**INVESTOR PRESENTATION**  
JANUARY 2026

# Cautionary Information

This presentation contains forward-looking information within the meaning of applicable Canadian and United States securities legislation. All information contained in this presentation, other than statements of current and historical fact, is forward-looking information. Often, but not always, forward-looking information can be identified by the use of words such as "plans", "expects", "budget", "guidance", "scheduled", "estimates", "forecasts", "strategy", "target", "intends", "objective", "goal", "understands", "anticipates" and "believes" (and variations of these or similar words) and statements that certain actions, events or results "may", "could", "would", "should", "might" "occur" or "be achieved" or "will be taken" (and variations of these or similar expressions). Forward-looking information includes, but is not limited to, expectations regarding the fourth quarter and full year 2025 results, expectations regarding future production and production guidance and the Company's expectations for the SAG mill ramp-up at Copper Mountain, Hudbay's expectations for the Copper World project, including its project sanctioning timelines, future spending, project economics, future production profile and life of mine plan, and the benefits, timing, the consummation and timing of the DFS, and consummation of the amended Wheaton Stream. All of the forward-looking information in this presentation is qualified by this cautionary note. Forward-looking information is not, and cannot be, a guarantee of future results or events. Forward-looking information is based on, among other things, opinions, assumptions, estimates and analyses that, while considered reasonable by the company at the date the forward-looking information is provided, inherently are subject to significant risks, uncertainties, contingencies and other factors that may cause actual results and events to be materially different from those expressed or implied by the forward-looking information. The risks, uncertainties, contingencies and other factors that may cause actual results to differ materially from those expressed or implied by the forward-looking information include, but are not limited to, risks associated with reaching a definitive agreement with Wheaton in respect of the enhanced precious metals stream as well as those risks that are described under the heading "Risk Factors" in our most recent annual information form for the year ended December 31, 2024 and our management's discussion and analysis for the three and nine months ended September 30, 2025. Should one or more risk, uncertainty, contingency or other factor materialize or should any factor or assumption prove incorrect, actual results could vary materially from those expressed or implied in the forward-looking information. Accordingly, you should not place undue reliance on forward-looking information. Hudbay does not assume any obligation to update or revise any forward-looking information after the date of this presentation or to explain any material difference between subsequent actual events and any forward-looking information, except as required by applicable law.

This presentation contains certain financial measures which are not recognized under IFRS, such as adjusted net earnings (loss), adjusted net earnings (loss) per share, adjusted EBITDA, net debt, free cash flow, cash cost, sustaining and all-in sustaining cash cost per pound of copper produced, cash cost and sustaining cash cost per ounce of gold produced, combined unit operating costs and any ratios based on these measures. For a detailed description of each of the non-GAAP financial performance measures used in this presentation, please refer to Hudbay's management's discussion and analysis for the three and nine months ended September 30, 2025 available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca) and EDGAR at [www.sec.gov](http://www.sec.gov).

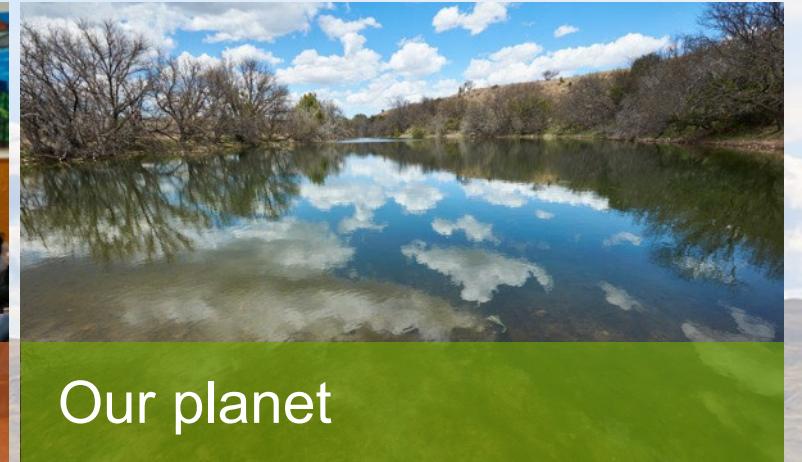

## Disclaimer Regarding Preliminary Financial Information

This presentation contains preliminary financial information and production results (the "Preliminary Information") for the three months and year ended December 31, 2025, and the Preliminary Information included herein is based only upon the information available to the Company as of the date of this presentation. The Preliminary Information contained herein is not a comprehensive summary of our financial results for the applicable periods. The Company's actual financial and production results may differ from the Preliminary Information contained herein, due to several factors, including but not limited to the completion of operational and financial closing procedures and final audit adjustments. The Company's external auditor has not audited or reviewed the Preliminary Information included in this presentation.

All amounts in this presentation are in U.S. dollars unless otherwise noted.

# Our Purpose

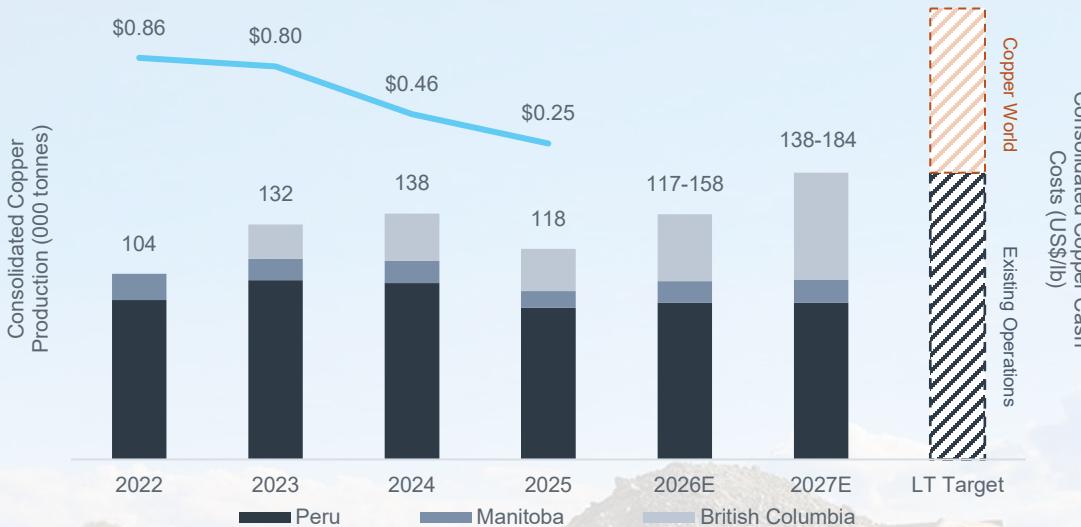

## We **care** about

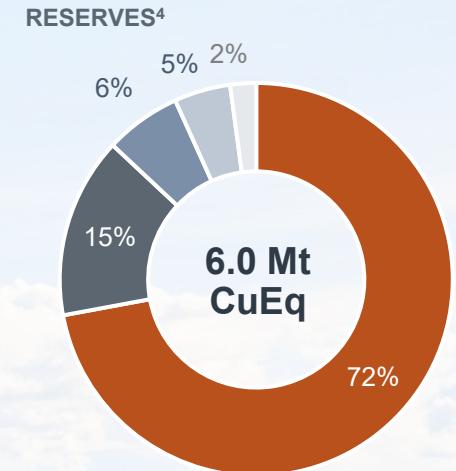

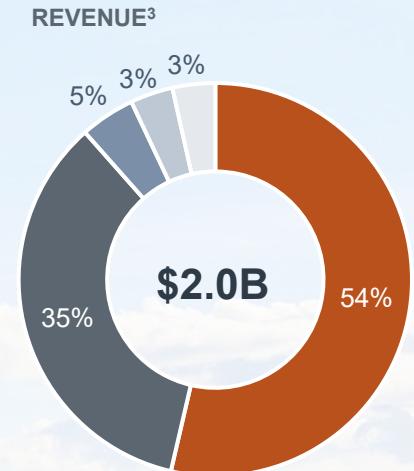

Hudbay provides the metals the world needs.  
We work sustainably, transform lives and create  
better futures for communities.

# Diversified Mid-Tier Copper Producer

## ANNUAL COPPER PRODUCTION & CASH COSTS<sup>1,2</sup>

## REVENUE AND RESERVES BY METAL

**Stable copper production** with three operations in tier-1 mining jurisdictions generating significant free cash flow with industry-leading margins.

**Industry-leading growth optionality** from strong organic pipeline of copper development assets and highly prospective exploration.

**Strongest balance sheet with unique gold exposure offering portfolio resilience.**

**Committed to sustainability** by living our values and achieving our social and environmental goals.

1. Hudbay's copper production shown for 2025 based on preliminary fourth quarter and full year production results for the period ended December 31, 2025 based on news release dated January 16, 2025. See "Disclaimer Regarding Preliminary Financial Information". 2026 and 2027 based on the midpoint guidance range from news release dated March 27, 2025. Copper production beyond 2027 based on disclosed mine plans in most recent NI 43-101 Technical Reports for Constancia, Lalar and Copper Mountain as well as Copper World PFS.
2. Hudbay's consolidated cash costs, net of by-product credits, guidance range shown for 2025 based on the improved guidance range announced in the November 12, 2025 news release.
3. 2024 revenue as of December 31, 2024, further details available in the February 19, 2025 news release.
4. Total copper equivalent in situ reserves as per the news release dated March 27, 2025, calculated using select commodity pricing (\$4.25/lb Cu, \$2,200/oz Au, \$25.00/oz Ag, \$1.25/lb Zn, and \$15.00/lb Mo).

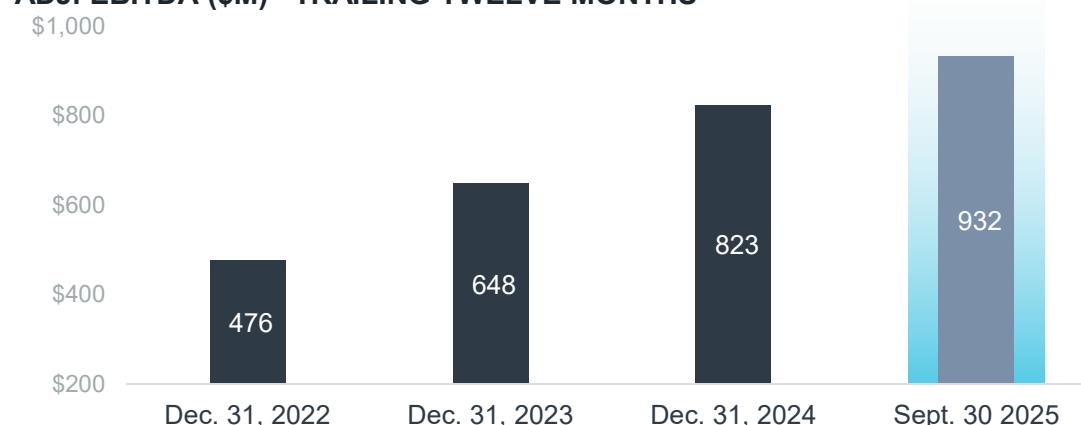

# Operating Resilience and Continued Industry-Leading Margins

## ON TRACK TO ACHIEVE LOW END OF CONSOLIDATED COPPER & GOLD PRODUCTION GUIDANCE DESPITE Q3 INTERRUPTIONS

\$143M	\$0.03	24kt	\$0.42/lb
Q3 2025	Q3 2025	Q3 2025 Cu	Q3 2025
Adj. EBITDA <sup>1</sup>	Adj. EPS <sup>1,2</sup>	Production	Cash Cost <sup>1</sup>

- Achieved full year 2025 consolidated production guidance for copper and gold – 11<sup>th</sup> consecutive year of achieving copper guidance and 5<sup>th</sup> consecutive year achieving gold guidance<sup>3</sup>.
- 2025 production impacted by 2-months mandatory wildfire evacuations in Manitoba, processing stockpile ore and lower Q4 throughput levels in BC, and mine plan adjustments due to social unrest in Peru.
- Further improved full year 2025 consolidated cost guidance to \$0.15-\$0.35/lb from \$0.65-\$0.85/lb and original range of \$0.80-\$1.00/lb.
- 2025 capital expenditures expected to be \$35M lower than guidance.

### ADJ. EBITDA (\$M) - TRAILING TWELVE MONTHS<sup>1</sup>

### KEY RESULTS SUMMARY

1. Metal reported in concentrate is prior to deductions associated with smelter contract terms and includes other secondary products.
2. Cash cost, sustaining cash cost and all-in sustaining cash cost per pound of copper produced, net of by-product credits, gold cash cost, sustaining cash cost per ounce of gold produced, net of by-product credits, are non-GAAP financial performance measures with no standardized definition under IFRS. For further information, please see the "Non-GAAP Financial Performance Measures" section of the latest quarterly MD&A or news release.
3. Adjusted earnings per share - attributable to owners and adjusted EBITDA are non-GAAP financial performance measures with no standardized definition under IFRS. For further information and a detailed reconciliation, please see discussion under the "Non-GAAP Financial Performance Measures" section of the latest quarterly MD&A or news release.
4. Operating cash flow before changes in non-cash working capital.
5. Cash and cash equivalents includes short-term investments.
6. Net debt and net debt to adjusted trailing twelve month EBITDA are non-GAAP financial performance measures with no standardized definition under IFRS. For further information, please see the "Non-GAAP Financial Performance Measures" section of the latest quarterly MD&A or news release.

1. Non-GAAP financial performance measure with no standardized definition under IFRS. For further information and a detailed reconciliation, please see discussion under the "Non-GAAP Financial Performance Measures" section of the latest quarterly MD&A or news release.

2. Adjusted earnings per share attributable to owners.

3. As disclosed in the news release dated January 16, 2026. In 2020, Hudbay's consolidated copper production guidance range was revised during the year due to the impact of COVID-19 at the operations. Hudbay's copper production for the year was within the revised guidance range. Prior to 2021, Hudbay provided guidance on a precious metals equivalent instead of gold as a standalone metal.

# Attractive Copper Positioning

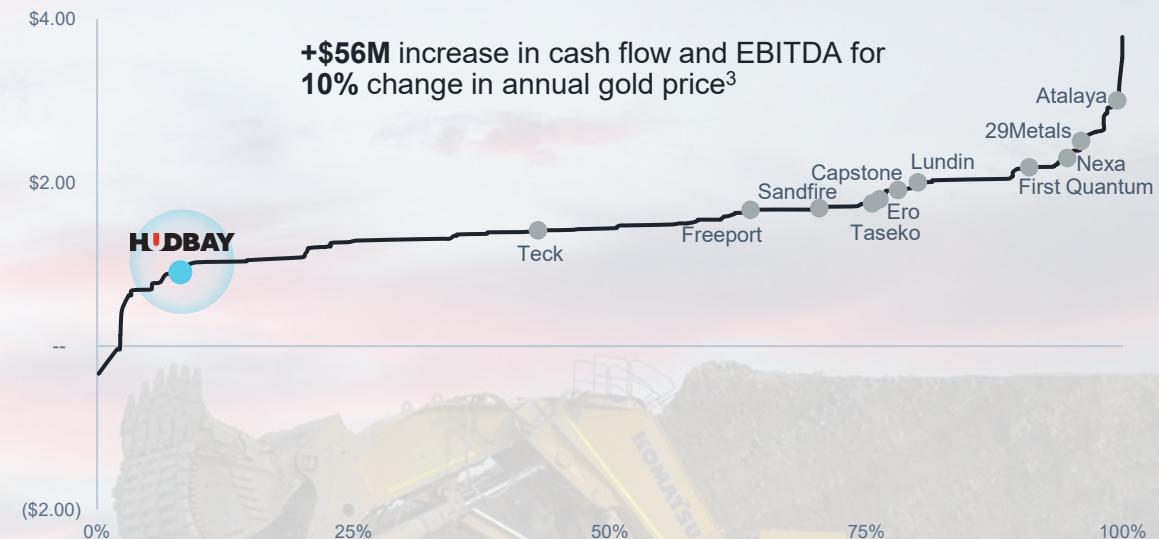

## SIGNIFICANT COPPER PRODUCTION AT FIRST QUARTILE CASH COSTS

### MEANINGFUL COPPER PRODUCTION

### LEADING LOW-COST PROFILE

#### 2025E COPPER C1 CASH COSTS<sup>2</sup>

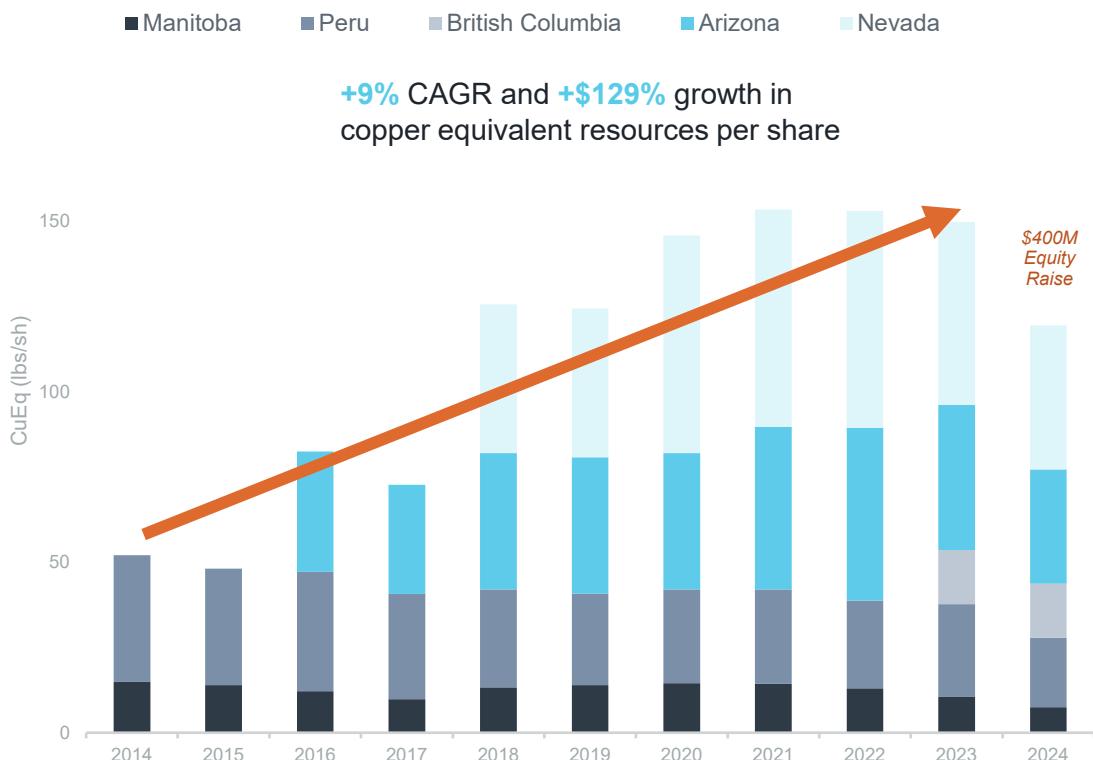

Well-positioned versus peers with meaningful copper production and complementary gold exposure.  
Leading cash cost position expected to deliver significant near-term free cash flow.

