

CES UPDATE: Avnet Introduces Path to Prototype Maker Roadmap

Terms:

Building on its extensive portfolio of product and service support resources for OEM designers, makers and hobbyists alike, Avnet introduced the [Path to Prototype](#) [1] guide this week at CES.

Laid out as a board game, Path to Prototype comes with a series of cards that show the steps needed to complete “the game” of taking a hardware product from idea to prototype and successfully bring it to market. Cards may provide helpful definitions, fun facts and, of course, expert guidance derived from Avnet’s ecosystem of product and service provides supporting products along the entire lifecycle.

Avnet’s connected ecosystem, including [Avnet.com](#) [2], [Hackster.io](#) [3], [element14](#) [4] and [Hardware Studio](#) [5], supports more than two million customers driving IoT innovation around the world with access to a range of resources, such as design services, parts for prototyping, contract manufacturers, or consultation on IP protection, marketing, supply chain and financing.
