

ENVIRONMENTAL POLICY

At SIERRA METALS, we envision ourselves as a leading company when it comes to minimizing impacts on the environment and the active prevention of environmental pollution in underground polymetallic mining.

That's why at SIERRA METALS, we are committed to:

- Ensuring compliance with the legislation in the countries in which we operate, and also complying with the commitments made by our organization.
- Ensuring that potential environmental impacts caused by our activities are identified ahead of time, and that control measures are implemented to eliminate or minimize these impacts.
- Ensuring the development, implementation and maintenance of an Environmental Management System that makes it possible to manage environmental aspects and impacts in all our operations, throughout their entire life span. The organization will provide the necessary resources and leadership in order to make this possible.
- Putting in the necessary effort to implement the best possible industry practices, when technologically possible and economically viable, including the use of clean energy.
- Establishing environmental performance objectives and goals in our operations, as well as measuring their performance, framing them within a process of continuous improvement.
- Encouraging responsible and efficient water use in our operations.
- Promoting a culture of environmental responsibility among our employees and contractors, as well as with our stakeholders, when it is feasible to do so.
- Ensuring that our employees and contractors clearly understand their responsibility to maintain proper environmental management in their activities.
- Communicating this policy to all our employees and contractors, as well as stakeholders upon request.

This policy is applicable to all employees of Sierra Metals and its subsidiaries, as well as companies that are contracted for Sierra Metals activities.

Luis Marchese
CEO Sierra Metals