1. 2025 Copper production estimate based on Factset consensus as of January 14 2026. Hudbay's copper production shown for 2025 based on preliminary fourth quarter and full year production results for the period ended December 31, 2025 based on news release dated January 16, 2025. See "Disclaimer Regarding Preliminary Financial Information".
2. Wood Mackenzie's 2025 by-product C1 copper cash cost curve (Q4 2024 dataset dated February 2025), compared to Hudbay 2025 midpoint guidance range based on news release dated February 19, 2025. Wood Mackenzie's costing methodology may be different than reported by Hudbay or its peers in their public disclosure. For further details regarding Hudbay's actual cash costs and price sensitivity, refer to Hudbay's most recent MD&A.
3. Represents the increase in 2025 expected operating cash flow before change in non-cash working capital assuming a 10% change in a base of \$4.10 per pound copper, \$2,500 per ounce gold and 1.35 CAD/USD foreign exchange rate and the mid-point of annual guidance ranges. For more information, please refer to the Outlook section of the Management's Discussion and Analysis for the three and twelve months ended December 31, 2024.

# Hudbay Leading Copper Exposure

## SUSTAINED GROWTH IN COPPER RESOURCES PER SHARE DRIVES INDUSTRY LEADING COPPER PRICE OPTIONALITY

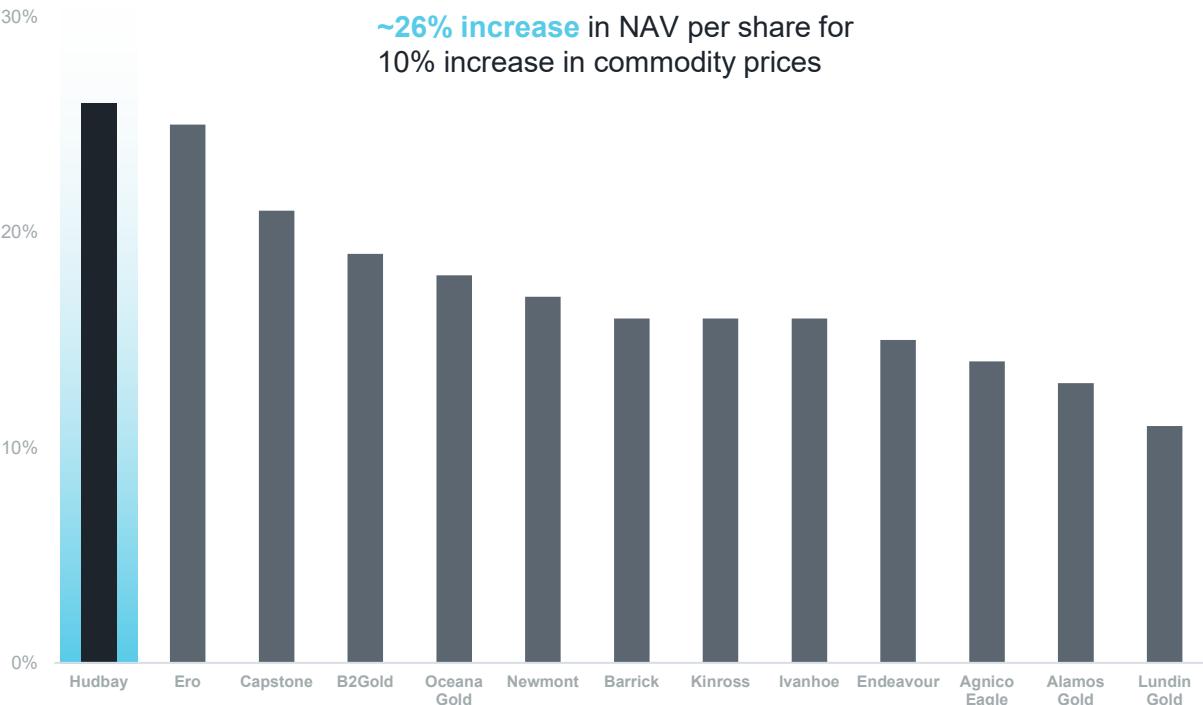

### SIGNIFICANT GROWTH IN COPPER RESOURCES PER SHARE<sup>1</sup>

### HIGHEST COPPER & GOLD NAV SENSITIVITY VERSUS PEERS<sup>2</sup>

NAV SENSITIVITY TO 10% CHANGE IN COMMODITY PRICES

~26% increase in NAV per share for 10% increase in commodity prices

INVESTOR PRESENTATION / JANUARY 2026

1. Resources per share as of the end of each period, including inferred at operating assets, excludes depletion and the impact of precious metal streams. 10-Year CAGR and growth rate for 2014-2024. The following metals price assumptions were applied to current reserves for purposes of calculating copper equivalent:\$4.25/lb Cu, \$1.25/lb Zn, \$2,200/oz Au, \$25.00/oz Ag and \$15.00/lb Mo.

2. Jefferies Equity Research, as of January 9, 2026. NAV sensitivity to 10% increase in commodity price and peer group are calculated and defined by Jefferies. Based on spot prices include \$4,463/oz gold, \$78.18/oz silver and \$5.96/lb copper as of January 8, 2026.

# Hudbay Investment Thesis

## STABLE COPPER PRODUCTION

with three operations in tier-1 mining jurisdictions generating significant free cash flow with industry-leading margins

## STRONG BALANCE SHEET WITH UNIQUE GOLD

exposure offering portfolio resilience

## COMMITTED TO SUSTAINABILITY

by living our values and achieving our social and environmental goals

## INDUSTRY-LEADING GROWTH OPTIONALITY

from organic pipeline of copper development assets and highly prospective exploration

Produced

**138kt Cu** generating

**+\$350M** in free cash flow at industry-low cash costs in 2024

Achieved

**0.5x**

Net Debt / EBITDA in Q3 2025

Maintained

**"A"**

rating or higher on all TSM protocols in 2024

**+50%**

expected increase in copper production with Copper World, and further upside through exploration for new anchor deposits in Peru and Manitoba

Snow Lake was the **highest margin** gold mine in Canada in 2024

# PERU

## LONG LIFE, LOW COST COPPER MINE WITH SIGNIFICANT EXPLORATION POTENTIAL

TSX & NYSE: **HBM**

**HUDBAY**

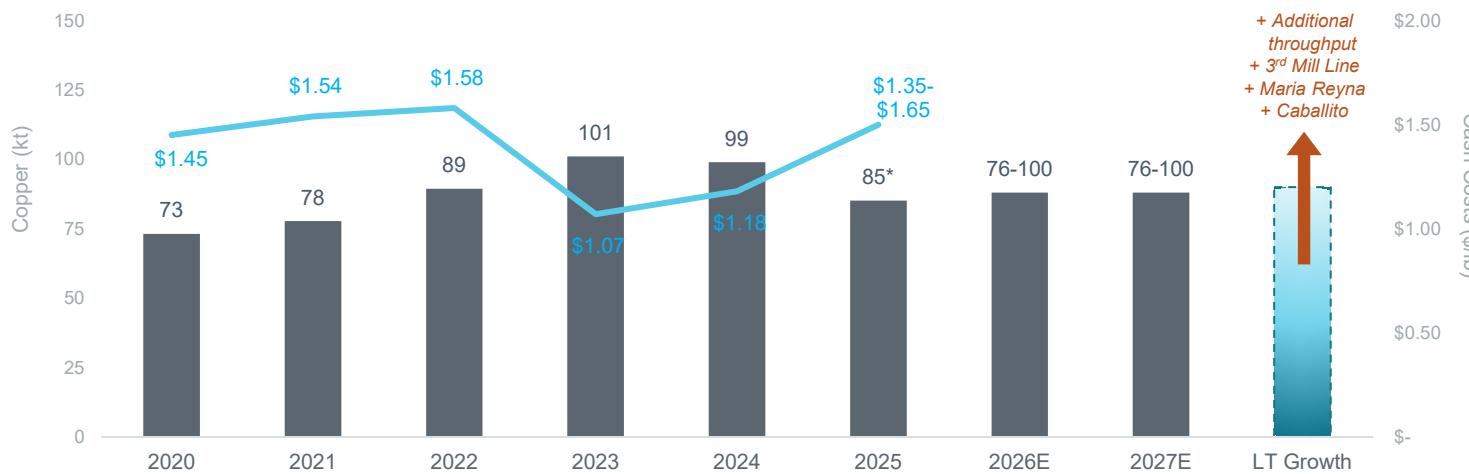

# Constancia

## LONG LIFE, LOW-COST COPPER MINE IN PERU

- 100%-owned, low cost, long life copper mine that has been in production since 2014. Constancia is one of the lowest cost open pit copper mine in South America<sup>2</sup>.
- After acquiring the greenfield project in 2011, Hudbay completed best in class permitting, construction, commissioning and ramp up within three years.
- Developed constructive partnerships with local communities.
- Advancing opportunities to further enhance mill throughput starting in 2026.
- Potential to add long-term value through nearby satellite exploration deposits.

### CONSTANCIA COPPER PRODUCTION PROFILE<sup>1</sup>

\* Production for 2025 based on preliminary fourth quarter production results as disclosed in news release dated January 16, 2025. Peru full year copper production impacted due to mine plan adjustments following social unrest in the region, causing reduced stripping activity and additional stockpile ore utilized as mill feed in the third quarter.

### KEY HIGHLIGHTS

**\$1.35- \$1.65/lb**

**2025 Cash Cost Guidance<sup>1</sup>**

1. Copper production for 2025 based on preliminary fourth quarter production results as disclosed in news release dated January 16, 2025, cash cost guidance range shown for 2025 based on news release dated February 19, 2025, and 2026 and 2027 copper production guidance range based on news release dated March 27, 2025.

2. Based on total mine site costs including mining, processing and general and administrative costs on a per tonne basis. Sourced from Wood Mackenzie and includes primary copper, open pit sulphide mines in South America. Wood Mackenzie's costing methodology may be different than the methodology reported by Hudbay or its peers in their public disclosure.

TSX & NYSE: **HBM**

**HUDBAY**

# Constancia Operational Excellence

CONTINUOUS OPERATIONAL IMPROVEMENTS AT CONSTANCIA HAVE INCREASED THROUGHPUT, ENHANCED EFFICIENCIES AND REDUCED COSTS

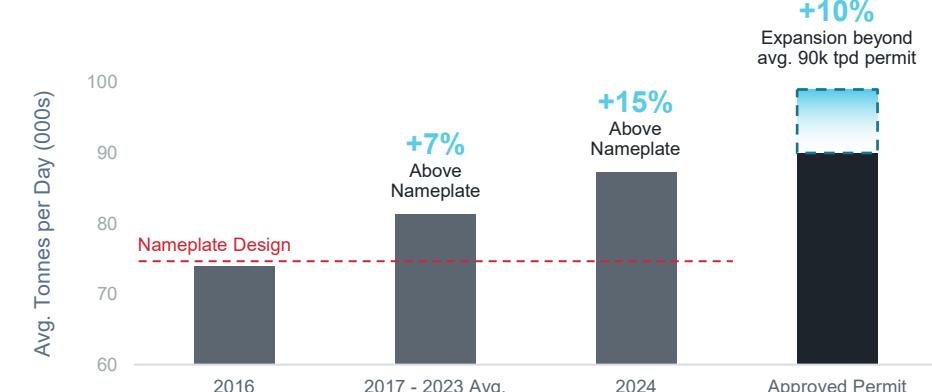

## Throughput Expansion

- Mill consistently operates above design capacity with strong culture of continuous improvement.
- Constancia currently operating at average of 87,000 tpd in 2024, **exceeding its design capacity** of 76,000 tpd.
- Evaluating opportunities to further increase throughput by up to 10%.

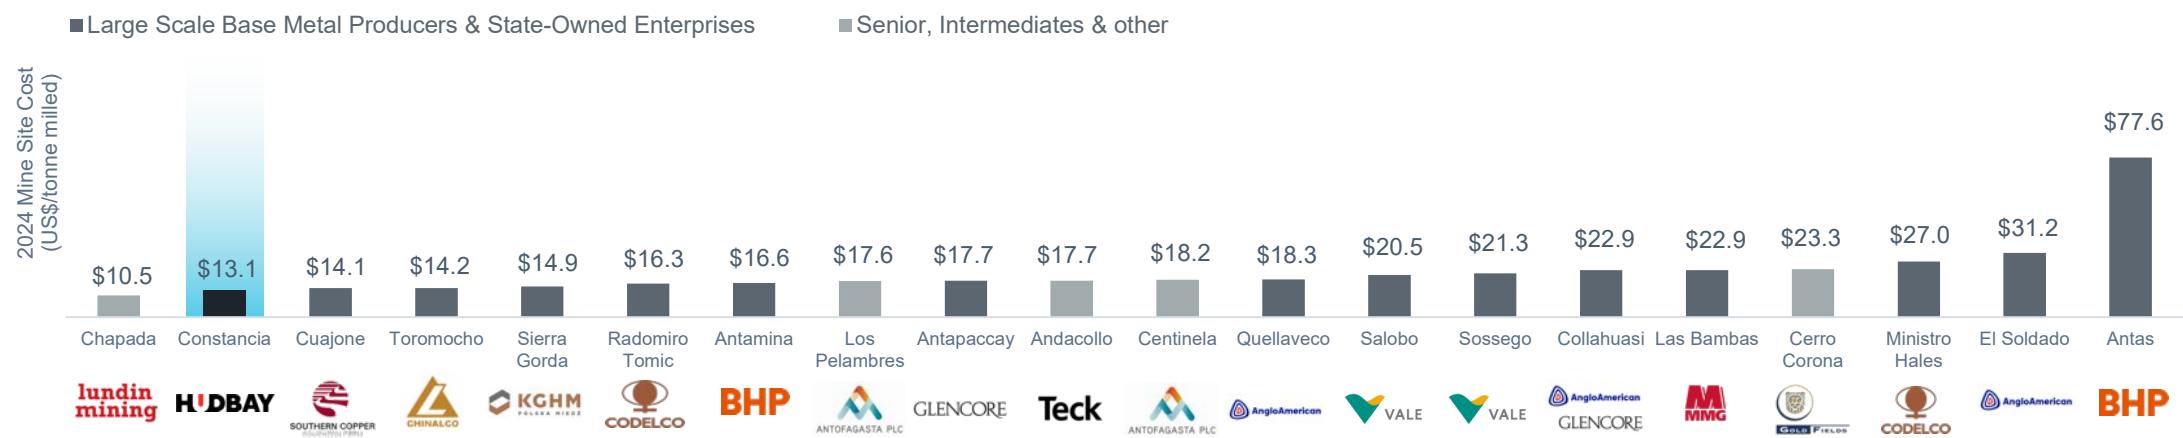

## Cost Efficiency

- Steady low unit operating costs have positioned Constancia as one of the lowest cost open pit copper mine in South America.

## CONSTANCIA THROUGHPUT<sup>1</sup>

## LOW-COST SOUTH AMERICA OPEN PIT COPPER MINE<sup>2</sup>

1. 2017 – 2023 Avg. refers to an average of the quarterly average daily throughput per tonnes. Nameplate capacity refers to the 76,000 tpd designed capacity when built and approved permit refers to the average of 90,000 tpd daily throughput within the annual permitted ore milled.

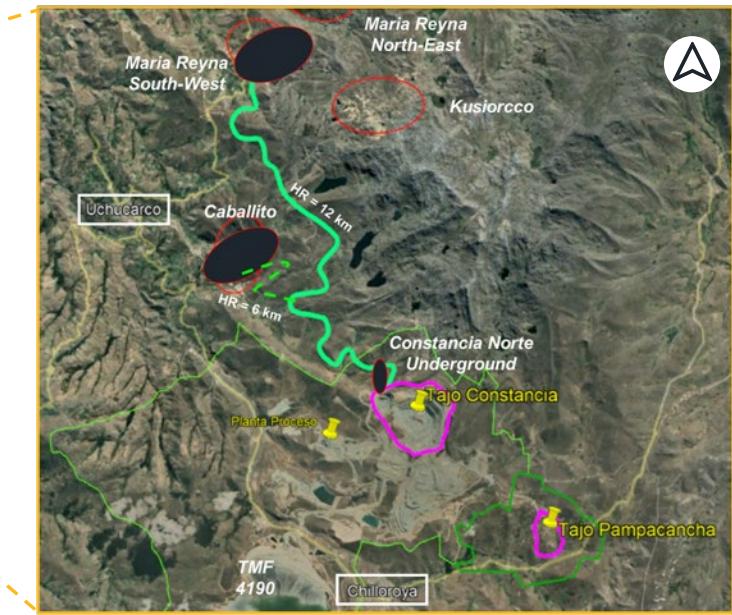

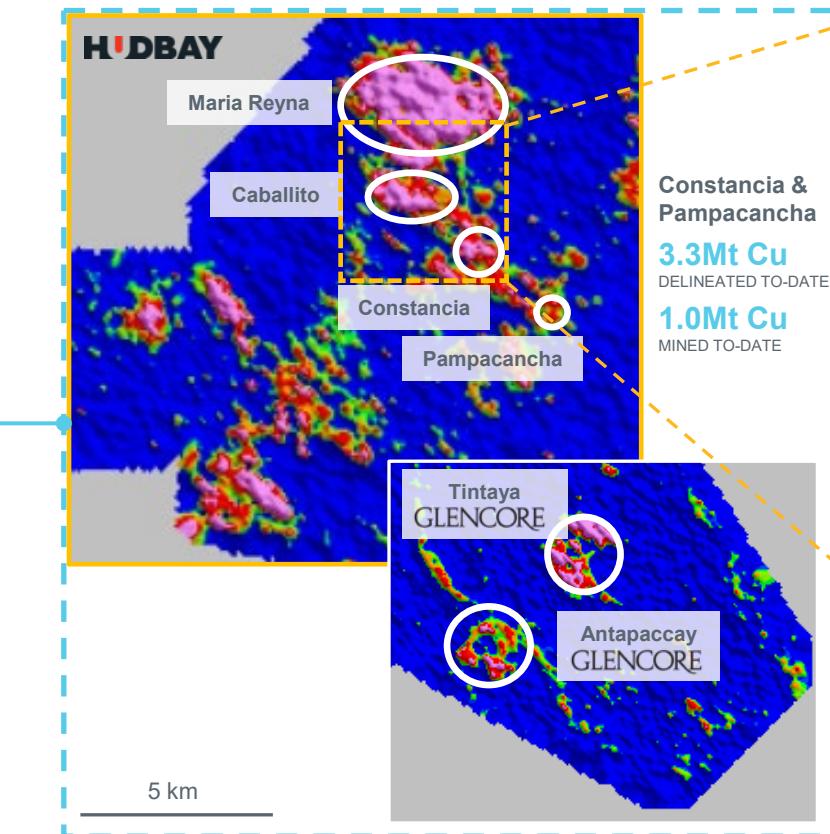

2. Wood Mackenzie Q4 2024 dataset. Includes primary copper, open pit sulphide mines in South America only. Operating costs include mining, processing and general and administrative expenditures on a per tonne basis. Wood Mackenzie's costing methodology may be different than the methodology reported by Hudbay or its peers in their public disclosure.

