

element14 Releases Digital Yearbook to Commemorate 500,000th Member Registration

Terms:

In 2009, [element14](#) [1] debuted an online platform for makers and engineers from all over the world to discuss the latest technical developments, collaborate on design projects and RoadTest exclusive new releases from leading global brands. This month, the element14 Community is celebrating its milestone 500,000th member, making the community the largest and most diverse maker space in the industry.

To commemorate this achievement, element14 has produced a Member Yearbook featuring a selection of favorite projects from the past twelve months, as well as contributions from the Community's top members sharing their stories and revealing what the element14 Community has meant to them.

Click [here](#) [2] to download the Yearbook and other eBooks available from Element14, including Essential Tips for Makers Series 1 and Essential Design Tips for Engineers Series 1 and 2. For more maker resources available from Avnet, visit [Makersource.io](#) [3] and [Hackster.io](#) [4].
