

Hackster.io Adds New Dimension to Maker Support with Extensive Video Catalog

Terms:

As part of the vision to be the most resourceful website for hardware developers, Hackster.io has launched a new video portfolio featuring live builds, product spotlights and interviews with a range of maker movement influencers.

The live build videos will allow viewers to follow along in real time as developers innovate new creations. Through the product spotlight videos, viewers will get a first look at recently launched gizmos and gadgets from leading IoT companies, as well as an insider's view as Hackster unboxes the latest open source hardware. And finally, building on the success of the ongoing [Women in Hardware series](#) with Adafruit, Hackster will give viewers the opportunity to hear from some of the biggest names in the maker movement, including industry pioneers, startup founders and senior-level executives.