# CANADA

## NEARLY 100 YEARS OF DIVERSIFIED COPPER & GOLD OPERATIONS

TSX & NYSE: HBM

**HUDBAY**

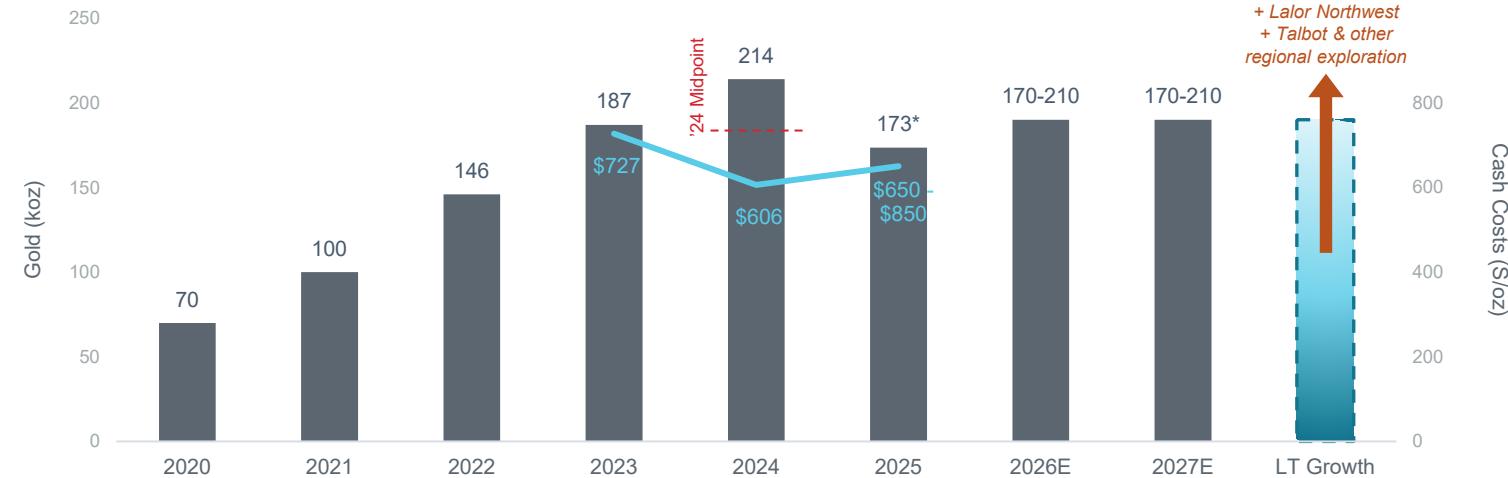

# Snow Lake

## LOW-COST GOLD OPERATION WITH MEANINGFUL BASE METAL PRODUCTION

- 100%-owned Lalor mine in Snow Lake produces gold ore for the newly refurbished New Britannia mill and base metal ore for the Stall concentrator.
- New Britannia mill commenced production in late 2021 resulting in increased annual gold production to over 180,000 ounces.
- Lalor is operating at 4,500 tpd, significantly exceeding the original design capacity of 3,300 tpd and has plans to further increase ore production.

- New Britannia operating at more than 2,000 tpd, significantly exceeding its original design capacity of 1,500 tpd.
- Nearby 1901 deposit is scheduled to commence in 2027, increasing the total mine production rate to 5,000 tpd in Snow Lake and providing additional base metal and gold production.
- Successful use of battery-electric vehicles (BEV) underground at Lalor, with intentions to expand future fleet.
- Potential for further mine life extension from satellite deposits.

### SNOW LAKE GOLD PRODUCTION PROFILE<sup>2</sup>

\* Production for 2025 based on preliminary fourth quarter production results as disclosed in news release dated January 16, 2025. Manitoba full year gold production impacted by 2-month wildfire evacuations in the summer and winter storm power outages in October.

**HUDBAY**

# Lalor Mine Life Extension

**1.7M OZ OF GOLD RESERVES & 1.3M OZ OF GOLD INFERRED RESOURCES WITH FURTHER EXTENSION POTENTIAL**

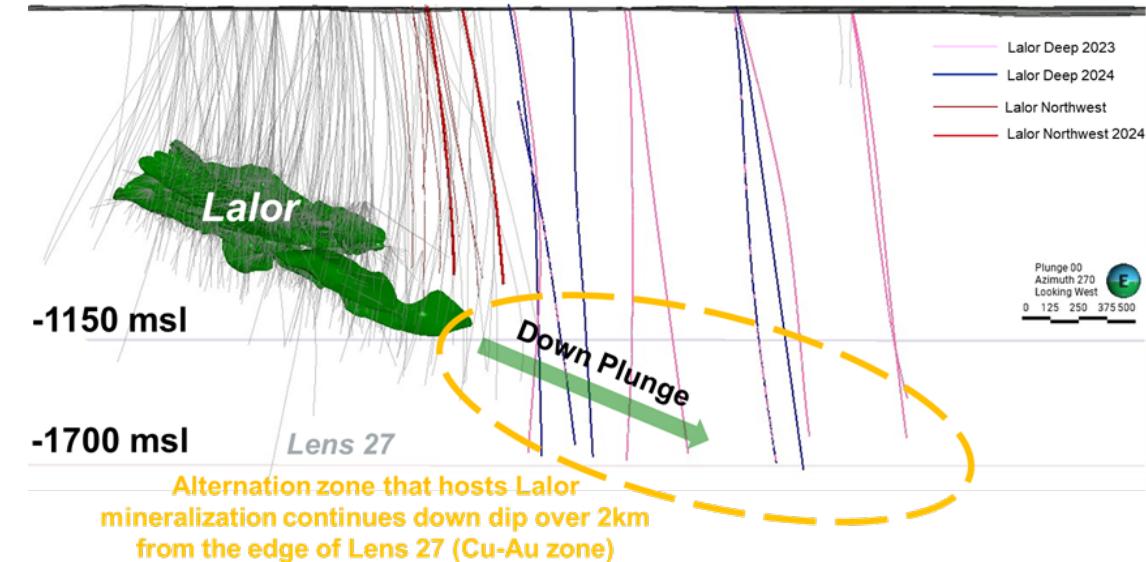

## LALOR MINE LIFE EXTENSION

INVESTOR PRESENTATION / JANUARY 2026

Stringent methodology constraining the resource within a stope optimization envelope is expected to lead to higher resource to reserve conversion.

## LALOR NEAR MINE

Continuing to test down plunge and north extensions at Lalor.

Intersected high-grade copper-gold-silver zone discovery within 500m northwest of existing underground infrastructure:

- 3.5m @ 3.81% Cu, 3.75 g/t Au, 104.5 g/t Ag

TSX & NYSE: HBM

**H**UDBAY

# New Britannia Mill Refurbishment Driving Higher Returns

## TIMELY STRATEGIC CAPITAL ALLOCATION AND STRONG OPERATIONAL EXECUTION TO MAXIMIZE RETURNS

- ✓ 2015: Acquired New Britannia for \$12M as potential gold processing solution for Lalor high grade gold ore
- ✓ 2020: Construction commenced for \$115M project; Sanctioned at \$1,500/oz Au prices and projected 19% IRR for 1,500tpd nameplate capacity
- ✓ 2020: Financed with \$115M gold prepay during COVID – forward sale of 25% of future gold production for 2 years (~4% of reserves)<sup>1</sup>
- ✓ 2021: Project completed on time, but over-budget
- ✓ 2024: Gold prepay fully repaid; Full exposure to prevailing gold prices with ~2M ounces of Au reserves and 1.3M ounces of Inferred; IRR improved to 36%<sup>2</sup>

### After 3 years of operations, investment is achieving even higher returns:

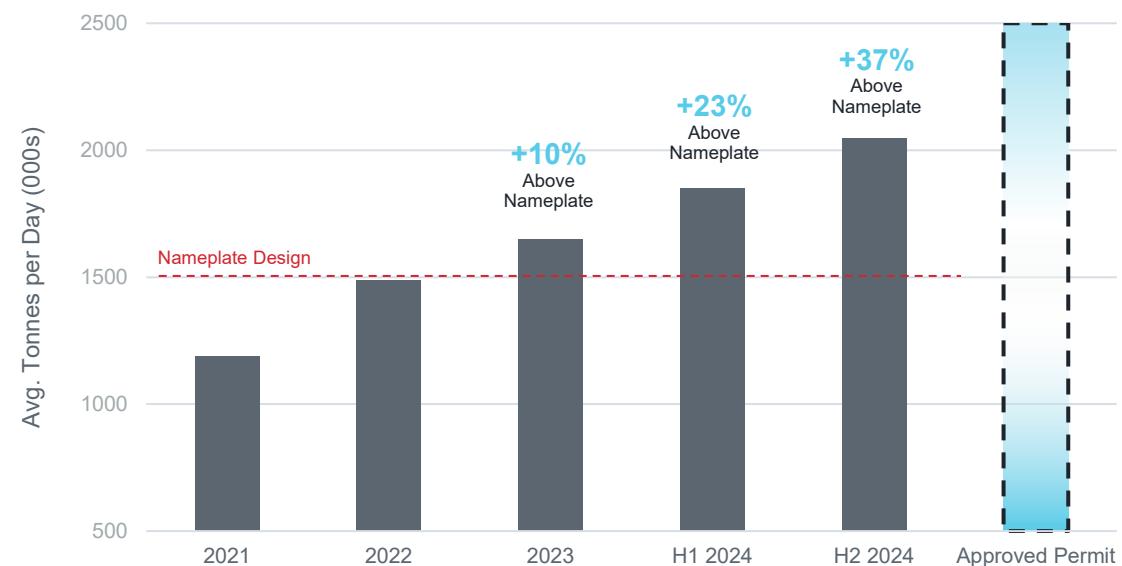

- New Britannia currently operating at more than 2,000 tpd, significantly exceeding its design capacity of 1,500 tpd
- Project payback was achieved after 2.5 years
- Recently received permit approval to increase production up to 2,500 tpd

With ~2 million ounces of gold in current mineral reserves and another 1.3 million ounces in inferred mineral resources, New Britannia will continue to unlock significant value

### RESULTS OF HIGH GROWTH INITIATIVE

90% Gold Recoveries	2.5 Year Project Payback Achieved	\$115M Financing Fully Repaid	+36% Internal Rate of Return (IRR) <sup>2</sup>
------------------------	--------------------------------------	----------------------------------	--

### NEW BRITANNIA THROUGHPUT<sup>1</sup>

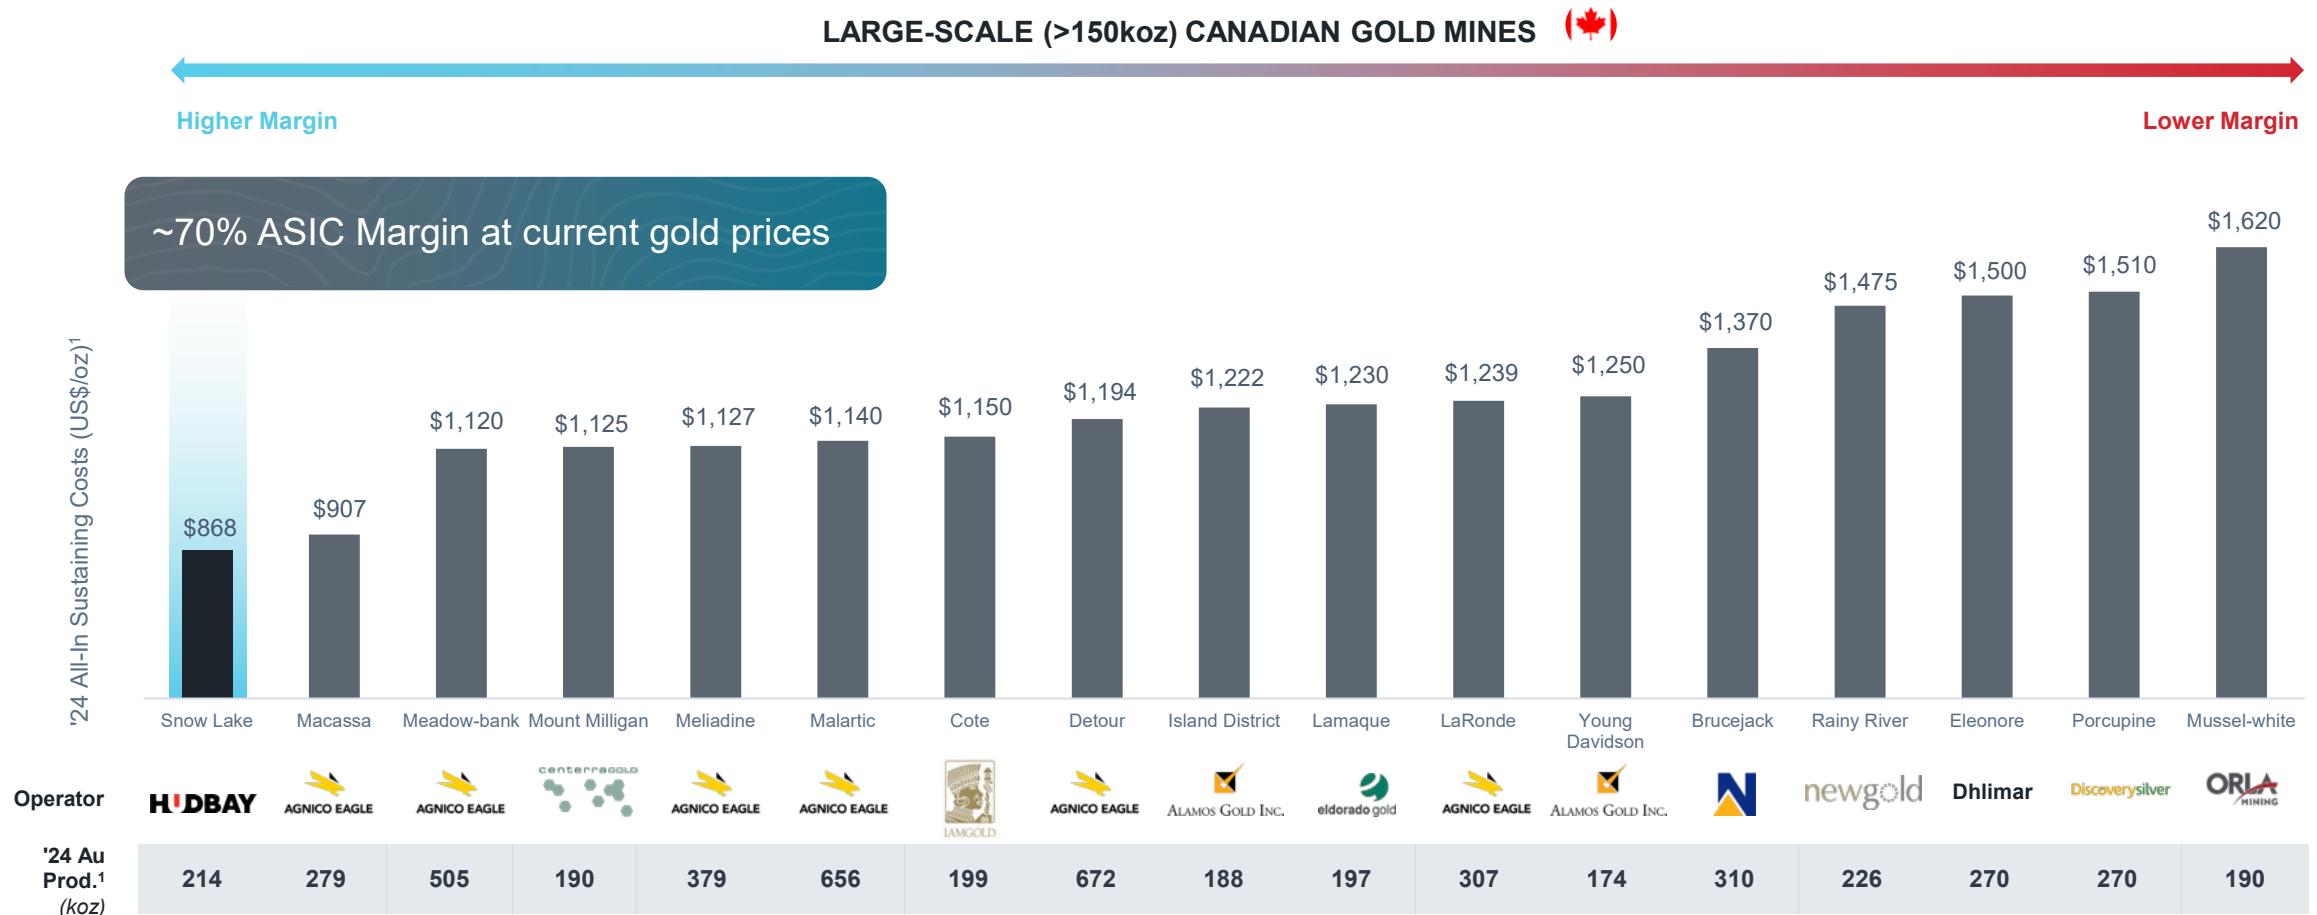

1. For information on New Britannia operating metrics including throughput and recoveries, please refer to the detailed results disclosed by Hudbay in the quarterly news release or MD&A for each reporting period.

