to NI 43-101. The 2019 Report is available for review under the Company's profiles on SEDAR at www.sedar.com and EDGAR at the SEC's website at www.sec.gov. Scientific and technical information in this Presentation not contained in the 2019 Report has been reviewed, approved and verified by Kenneth C. McNaughton, M.A.Sc., P.Eng., our Vice President and Chief Exploration Officer, Lyle Morgenthaler, B.A.Sc., P.Eng., our Chief Mine Engineer, Warwick Board, Ph.D., P.Geo, Pr.Sci.Nat., our Vice President, Geology and Chief Geologist, and Nicolas Scarcelli-Casciola, B.A.Sc., P.Eng., our Mine Planning Manager, each of whom is a "Qualified Person" as defined in NI 43-101.

Mineral resources which are not mineral reserves do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, taxation, socio-economic, marketing, political or other relevant issues. There is no guarantee that all or any part of the mineral resource will be converted into mineral reserves.

Technical disclosure set out in this Presentation has not been prepared in accordance with the requirements of United States securities laws and uses terms that comply with reporting standards in Canada with certain estimates prepared in accordance with NI 43-101. NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Unless otherwise indicated, all Mineral Reserve and Mineral Resource estimates contained in this Presentation have been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum Classification System. Canadian standards, including NI 43-101, differ significantly from the requirements of the SEC under its Industry Guide 7 ("Guide 7"), and Mineral Reserve and Resource information contained in this Presentation may not be comparable to similar information disclosed by United States companies reporting pursuant to Guide 7. In particular, and without limiting the generality of the foregoing, the term "resource" does not equate to the term "reserves". Under Guide 7, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made and volumes that are not "reserves" should not be disclosed. Among other things, all necessary permits would be required to be in hand or issuance imminent in order to classify mineralized material as reserves under Guide 7. Accordingly, Mineral Reserves estimates included in this Presentation may not qualify as "reserves" under Guide 7. Guide 7's current disclosure standards normally do not permit the inclusion of information concerning "Measured Mineral Resources", "Indicated Mineral Resources" or "Inferred Mineral Resources" or other descriptions of the amount of mineralization in mineral deposits that do not constitute "reserves" by Guide 7 standards in documents filed with the SEC. United States investors should also understand that "Inferred Mineral Resources" have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of "Mineral Resources", "Indicated Mineral Resources" or "Inferred Mineral Resource" will ever be upgraded to a higher category. Under Canadian rules, estimated "Inferred Mineral Resources" may not form the basis of feasibility or pre-feasibility studies except in rare cases. Investors are cautioned not to assume that all or any part of the "Mineral Resources", "Measured Mineral Resources", "Indicated Mineral Resources" or "Inferred Mineral Resource" reported in this Presentation exists or is economically or legally mineable. Disclosure of "contained ounces" in a resource is permitted disclosure under Canadian regulations; however, Guide 7 normally only permits issuers to report mineralization that does not constitute "reserves" by Guide 7 standards as in-place tonnage and grade without reference to unit measures. Investors are specifically cautioned not to assume that all or any part of the mineral deposits in these categories will ever be converted into Guide 7-defined mineral reserves. In addition, the definitions of "Proven Mineral Reserves" and "Probable Mineral Reserves" under reporting standards in Canada differ in certain respects from the standards of Guide 7. Accordingly, information concerning mineral deposits set forth or incorporated by reference herein may not be comparable with information made public by companies that report in accordance with Guide 7.

Non-IFRS Financial Performance Measures

This Presentation includes certain non-IFRS measures. The Company believes that these measures, in addition to measures prepared in accordance with International Financial Reporting Standards ("IFRS"), provide readers an improved ability to evaluate the underlying performance of the Company and to compare it to information reported by other companies. Management uses these measures for internal valuation for the period and to assist with planning and forecasting of future operations. The non-IFRS measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These measures do not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures presented by other issuers. Refer to the Company's latest MD&A for further details, including an explanation, discussion and reconciliation of non-IFRS measures.

Currency

Unless otherwise indicated, all dollar values herein are in United States dollars.

Brucejack Mine

Another Profitable Quarter

Q2 2019 Summary

90,761 ounces gold produced

\$113.2 million in revenue

\$940 per ounce sold AISC¹

\$17.0 million adjusted earnings¹

\$0.09/share adjusted earnings¹

\$41.2 million cash generated

Reduced debt by \$44.7 million

\$415.3 million in debt outstanding

Mill throughput and mine production scheduled to reach 3,800 tpd late Q4

- Mill Upgrades:
 - Bulk loading system operating as fully integrated component of concentrate process
 - Pumping & piping (Q3 2019)

- Underground Development:
 - Reached rate of 993 m/month in June 2019
 - Expected to continue at ~1,000 m/month for remainder of 2019 to achieve 3,800 tpd

Brucejack H1 2019 Production and 2019 Guidance

	Q2 2019	H1 2019	2019 Guidance
Gold Production	90,761	169,941	390,000 - 420,000 oz
Mill Throughput Rate	3,562 tpd	3,422 tpd	3,500 tpd
Average Head Grade	8.9 g/t	8.8 g/t	10.4 g/t
AISC/oz sold ¹	\$940/oz	\$905/oz	\$775 - \$875 /oz

- All stopes above 5.0 g/t are being mined
- 2019 gold grade not representative of LOM grade
- On track to achieve 2019 annual guidance

Sustaining Capital Expenditures

	H1 2019	2019 Guidance
Gold Ounces Sold	167,387 oz	390,000 – 420,000 oz
Sustaining Capital Expenditures	\$11.6 M	\$27 – 30 M
Total AISC ¹	\$151.5 M	\$325 – 341 M
Per Ounce Sold ¹	\$905/oz	\$775 – 875/oz