2. Internal Rate of Return (unlevered) after adjusting for higher production rates, stronger gold prices and current capital and operating costs.

# Snow Lake Cost Performance

HIGHEST MARGIN CANADIAN GOLD MINE IN 2024

Source: Company public filings as of February 14, 2025.

Note: Includes Canadian gold mines which produced or are expecting to produce more than 150 koz of gold in 2024.

1. Based on calendar year 2024 consolidated gold production and all-in sustaining costs on a by-product basis; reflects actual results or the midpoint of guidance; all-in sustaining costs calculated as the sum of cash costs and sustaining capital costs divided by gold production where not explicitly provided in company public filings. Each company may calculate cash costs, sustaining cash costs and all-in sustaining cash costs differently.

**HUDBAY**

# Snow Lake Exploration Program

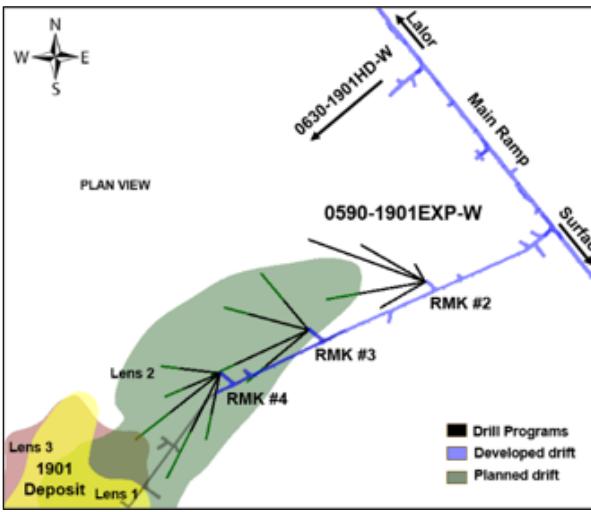

## 1. NEAR MINE – MINE LIFE EXTENSION

Testing mineralized extensions at Lalor and 1901 deposit to extend mine life & increase mineral reserves and resources.

### 1901 Access Drift and Step-out Drilling:

- Development reached first zinc ore in Q2 2025.
- Step out drilling confirmed Cu-Au mineralization extends down plunge & 2025 follow-up drilling underway.

#### 1901 Access Drift & Step-Out

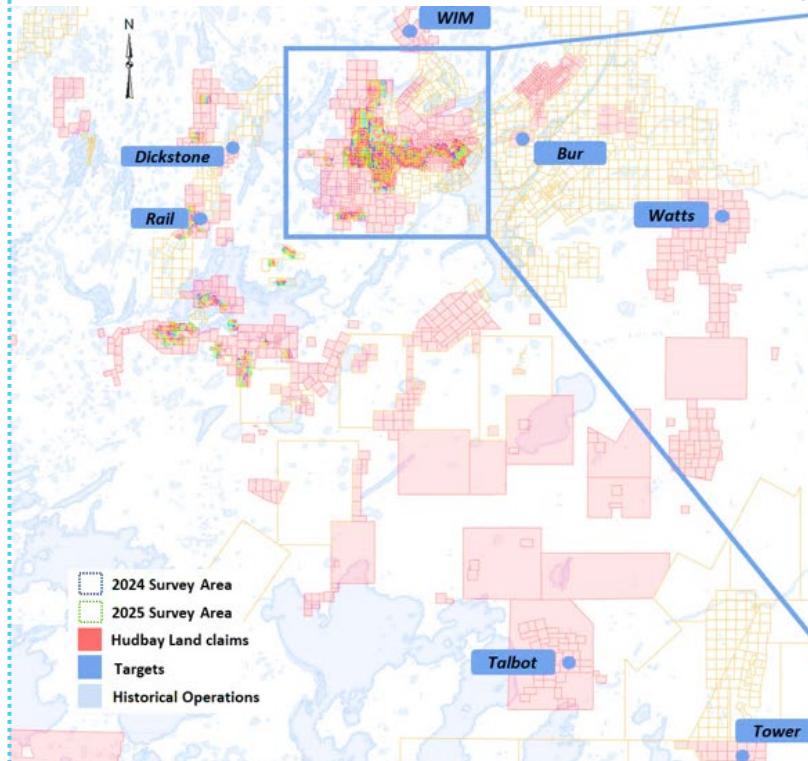

## 2. REGIONAL – PRODUCTION GROWTH

Exploration across Snow Lake region land package to test for satellite deposits to increase production utilizing available processing capacity at the Stall mill.

### Regional Satellite Deposits:

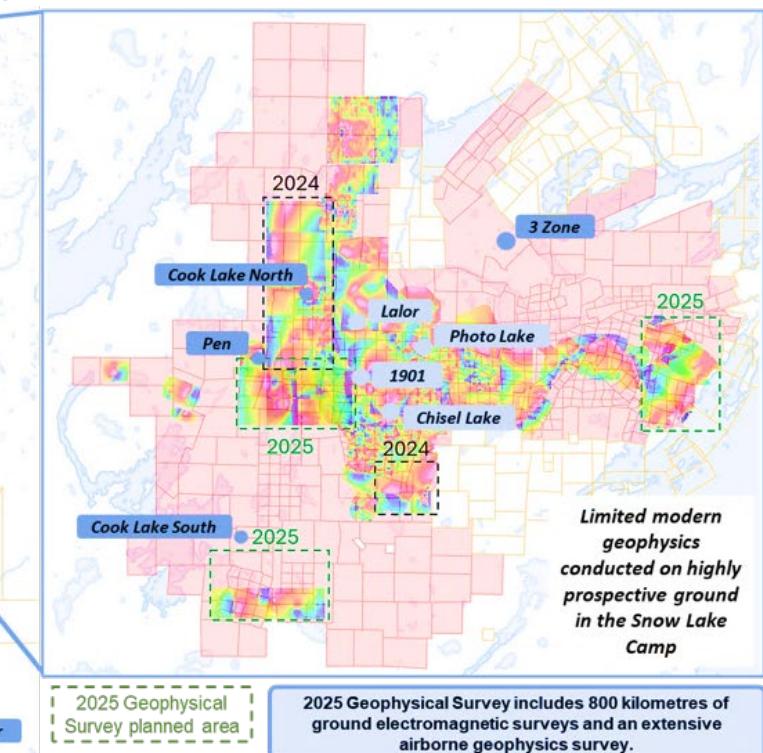

Talbot, Rail, Pen II, Watts, Zone 3 and WIM

## 3. GEOPHYSICS – NEW ANCHOR DISCOVERY

Large modern geophysics program underway consisting of deep surface electromagnetic surveys to detect targets at depths of ~1,000m below surface.

**2025 survey plans include surveying 800 km<sup>2</sup> area (outlined in green)**

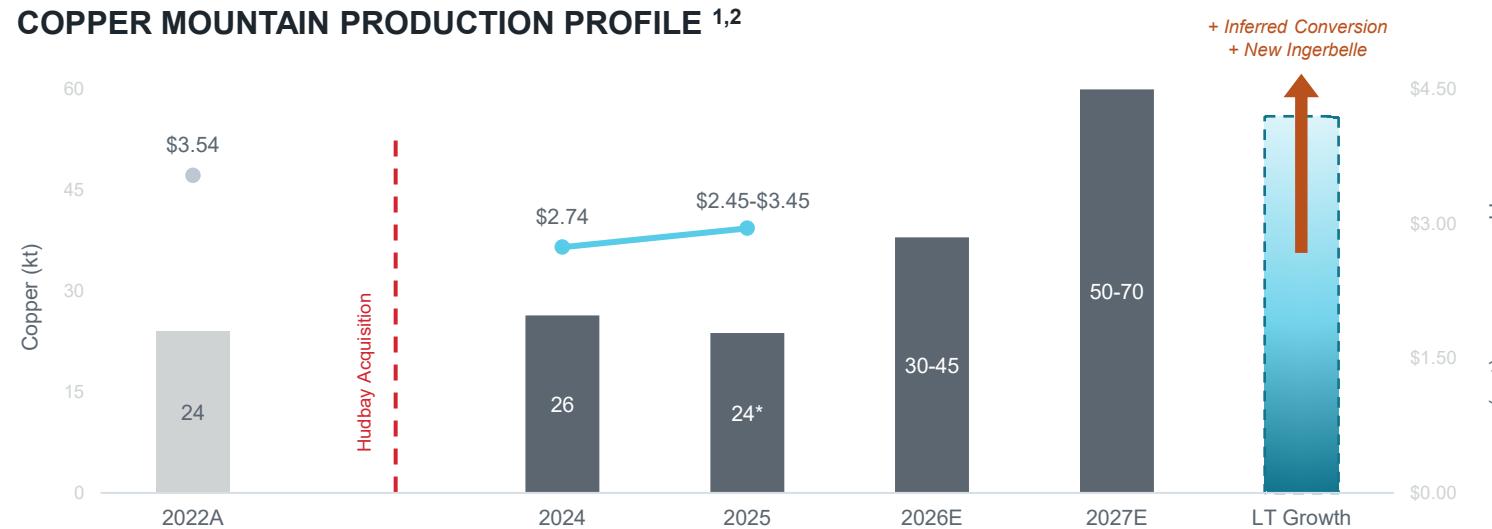

# Copper Mountain

## LONG LIFE COPPER MINE WITH OPTIONALITY

- Copper Mountain mine is a conventional open pit with a 45,000 tpd plant capacity. Hudbay acquired 75% ownership in June 2023 and completed the consolidation of the remaining 25% ownership in April 2025.
- Recent operating performance demonstrates the successful implementation of Hudbay's stabilization initiatives with improvements in copper recoveries, mill throughput and mill availability achieved in 2024. Implementing optimization plans to further enhance operations to reach targeted expanded production levels.

### COPPER MOUNTAIN PRODUCTION PROFILE <sup>1,2</sup>

\*Production for 2025 based on preliminary fourth quarter production results as disclosed in news release dated January 16, 2025. British Columbia full year copper production impacted by additional low-grade stockpiles processed in Q3 and temporary lower mill throughput in Q4.

# Significant Investment in U.S. Critical Minerals

## “MADE IN AMERICA” COPPER CATHODE TO SUPPORT DOMESTIC U.S. COPPER CONSUMPTION

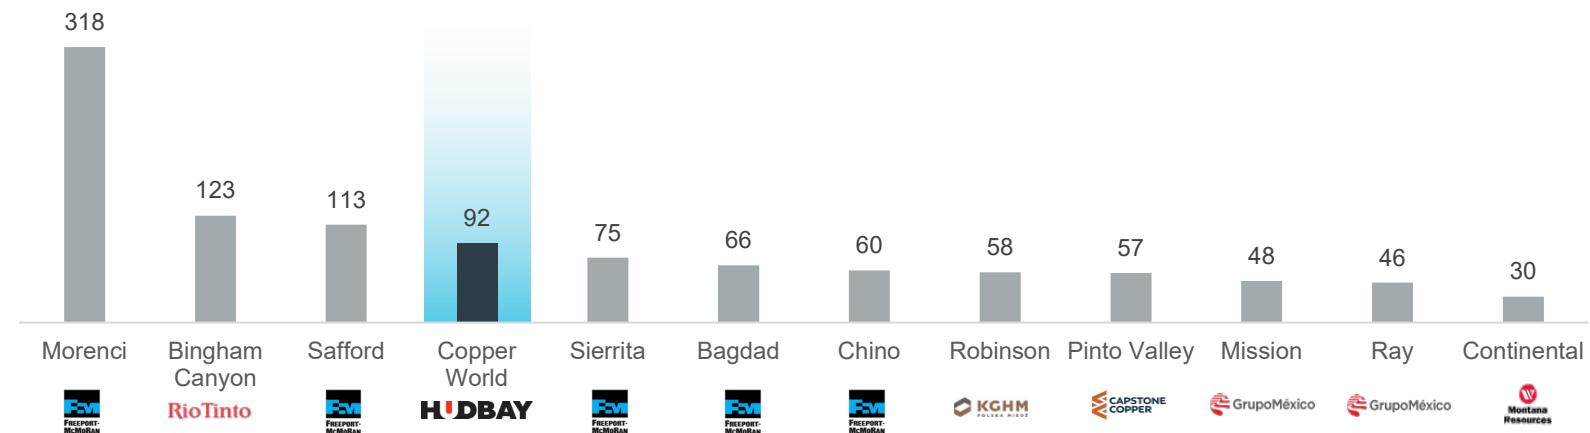

### INVESTING IN U.S. CRITICAL MINERALS INFRASTRUCTURE & SIGNIFICANT JOB CREATION

- Copper World represents one of the largest investments in southern Arizona's history.
  - Direct initial investment of \$1.5B<sup>1</sup>.
- Copper World will be a significant contributor to U.S. job creation.
  - Project construction is expected to create more than 1,000 jobs and utilize U.S. union labour for project construction with letters of commitment currently in place with 7 unions.
  - Expected to create more than 400 direct jobs and up to 3,000 indirect jobs in Arizona once in production.
- Permitted concentrate leach facility to produce “Made in America” copper cathode to contribute to domestic U.S. supply chain and strengthen manufacturing capacity and national and energy security.
  - Concentrate leach facility reduces the operation's total energy consumption by 10% and total scope 1, 2, and 3 GHG emissions by 14% through eliminating overseas shipping, smelting and refining.

Copper World will be one of the largest open-pit copper mines in the U.S.<sup>2</sup>

### U.S. COPPER BENCHMARKING – ANNUAL PRODUCTION (KT CU)<sup>2</sup>

For further information please refer to Hudbay's news release dated September 8, 2023, announcing the PFS results. Tonnes shown are metric tonnes.

1. Total initial capital expenditures before the impact of equipment financing.

2. Source from company public filings, Wood Mackenzie, Capital IQ SNL Metals & Mining asset screening tool based on U.S. primary copper assets with reported reserves. Production shown on 2024 annual basis. Copper World production based on Phase I average annual copper production for first 10 years in operation as disclosed in the 2023 PFS.

**HUDBAY**

# \$600M Strategic Investment from Mitsubishi Corporation

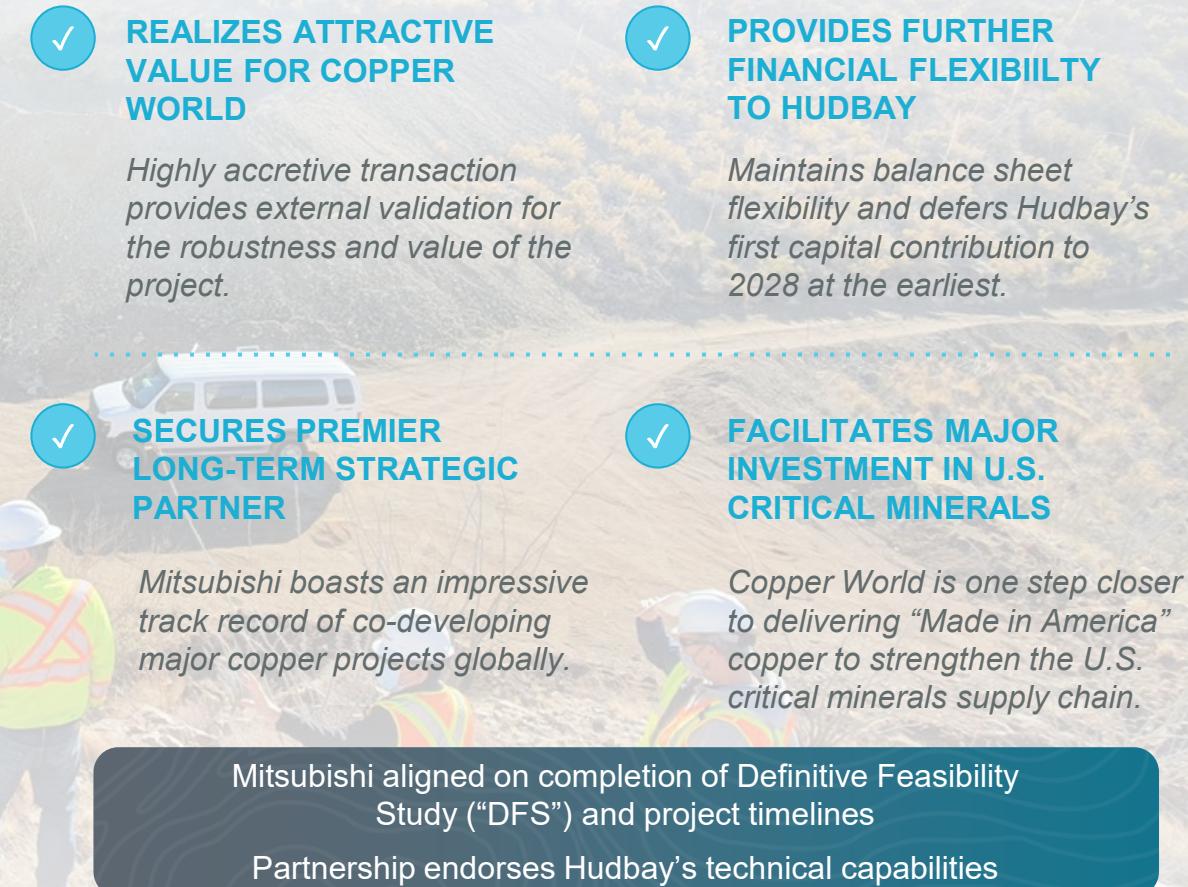

## HIGHLY ACCRETIVE JOINT VENTURE TRANSACTION WITH PREMIER PARTNER TO FUND COPPER WORLD PROJECT

### TRANSACTION OVERVIEW

INVESTOR PRESENTATION / JANUARY 2026

### FURTHER DERISKS THE ADVANCEMENT OF COPPER WORLD

1. Average analyst consensus net asset value (NAV) estimate for 100% of Copper World is approximately \$1.16 billion as of August 12, 2025.

2. Hudbay announced the closing of the \$600 million strategic investment from Mitsubishi, with initial contribution of approximately \$420 million in cash to Copper World LLC as disclosed in the news release dated January 12, 2026.

3. Hudbay's pro-forma cash and cash equivalents as at December 31, 2025 are approximately \$992 million, as disclosed in the news release dated January 16, 2026. All financial metrics including cash and cash equivalents as at December 31, 2025 are unaudited. Additionally, the pro-forma year-end cash and cash equivalents includes approximately \$420 million of cash at the Copper World LLC level received as part of the recent closing of the Copper World joint venture transaction, which is designated for exclusive use by the Copper World joint venture.

TSX & NYSE: HBM

**HUDBAY**

# Reduces Hudbay's Remaining Equity Contribution to ~\$200M

## FINANCIAL FLEXIBILITY WITH PRUDENT FINANCING PLAN AND STRENGTHENED BALANCE SHEET

<b>+90%</b>	<b>~\$1B</b>	<b>~\$200M</b>
Levered Project IRR to Hudbay	Hudbay Pro Forma <sup>1</sup> Cash Balance	Remaining Hudbay Equity Contribution

### JOINT VENTURE EQUITY PROCEEDS & CAPITAL CONTRIBUTION

- \$600M of initial cash contributions from Mitsubishi plus future 30% pro-rata equity capital contributions from Mitsubishi.
- Reduces Hudbay's estimated share of the remaining equity contributions to ~\$200M and defers Hudbay's first capital contribution to 2028 at the earliest.
- Hudbay to retain 100% of existing U.S. federal and state net operating losses.

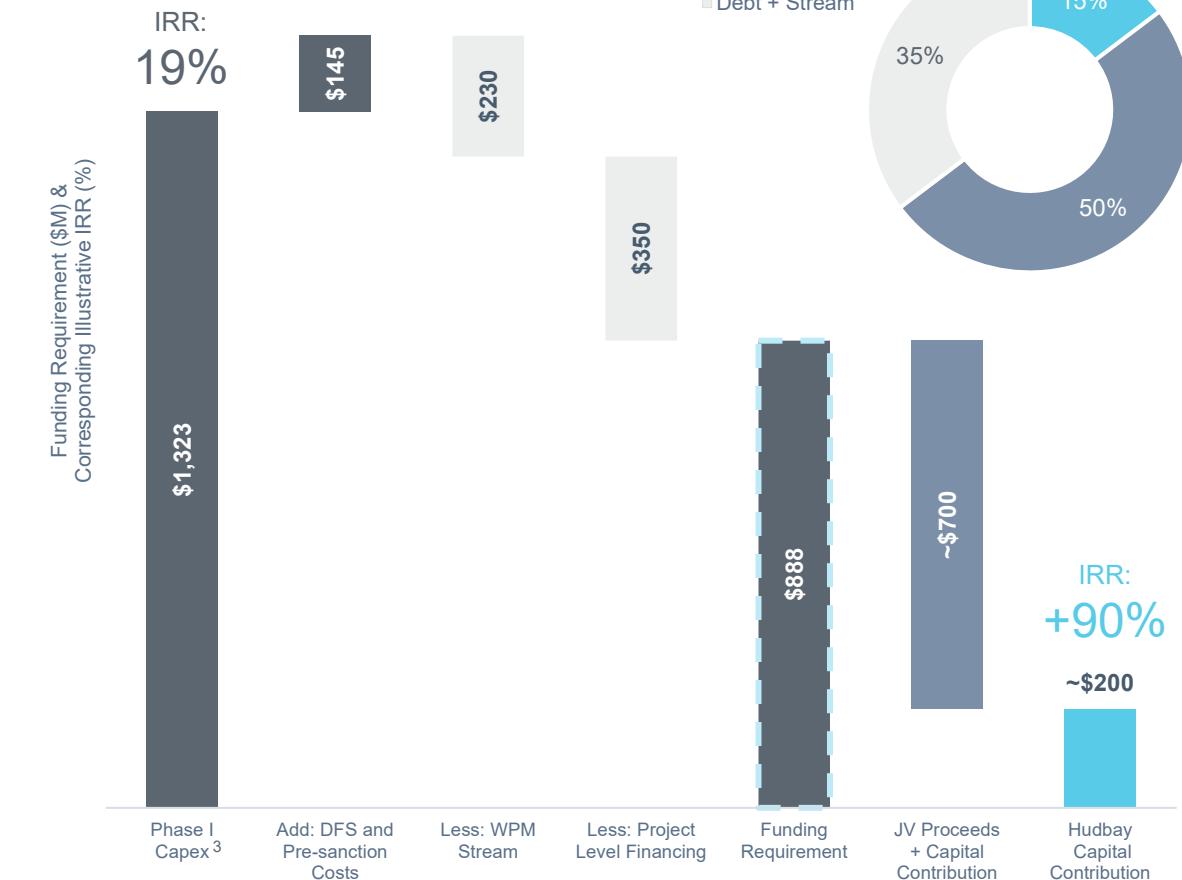

### ENHANCED PRECIOUS METALS STREAMING AGREEMENT

- Agreed on terms with Wheaton Precious Metals Corp. to amend the existing precious metals streaming agreement
  - \$230M stream deposit payable during construction is unchanged.
- Additional contingent payment of up to \$70M on a future potential mill expansion recognizes the long-term potential of Copper World.
- Updated ongoing gold and silver payments from fixed pricing to 15% of spot prices to allow upside price exposure.

### ACCELERATED GROWTH CAPITAL

- Hudbay announced increased Arizona 2025 growth capital guidance by \$20M for detailed engineering, some key long lead-time items and other derisking activities (spending advanced from future years).

### OPTIMAL PROJECT FUNDING STRUCTURE<sup>2</sup>

1. Using Hudbay's cash and cash equivalents of \$626M as of June 30, 2025 plus \$420M in initial cash earn-in contribution from the JV partner.

2. Based on the initial capital investment and the \$3.75 per pound copper price used in the PFS published in September 2023 with assumptions of approximately \$145M for pre-sanctioning costs, \$230M from the precious metals stream, \$350M from project-level financing and approximately \$700M from the JV partner earn-in, matching contribution and capital contribution.

3. Phase I Capex, net of equipment financing based on the PFS published in September 2023.

# Copper World PFS Highlights

## PHASE I PFS – LARGE SCALE, HIGH-GRADE COPPER PROJECT WITH ATTRACTIVE ECONOMICS

- **Large Reserve Base with Meaningful Resource Upside on a Significant Land Package:** 385Mt reserves support 20 years of Phase I mine life, which is only ~30% of the ~1.2Bt of M&I resources\*
- **Low Capex, Low Complexity Project:** Low capital intensity of under \$13,000/t with conventional open pit truck and shovel operation and copper flotation process at a ~1,600 masl
- **Phase II to Unlock Further Value:** Opportunity to expand mining activities onto federal land to extend mine life and further enhances economics

### SUMMARY OF 2023 PFS KEY METRICS

Valuation Metrics (Unlevered) <sup>1</sup> (at \$3.75/lb Cu)	Units	Phase I	
Net present value @ 8% (after-tax)	\$ millions	\$1,100	
Net present value @ 10% (after-tax)	\$ millions	\$771	
Internal rate of return (after-tax)	%	19.2%	
Payback period	# years	5.9	

Project Metrics	Units	Year 1-10	Year 11-20	Phase I
Growth capital – initial	\$ millions	\$1,323		
Construction length – initial plant	# years	2.5		
Growth capital – conc leach facility (year 4)	\$ millions	\$367		
Construction length – conc leach facility	# years	1.0		

  

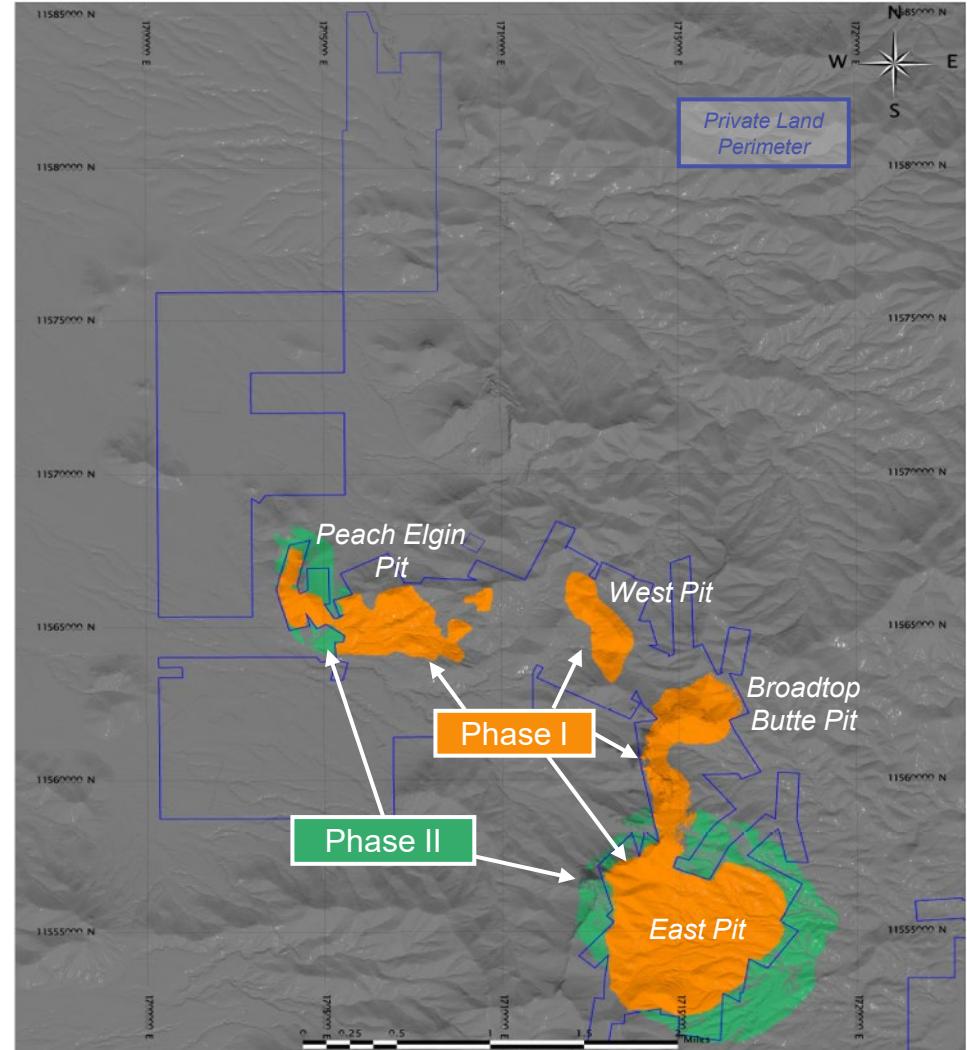

Operating Metrics	Year 1-10	Year 11-20	Phase I	
Copper production (annual avg.) <sup>2</sup>	000 tonnes	92.3	77.5	85.3
EBITDA (annual avg.) <sup>3</sup>	\$ millions	\$404	\$339	\$372
Sustaining capital (annual avg.)	\$ millions	\$33.9	\$19.4	\$27.1
Cash cost <sup>4</sup>	\$/lb Cu	\$1.53	\$1.39	\$1.47
Sustaining cash cost <sup>4</sup>	\$/lb Cu	\$1.95	\$1.62	\$1.81

1. Calculated assuming the following commodity prices: copper price of \$3.75 per pound, copper cathode premium of \$0.02 per pound (net of cathode freight charges), gold stream price of \$450 per ounce, silver stream price of \$3.90 per ounce and molybdenum price of \$12.00 per pound. Reflects the terms of the existing Wheaton Precious Metals stream, including an upfront deposit of \$230 million in the first year of Phase I construction in exchange for the delivery of 100% of gold and silver produced.
2. Copper production includes copper contained in concentrate sold and copper cathode produced from the concentrate leach facility. Average annual copper production excludes partial year of production in year 20.
3. EBITDA is a non-GAAP financial performance measure with no standardized definition under IFRS. For further information, please refer to the company's most recent Management's Discussion and Analysis.
4. Cash cost and sustaining cash cost exclude the cost of purchasing external concentrate, which may vary in price and or potentially be replaced with additional internal feed. By-product credits calculated using amortization of deferred revenue for gold and silver stream sales as per the company's approach in its quarterly financial reporting. By-product credits also include the revenue from the sale of excess acid produced at a price of \$145 per tonne. Sustaining cash cost includes sustaining capital expenditures and royalties. Cash cost and sustaining cash cost are non-GAAP financial performance measures with no standardized definition under IFRS. For further details on why Hudbay believes cash costs are a useful performance indicator, please refer to the company's Management's Discussion and Analysis.

For further information please refer to Hudbay's news release dated September 8, 2023, announcing the PFS results. Tonnes shown are metric tonnes.

\* Based on Phase I of mine plan as disclosed in the 2023 PFS. Resource shown inclusive of reserves. Initial capital expenditures shown net of equipment financing

# Mason Project

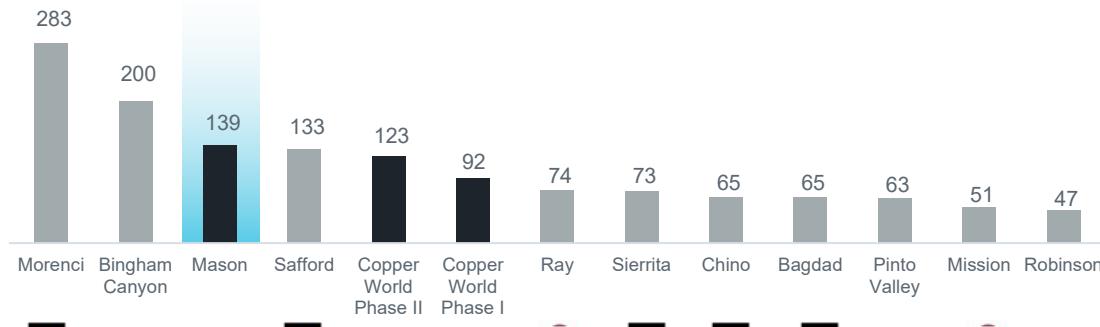

## LARGE OPEN PIT COPPER PROJECT WITH SIGNIFICANT LAND PACKAGE

- Acquired in 2018, Mason is 100%-owned by Hudbay and is located in the prolific Yerington Copper District of Nevada, with excellent infrastructure already in place including road access and nearby rail and power.
- In 2019 and 2020, Hudbay consolidated adjacent lands near Mason, including the Mason Valley and Bronco Creek properties, offering optimization and exploration upside.
- Robust PEA released in 2021, demonstrating strong project economics for 27-year mine life.
- Since 2021, Hudbay completed a geophysical program and additional drilling, while continuing to focus on ongoing social engagement. Metallurgical testing is also underway.

### MASON ECONOMICS<sup>1</sup>

# INVESTMENT THESIS

# Robust Copper Market Outlook

## STRONG LONG-TERM COPPER MARKET FUNDAMENTALS WITH SIGNIFICANT SHORTAGE SUPPLY

Declining Copper Grades

No Significant Projects Sanctioned in Past 3-Years

Protracted Permitting Timelines

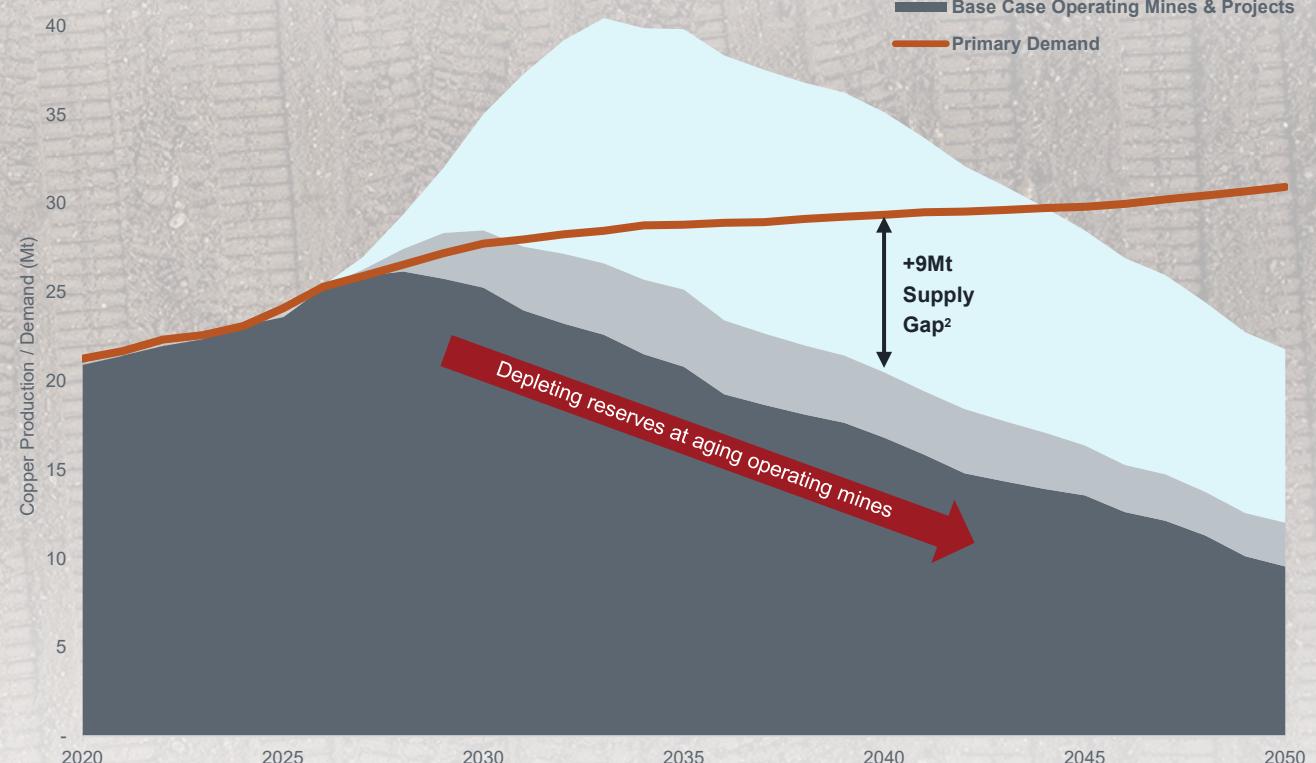

Capital Inflation & Increasing Social Costs

Lack of New Discoveries of Copper Deposits

### GLOBAL COPPER SUPPLY AND DEMAND<sup>1</sup>

Copper markets are increasingly dependent on execution of early-stage development projects

### GROWING DEMAND FOR "GREEN COPPER"

Global De-carbonization & Transition to Renewable Energy

Electrification of Vehicles

Artificial Intelligence Data Centres

Industrialization & Urban Development

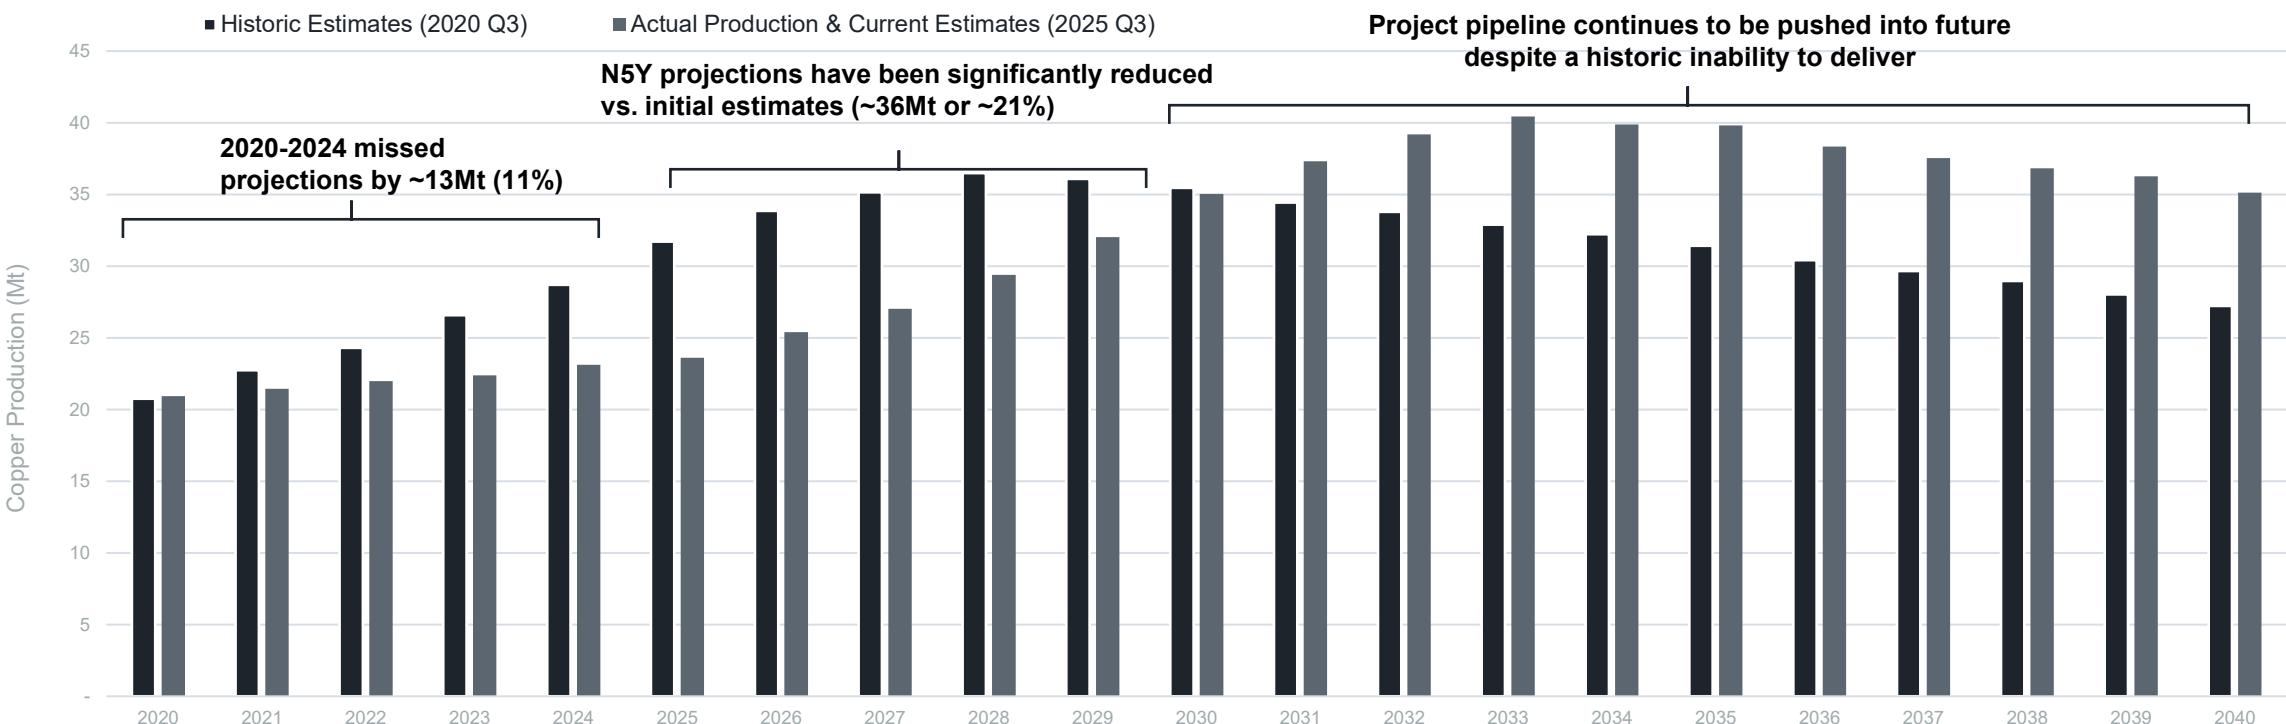

Deglobalization of Supply Chain

1. Source: Wood Mackenzie, Global Copper Investment Horizon Outlook (Q3 2025 dataset)

2. Supply gap in 2040 assuming supply contribution of anticipated Base Case Production and Probable Projects

# Challenges of Supply Prediction

The analysis below compares the projected global copper production estimated by Wood Mackenzie, inclusive of development and expansion projects, as of **2020 Q3** to the **latest 2025 Q3 estimates and 2020-2024 production actuals** to understand how the market has changed following production shortfalls at operating mines and delays in executing upon expansion and development projects.

The market has a history of optimistic projections for new production → Suggesting the gap may be larger

1. Source: Wood Mackenzie, Base Metals Markets Tool as of Q3 2020 and Q3 2025; includes production from mines only.

**HUDBAY**

# Proven Developer and Operator

**HUDBAY HAS ~100 YEARS OF MINE DISCOVERY, DEVELOPMENT AND OPERATING EXPERTISE**

1

## VALUE CREATION THROUGH EXPLORATION

Consistent growth through discovery of new deposits + track record of mine life extensions

High-grade Pampacancha deposit near Constancia

777 and Lalor discoveries (1990's and 2000's)

Flin Flon (1910's), Chisel Basin (1950's), Trout Lake (1970's)

5

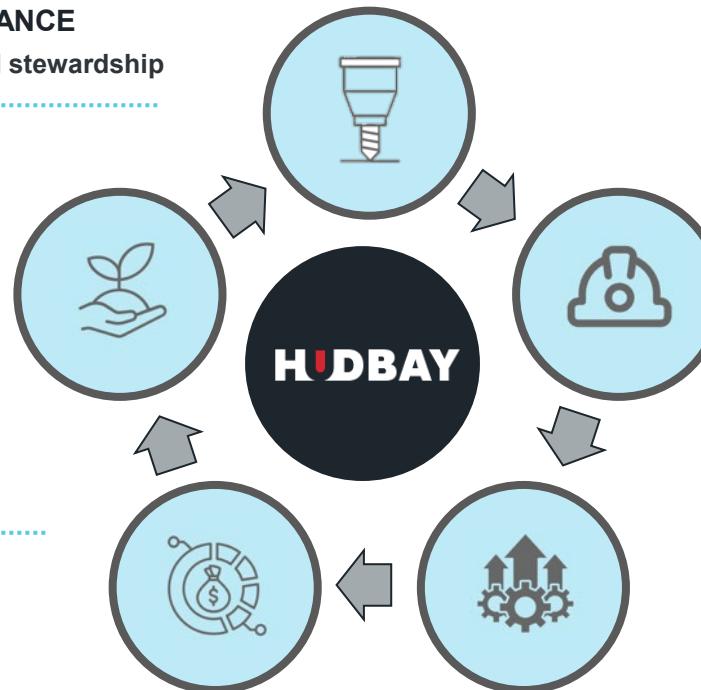

## ENVIRONMENTAL SOCIAL AND GOVERNANCE

Committed to sustainability and environmental stewardship

All operations in the bottom half of the greenhouse gas curve

Recognized as the gold standard for community relations in Peru

40% community employment at the Constancia mine; 16% Indigenous employment in Manitoba

2

## BEST-IN-CLASS MINE BUILDING EXPERIENCE

World-class management and operating team with proven mine building experience

Constancia - Recognized as gold standard for mine building and ramp-up

Developed 29 mines in the Flin Flon Belt and Snow Lake Belt in Manitoba

3

## OPERATIONAL EXCELLENCE & IMPROVEMENTS CULTURE

Hudbay best-in-class operating team focused on continuous optimization

Constancia throughput and recovery optimizations

New Britannia successful refurbishment and operation well above design throughput

Copper Mountain operational turnaround

4

## PRUDENT CAPITAL ALLOCATOR

"3-P" framework ensures capital discipline

Outperformed leverage target of 1.2x (0.5x as at Q3 2025)<sup>1</sup>

Strong financial position (~\$611mm in cash<sup>2</sup>)

New Britannia, Copper Mountain & Copper World low capital intensity & high return

1. Net Debt to Adjusted EBITDA calculation based on most recent company public filings available as of November 12, 2025.

Adjusted EBITDA is based on trailing twelve months for each period.

2. Sept. 30, 2025 cash and cash equivalents and available liquidity reflects cash and cash equivalents.

# Several Near-Term Catalysts

**FOCUS ON DELIVERING MANY NEAR-TERM GROWTH INITIATIVES ACROSS THE PORTFOLIO TO GENERATE SIGNIFICANT VALUE FOR STAKEHOLDERS**

## COPPER WORLD

- ✓ Complete definitive feasibility study by mid-2026
- ✓ Sanction decision in 2026
- ✓ Secure project level financing

## MANITOBA

- ✓ New Britannia further optimization
- ✓ Snow Lake regional exploration –  
Near Lalor drilling, Cook Lake and Talbot exploration properties
- ✓ 1901 exploration and early mining
- ✓ Flin Flon tailings reprocessing

## PERU

- ✓ Expand throughput to further enhance production –  
Evaluate future benefit from regulatory change allowing 10% increase in throughput above permitted levels
- ✓ Maria Reyna and Caballito exploration –  
Drill permitting process underway by government

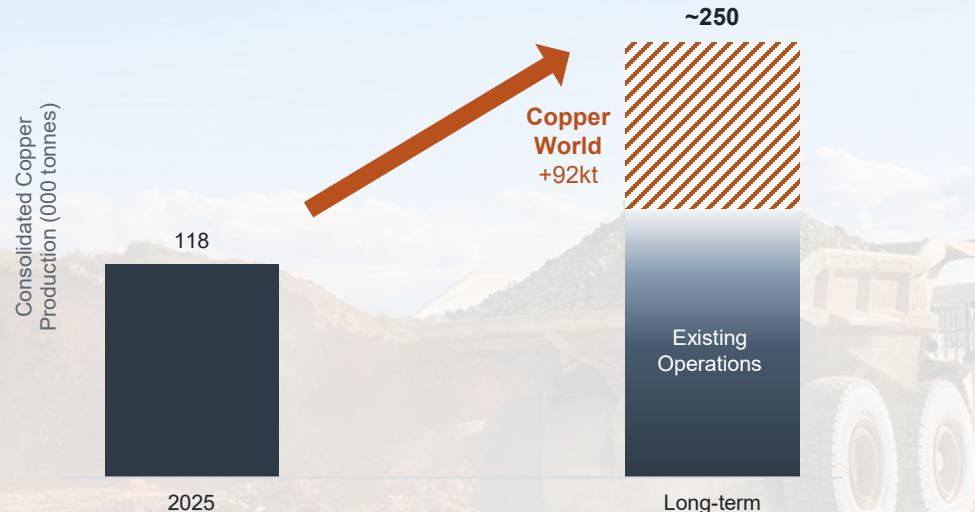

## COPPER MOUNTAIN

- ✓ Execute optimization plans –  
Transform mine into a reliable cash flow contributor
- ✓ Accelerate mill expansion to 50k tpd
- ✓ New Ingerbelle pit development
- ✓ Mine life extension –  
Future exploration to convert large inferred resources to reserves

# Hudbay's Attractive, Copper Weighted Production Growth

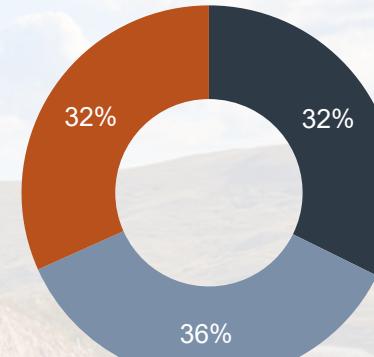

## COPPER WORLD DELIVERS +50% GROWTH IN CONSOLIDATED COPPER PRODUCTION

### ANNUAL CONSOLIDATED COPPER PRODUCTION<sup>1</sup>

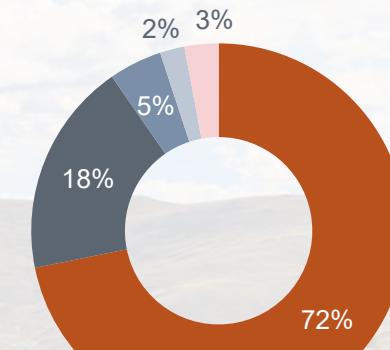

### HUDBAY LONG-TERM PRODUCTION PROFILE<sup>2</sup>

#### GEOGRAPHIC MIX

- Peru
- Canada
- USA

#### COMMODITY MIX

- Copper
- Gold
- Silver
- Zinc
- Molybdenum

Once Copper World is in production, Hudbay will become one of the largest Americas-focused pure-play copper producers with a well-balanced and geographically diversified portfolio of assets

1. Hudbay's copper production shown for 2025 based on preliminary fourth quarter and full year production results for the period ended December 31, 2025 based on news release dated January 16, 2025. See "Disclaimer Regarding Preliminary Financial Information". Long-term production based on average annual copper production (2026-2027 guidance midpoint) of 149kt p.a. plus Copper World first 10-year average copper production of 92kpta in Phase I of mine plan as disclosed in the 2023 PFS.
2. Using mid-point of three-year annual production guidance plus the Copper World first 10-year average production in Phase I of mine plan as disclosed in the 2023 PFS. Calculated using select commodity pricing (\$4.25/lb Cu, \$2,200/oz Au, \$25.00/oz Ag, \$1.25/lb Zn, and \$15.00/lb Mo).

# APPENDIX

# World-Class Management Team

**PETER KUKIELSKI**  
**PRESIDENT & CEO**

More than 30 years of sector experience in base metals, precious metals and bulk materials across the globe, including leadership positions at Nevsun, Anemka, ArcelorMittal, Teck and Noranda.

**EUGENE LEI**  
**CFO**

Over 25 years of global mining investment banking, finance and corporate development experience. As CFO, he is responsible for financial reporting, IR, financial planning and treasury.

**ANDRE LAUZON**  
**COO**

Over 30 years of experience, holding leadership roles at Vale. Leads international operating teams & responsible for business development, technical services, exploration and CSR.

**ROBERT CARTER**  
**SVP, CANADA**

Over 25 years of mining industry experience in technical, operational and senior leadership roles. Responsible for the strategic oversight of Hudbay's business activities in Manitoba and British Columbia.

**JAVIER DEL RIO**  
**SVP, USA BUSINESS UNIT**

Over 30 years of corporate and operational experience in open-pit, underground and expansion initiatives. Most recently he led our Peru business unit and is now responsible for our growing U.S. business unit.

**PATRICK DONNELLY**  
**SVP, LEGAL & ORGANIZATIONAL EFFECTIVENESS**

Over 20 years of corporate & securities law experience, he joined in 2008 with expanding responsibilities over his tenure; responsible for all legal and HR matters.

**OLIVIER TAVCHANDJIAN**  
**SVP, EXPLORATION AND TECHNICAL SERVICES**

Over 30 years of mineral industry experience. As SVP, he is responsible for the exploration strategy to create value through increasing the mineral reserves and resources and technical aspects of the company.

**CANDACE BRULE**  
**SVP, CAPITAL MARKETS & CORPORATE AFFAIRS**

Over 15 years of capital markets, corporate development and investor relations experience in the mining sector. Responsible for leading the investor and external communications activities as well as financial planning and analysis, Canadian government relations and corporate sustainability reporting.

**MARK GUPTA**  
**SVP, CORPORATE DEVELOPMENT & STRATEGY**

Over 15 years of investment banking and corporate development experience, including Lead Principal, Business Development at BHP. Responsible for optimizing Hudbay's portfolio of assets through acquisition, divestitures, investments and partnerships.

**JON DOUGLAS**  
**VP, TREASURER**

**THOMAS KARANIKOLAS**  
**VP, FINANCE**

**WARREN FLANNERY**  
**VP, COPPER WORLD**

**JOHN O'SHAUGHNESSY**  
**VP, MANITOBA BUSINESS UNIT**

**ACTING HEAD, BRITISH COLUMBIA BUSINESS UNIT**

**AUDRA WALSH**  
**VP, SOUTH AMERICA BUSINESS UNIT**

**MARK HABER**  
**VP, LEGAL AND CORPORATE SECRETARY**

# Board of Directors

## DAVID SMITH

### CHAIR

David has over 30 years of financial and executive leadership experience. He has had a career on both the finance and the supply sides of business within the mining sector, with extensive international exposure.

## PETER KUKIELSKI

### PRESIDENT & CEO

Peter has more than 30 years of experience within the base & precious metals and bulk materials sectors, having overseen operations across the globe.

## JOHN ARMSTRONG

### DIRECTOR

John has a long career as a strategic advisor, including CEO of Versamet Royalties and spent many years with BMO Financial Group. He has experience in investment banking strategy, execution across various industry verticals, as well as delivering corporate finance and advisory solutions to clients.

## JEANE HULL

### DIRECTOR

Jeane has over 35 years of operational leadership and engineering experience, most notably holding the positions of Executive Vice President and Chief Technical Officer of Peabody Energy Corporation and Chief Operating Officer for Kennecott Utah Copper Mine, a subsidiary of Rio Tinto plc.

## CARIN KNICKEL

### DIRECTOR

Carin has over 30 years' experience in the energy industry, holding senior operating, planning & business development positions throughout her career in the US & Europe

## GEORGE LAFOND

### DIRECTOR

George has held many leadership positions in business, education and social development. He is known for achieving strategic initiatives leading to First Nations engagement and is a citizen of the Saskatchewan Muskeg Lake Cree Nation.

## STEPHEN A. LANG

### DIRECTOR

Stephen has over 40 years of experience in the mining industry, including engineering, development and production at gold, copper, coal and platinum group metals operations.

## COLIN OSBORNE

### DIRECTOR

Colin is President, Samuel Son and Co., one of North America's largest commodity metals supply chain & has over 30 years' experience in capital-intensive metals, mining and industrial manufacturing businesses.

## PAULA ROGERS

### DIRECTOR

Paula has over 25 years of experience working for Canadian-based international public companies in the areas of corporate governance, treasury, mergers and acquisitions, financial reporting and tax.

## LAURA TYLER

### DIRECTOR

Laura has over 35 years global experience in the mining sector, most notably as Chief Technical Officer and Asset President for BHP and most recently as CEO for Adriatic Metals plc. She has held numerous operational and technical leadership roles, including various engineering, planning, geotech and geology roles.

1. Metal reported in concentrate and doré is prior to refining losses or deductions associated with smelter terms

2. Full year production for the period ended December 31, 2025 includes fourth quarter production that is preliminary in nature and may be subject to change, as disclosed in the news release dated January 16, 2026. See "Disclaimer Regarding Preliminary Financial Information" for further information.

3. 2025 guidance information update provided as of November 12, 2025 news release & MD&A. 2025 zinc production expected to be below the low end of the guidance range. Peru 2025 copper production expected within the guidance ranges, while gold production expected to be above the top end of the guidance range. Manitoba 2025 production expected to be slightly below the low end of gold production guidance range. British Columbia 2025 copper production expected to be below the low end of the guidance range.

# 2025 Cost Guidance

## CAPITAL EXPENDITURES<sup>1</sup> (\$M)

SUSTAINING CAPITAL	2025 Guidance <sup>2</sup>	2024 Actuals
Peru <sup>3</sup>	170	124
Manitoba	60	46
British Columbia <sup>3</sup>	135	123
<b>Total sustaining capital</b>	<b>365</b> (Reduced to 350)*	<b>293</b>
Peru	25	1
Manitoba <sup>5</sup>	15	7
British Columbia <sup>5</sup>	75	8
Arizona <sup>6</sup>	110	29
<b>Total growth capital</b>	<b>225</b> (Reduced to 205)*	<b>45</b>
Capitalized exploration	10	12
<b>Total capital expenditures</b>	<b>600</b> (Reduced to 565)*	<b>350</b>

\*Improved 2025 reduced total expected capital expenditure and consolidated cash cost guidance as per November 12, 2025 news release. Sustaining and growth capital figures for each operation do not equate to the reduced total capital expenditures figures.

1. Capital expenditures excludes capitalized costs not considered to be sustaining or growth capital expenditures.
2. Sustaining capital guidance excludes right-of-use lease additions and additions as a result of equipment financing arrangements and non-cash deferred stripping.
3. Includes capitalized stripping costs and development costs.
4. Peru 2024 exploration guidance excludes \$5 million of non-cash amortization of community agreements for exploration properties.
5. 2025 Manitoba growth capital partially funded by approximately \$5 million in Canadian Development Expense flow-through financing proceeds (2024 - \$3 million). Manitoba exploration partially funded by approximately \$7 million in Canadian Exploration Expense flow-through financing proceeds for 2025 (2024 - \$11 million). 2025 Canadian capital expenditures guidance is converted into U.S. dollars using an exchange rate of 1.35 C\$/US\$.
6. 2025 Arizona growth capital guidance was increased by an additional \$20 million, compared to the original 2025 guidance of \$90 million, updated as of August 13, 2025 news release.
7. Cash cost and sustaining cash cost per pound of copper produced, net of by-product credits, and cash cost per ounce of gold produced, net of by-product credits, are non-GAAP financial performance measures with no standardized definition under IFRS. For further information, please see the "Non-GAAP Financial Performance Measures" section of this presentation.
8. Peru cash cost per pound of copper produced, net of by-product credits, assumes by-product credits are calculated using the gold and silver deferred revenue drawdown rates for the streamed ounces in effect on December 31, 2024 and the following commodity prices for 2025: \$2,500 per ounce gold, \$26.00 per ounce silver and \$18.00 per pound molybdenum.
9. Manitoba cash cost per ounce of gold produced, net of by-product credits, assumes by-product credits are calculated using the following commodity prices for 2025: \$4.10 per pound copper, \$1.20 per pound zinc, \$26.00 per ounce silver and an exchange rate of 1.35 C\$/US\$. British Columbia cash cost per pound of copper produced, net of by-product credits, assumes by-product credits are calculated using the following commodity prices for 2025: \$2,500 per ounce gold, \$26.00 per ounce silver and an exchange rate of 1.35 C\$/US\$.

## EXPLORATION EXPENDITURES (\$M)

	2025 Guidance	2024 Actuals
Peru <sup>4</sup>	19	20
Manitoba <sup>5</sup>	30	26
British Columbia <sup>5</sup>	1	2
Arizona and other	-	2
Total exploration expenditures	50	50
Capitalized spending	(10)	(12)
<b>Total exploration expense</b>	<b>40</b>	<b>37</b>

## CASH COSTS BY BUSINESS UNIT<sup>7</sup>

Peru copper cash cost (\$/lb) <sup>8</sup>	1.35 - 1.65	1.18
Manitoba gold cash cost (\$/oz) <sup>9</sup>	650 - 850	606
British Columbia copper cash cost (\$/lb) <sup>9</sup>	2.45 - 3.45	2.74

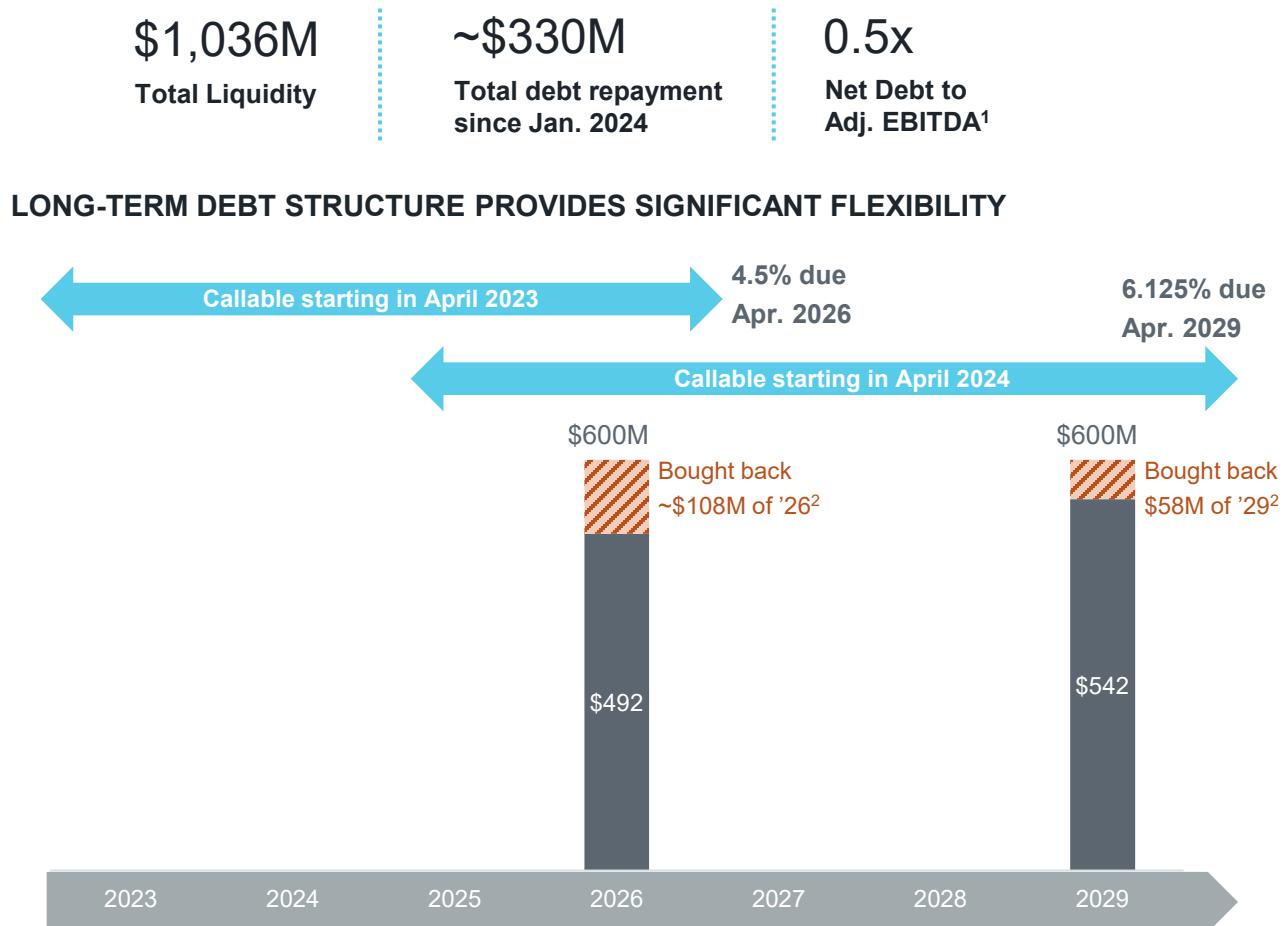

## CONSOLIDATED CASH COSTS

Consolidated copper cash cost (\$/lb)	0.15 - 0.35* (Previously 0.65 - 0.85; Original 0.80 - 1.00)	0.46
Consolidated sustaining copper cash cost (\$/lb)	1.85 - 2.25* (Original 2.25 - 2.65)	1.62

**HUBBAY**

# Our People, Our Community, Our Planet

## EMBRACING DIVERSITY AND PROVIDING A HEALTH & SAFE WORKPLACE

- All operations are required to be certified to ISO 45001, an internationally accepted standard for occupational health and safety management systems.
- Promotes an inclusive workplace and embraces diverse backgrounds:
  - 100% of Constancia mine employees are Peruvian, with 20% from the local communities
  - Indigenous employment of 15% in Manitoba and 13% in British Columbia
  - 18% overall female employment

### CASE STUDY: LOCAL BUSINESS SET-UP WITH 35% OF CONSTANCIA'S CONCENTRATE NOW TRUCKED BY COMMUNITIES

In 2021, Hudbay invited the communities of Chilloroya and Uchucarcco to participate in tender for transport of Constancia's concentrate to the port of Matarani.

Hudbay assisted in raising the standards of the Chilloroya company to that of a Tier 1 supplier.

In early 2022, the Chilloroya company started moving concentrate with a fleet of 21 trucks; the community of Uchucarcco followed a few months later with a fleet.

## PRIORITIZE MEANINGFUL CONNECTIONS WITH COMMUNITIES

- Understanding needs, assessing potential impacts and maintaining open dialogue, to create the foundation for long-term partnerships that support mutual growth and shared success.
- Hudbay conducts annual self-assessments aligned with the Mining Association of Canada's (MAC) Towards Sustainable Mining (TSM) Indigenous and Community Relationships Protocol.
  - Constancia achieved level AAA ratings across all five indicators
  - Manitoba achieved AAA ratings on three indicators, and AA ratings on two indicators.
  - British Columbia received level AAA ratings on two indicators and three level AA ratings

## COMMITTED TO ADVANCING ENVIRONMENTALLY RESPONSIBLE MINING

- We track our use of resources and integrate eco-efficiency considerations into investment decisions and business planning processes.
- Our Biodiversity Conservation Standard aims to preserve healthy ecosystems and biodiversity throughout the mine lifecycle, aligned with the TSM Biodiversity Conservation Management Protocol and the IFC Ecosystem Services Performance Standard.
- Hudbay's updated climate change targets include 2030 GHG emissions reduction targets specific to each business unit and are focused on those areas where the Company believes it can achieve the biggest impact.

## CLIMATE CHANGE TARGETS

Business Unit <sup>1</sup>	2030 GHG Emissions Reduction Target <sup>2</sup>
Peru (2022 baseline)	99% reduction in Scope 2 GHG emissions intensity (tonnes of Scope 2 emissions per kilotonne of ore processed)
Snow Lake <sup>3</sup> (2022 baseline)	25% reduction in Scope 1 GHG emissions intensity (tonnes of Scope 1 emissions per kilometre)
British Columbia (2024 baseline)	5% reduction in Scope 1 GHG emissions intensity (tonnes of Scope 1 emissions per kilometre)

<sup>1</sup> Baseline year of 2022 for operations owned at inception of Hudbay's climate change strategy and first full year of operations for assets acquired since 2022.

<sup>2</sup> Site-level GHG reporting may vary from these targets as we use internationally accepted emissions factors for the data shown in this report and for corporate purposes. Kilometre results from each business unit may vary depending on the amount of uphill versus downhill hauling and other areas of material movement during mining operations.

<sup>3</sup> Includes baseline year data for Snow Lake operations only and excludes impact of Flin Flon operations in Manitoba, which were closed in 2022.

# South America Business Unit

# Constancia Mine Plan

## 17-YEAR MINE PLAN BASED ON PROVEN AND PROBABLE RESERVES ONLY

Mine plan for Constancia operations reflects higher copper and gold production into 2025 with the higher grades from the Pampacancha deposit and extended mine life to 2041 with the conversion of mineral resources to mineral reserves.

CONSTANCIA OPERATIONS	2023A	2024A	2025A <sup>3</sup>	2026 <sup>3</sup>	2027 <sup>3</sup>	2028-2037 Avg.
<b>CONTAINED METAL IN CONCENTRATE</b>						
Cu Production (000s tonnes)	100	99	85	76 – 100	76 – 100	72
Au Production (000s ounces)	114	98	74	16 – 21	17 – 23	20
Ag Production (000s ounces)	2,505	2,708	2,415	1,610 – 2,070	1,415 – 1,915	1,805
Mo Production (000s tonnes)	1.6	1.3	1.3	1.3 – 1.5	1.4 – 1.8	1.1
<b>CAPITAL EXPENDITURES</b>						
Sustaining Capital <sup>1</sup> (\$M)	\$132	\$124	\$170 <sup>3</sup>	\$66	\$125	\$52
Growth Project Capital (\$M)	\$12	\$2	\$25 <sup>3</sup>	-	-	-
<b>COPPER CASH COSTS</b>						
Cash Cost, net of by-product credits <sup>2</sup> (\$/lb Cu)	\$1.07	\$1.18	\$1.35-\$1.65 <sup>3</sup>			
Sustaining Cash Cost, net of by-product credits <sup>2</sup> (\$/lb Cu)	\$1.81	\$1.86				

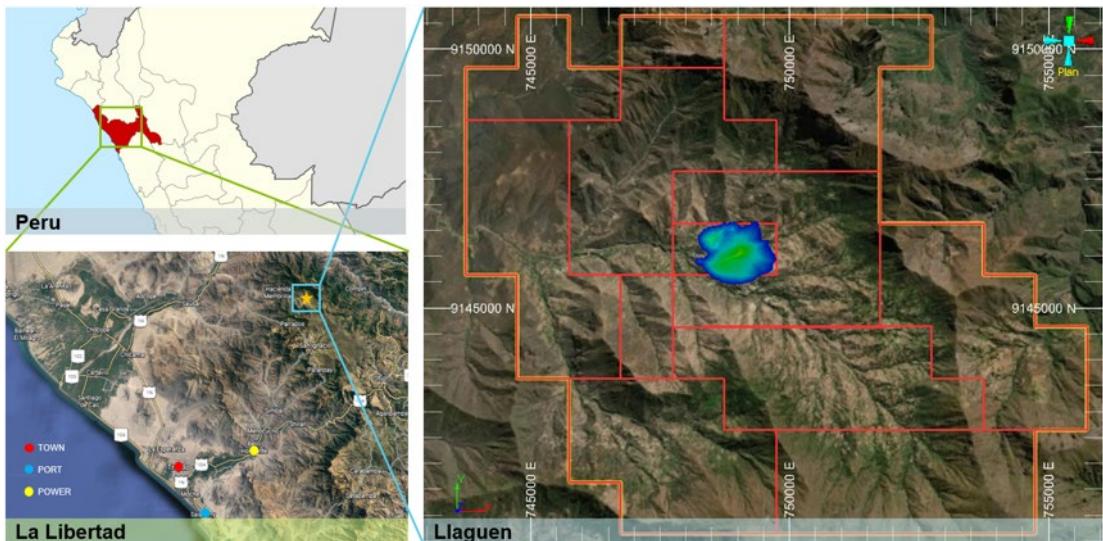

Source: March 2021 Constancia operations 43-101 technical report and company's updated guidance announced on March 27, 2025. Updated annual mineral reserve estimates announced on March 28, 2024 extended Constancia's mine life by four years to 2041, which is not reflected in the table above. Totals may not add up correctly due to rounding and mine plan changes reflected in near-term guidance.

1. After the impact of capitalized stripping and development costs.
2. Cash cost and sustaining cash cost are non-GAAP financial performance measures with no standardized definition under IFRS. For further details on why Hudbay believes cash costs are a useful performance indicator, please refer to the company's most recent Management's Discussion and Analysis.
3. Peru full year production for 2025 includes fourth quarter production that is preliminary in nature and may be subject to change, as disclosed in news release dated January 16, 2025. See "Disclaimer Regarding Preliminary Financial Information" for further information. Cash cost guidance range shown for 2025 based on news release dated February 19, 2025. Guidance range for 2026 and 2027 production based on news release dated March 27, 2025. Cash cost guidance not provided beyond 2025.

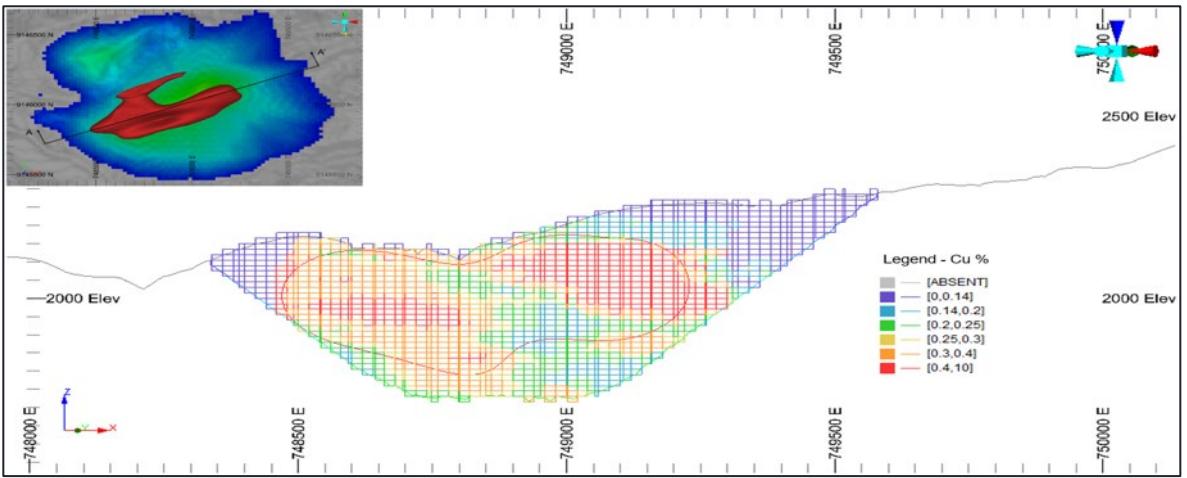

# Llaguen Project

## COPPER PIPELINE PROJECT IN A FAVOURABLE LOCATION

- 100% owned by Hudbay.
- The Llaguen project is in La Libertad region in northwestern Peru.
- Accessible by road, 62km from the Salaverry port and 40km from the Trujillo Nueva electric substation.
- Hosts shallow mineralization over a 1.3km strike length, with higher grade mineralization located close to surface that has the potential to be mined earlier in the mine life.

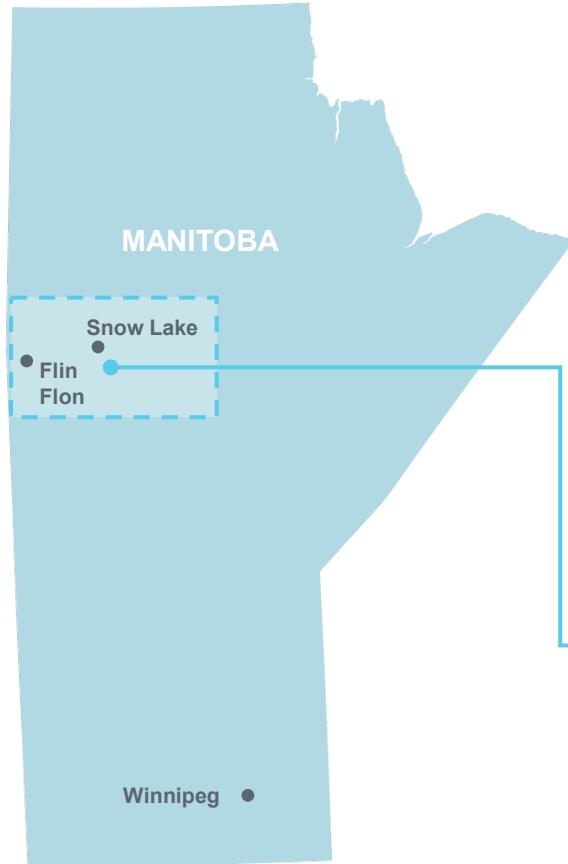

### SECTIONAL VIEW OF PROJECT

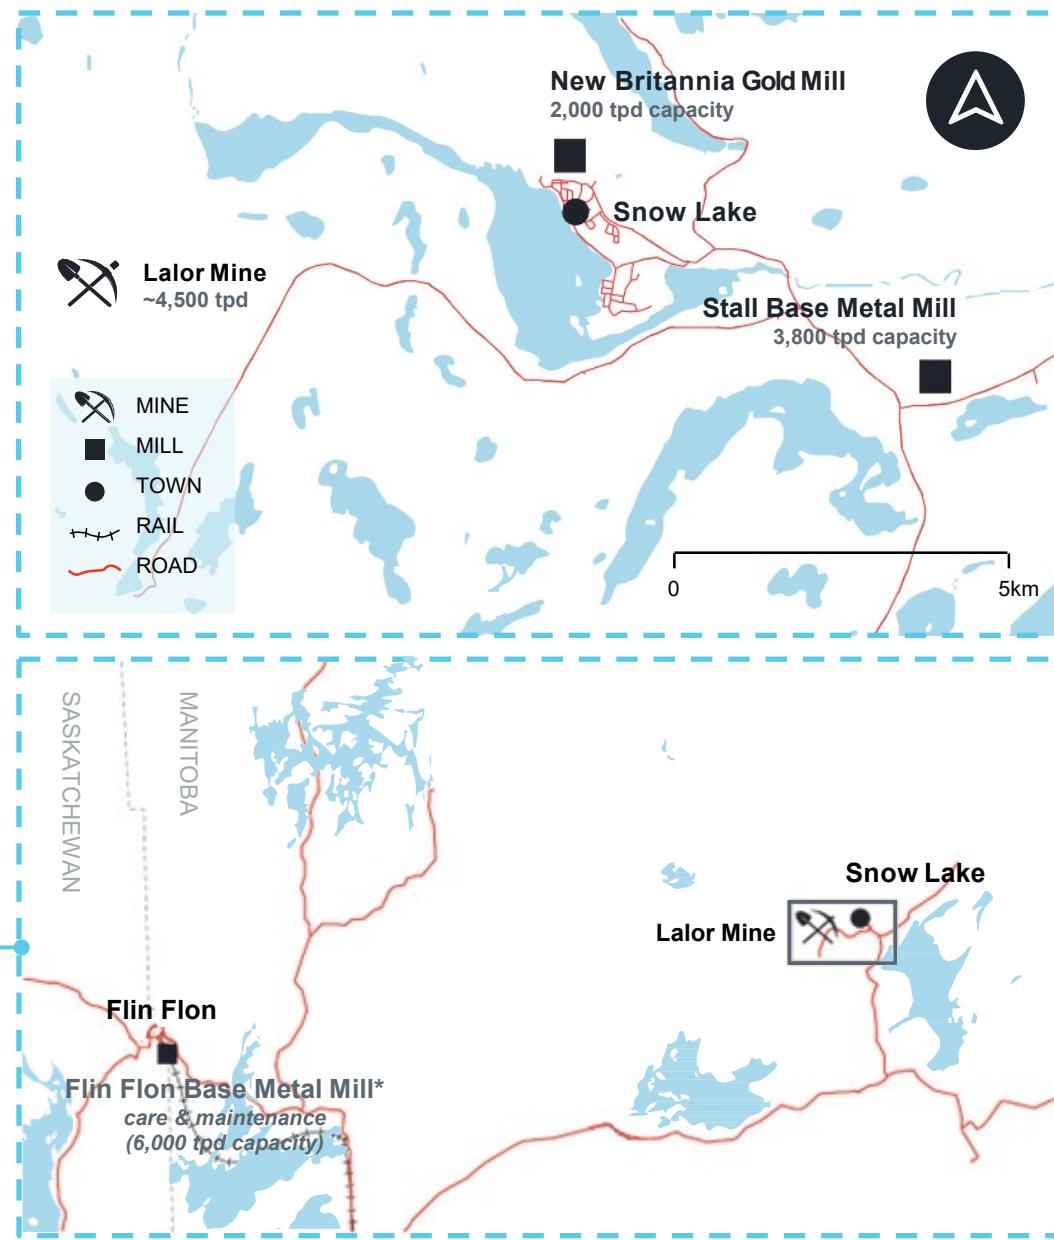

### MINERAL RESOURCE ESTIMATE AS AT JANUARY 1, 2025

Category	Metric Tonnes	Cu (%)	Mo (g/t)	Au (g/t)	Ag (g/t)	CuEq (%)
Indicated Global ( $\geq 0.14\% \text{ Cu}$ )	271,000,000	0.33	218	0.033	2.04	0.42
Including Indicated High-grade ( $\geq 0.30\% \text{ Cu}$ )	113,000,000	0.49	261	0.046	2.73	0.60
Inferred Global ( $\geq 0.14\% \text{ Cu}$ )	83,000,000	0.24	127	0.024	1.47	0.30
Including Inferred High-grade ( $\geq 0.30\% \text{ Cu}$ )	16,000,000	0.45	141	0.038	2.60	0.52
<b>Total Waste</b>	<b>314,000,000</b>					
<b>Strip Ratio (x)</b>	<b>0.9</b>					

# Manitoba Business Unit

\* Mining activities in Flin Flon were completed in June 2022; Flin Flon mill on care and maintenance with the potential to be restarted if there are future discoveries in the region.

# Snow Lake Mine Plan

## 13-YEAR MINE PLAN BASED ON PROVEN AND PROBABLE RESERVES ONLY

Mine plan optimizes processing capacity in Snow Lake to maximize the NPV of the operations.

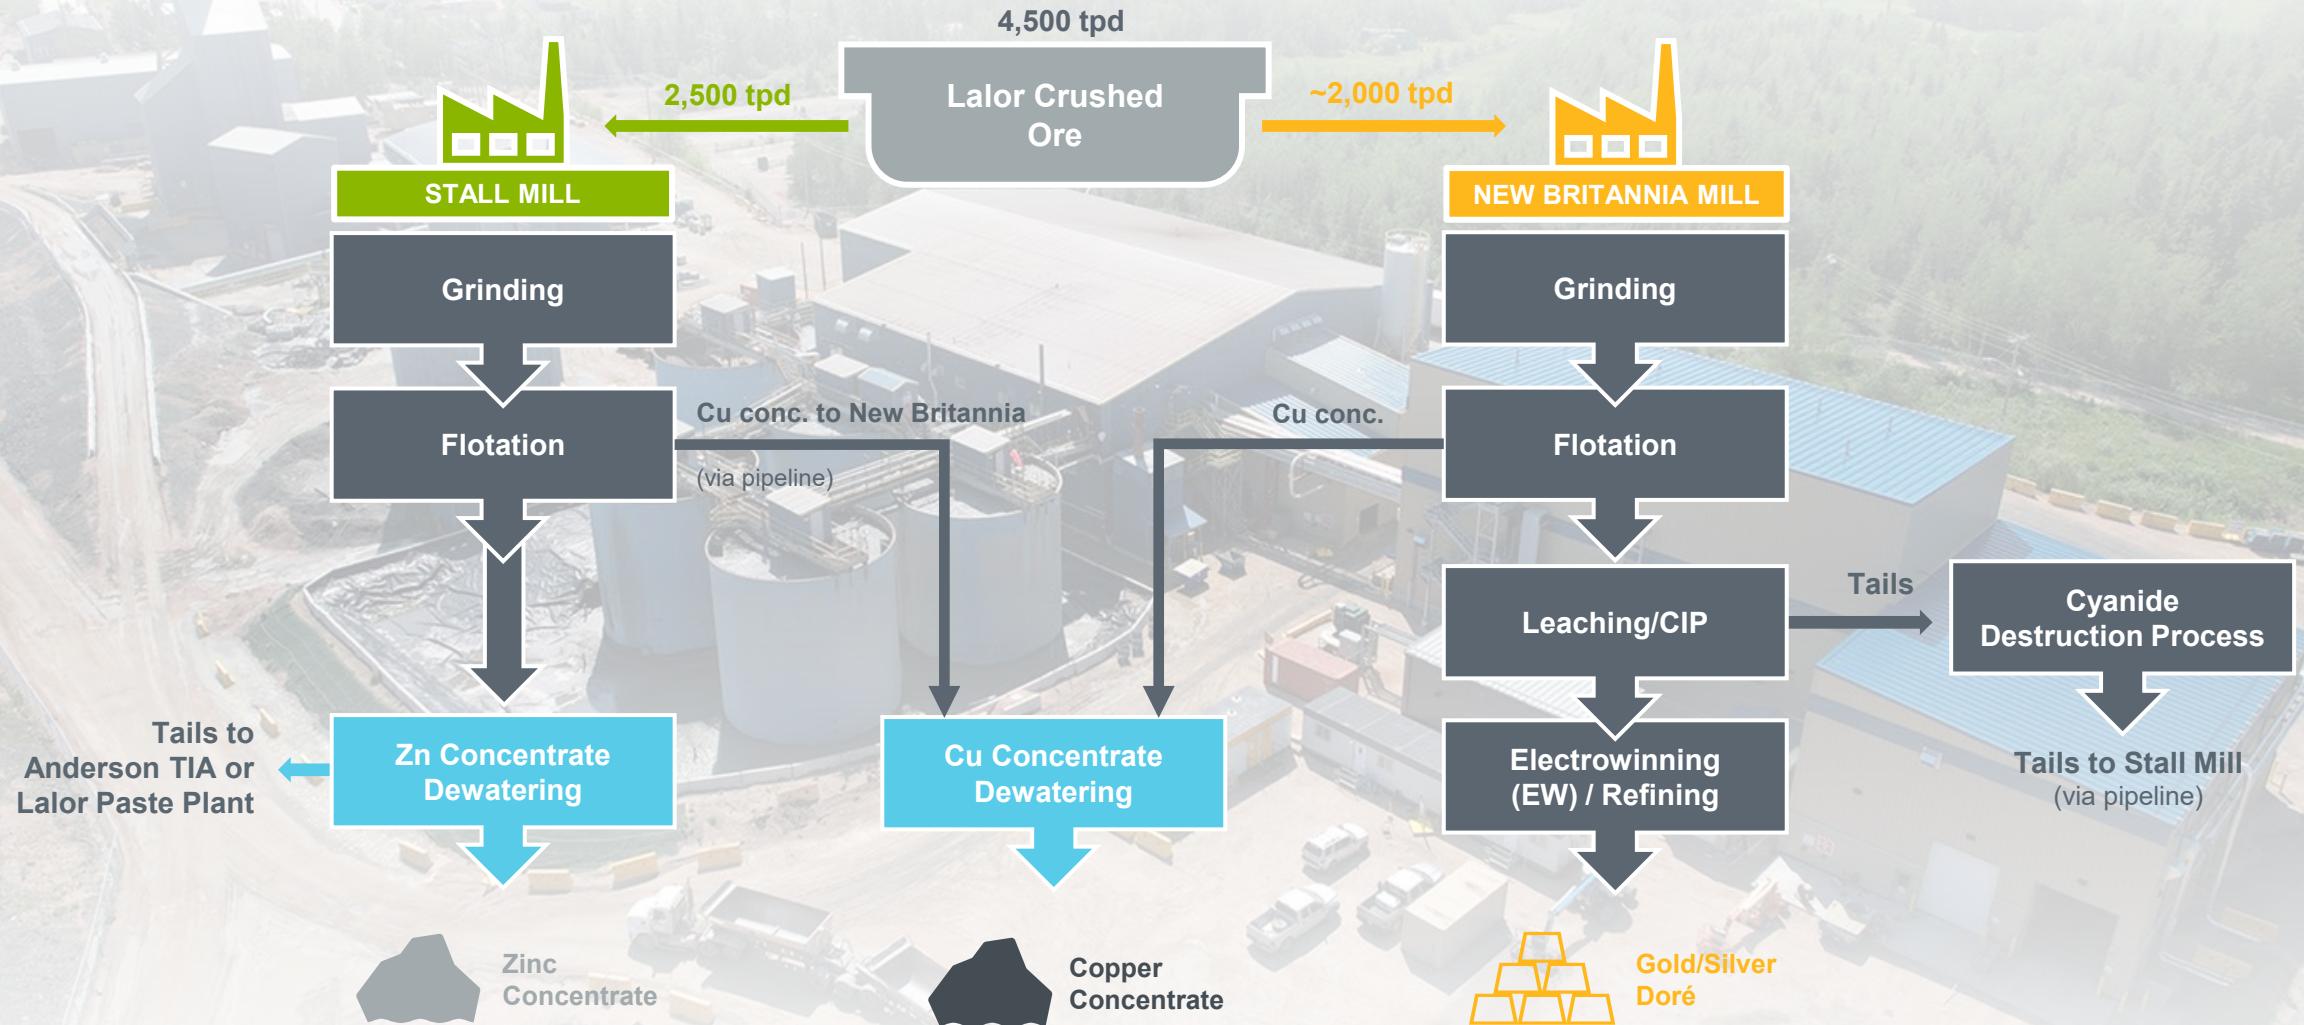

SNOW LAKE OPERATIONS <sup>1</sup>	2023A	2024A	2025A <sup>3</sup>	2026 <sup>3</sup>	2027 <sup>3</sup>	2028-2037 Avg.
<b>CONTAINED METAL IN CONCENTRATE AND DORÉ</b>						
Au Production (000s ounces)	187	214	173	170 – 210	170 – 210	54
Ag Production (000s ounces)	852	995	800	750 – 950	1,000 – 1,200	340
Cu Production (000s tonnes)	12	13	9	11 – 13	12 – 14	6
Zn Production (000s tonnes)	35	33	18	21 – 25	21 – 27.5	20
<b>CAPITAL EXPENDITURES<sup>2</sup></b>

# 1901 Development & Exploration Drift

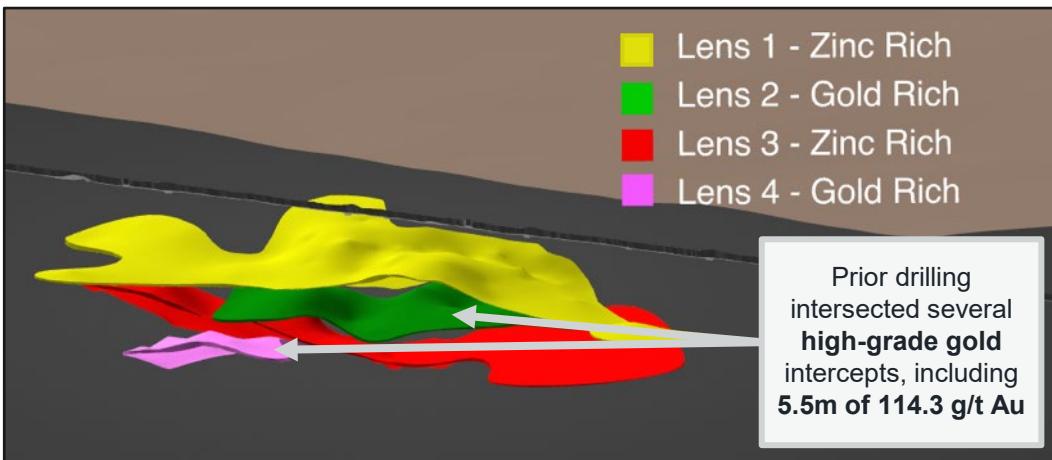

## ADVANCING ACCESS TO THE 1901 DEPOSIT FOR EXPLORATION AND FUTURE MINE DEVELOPMENT

The 1901 deposit was discovered in 2019 and is located within 1,000 metres of the Lalor underground ramp. Pre-feasibility studies in 2021 resulted in a mineral reserve and resource estimate with base metal and gold lenses.

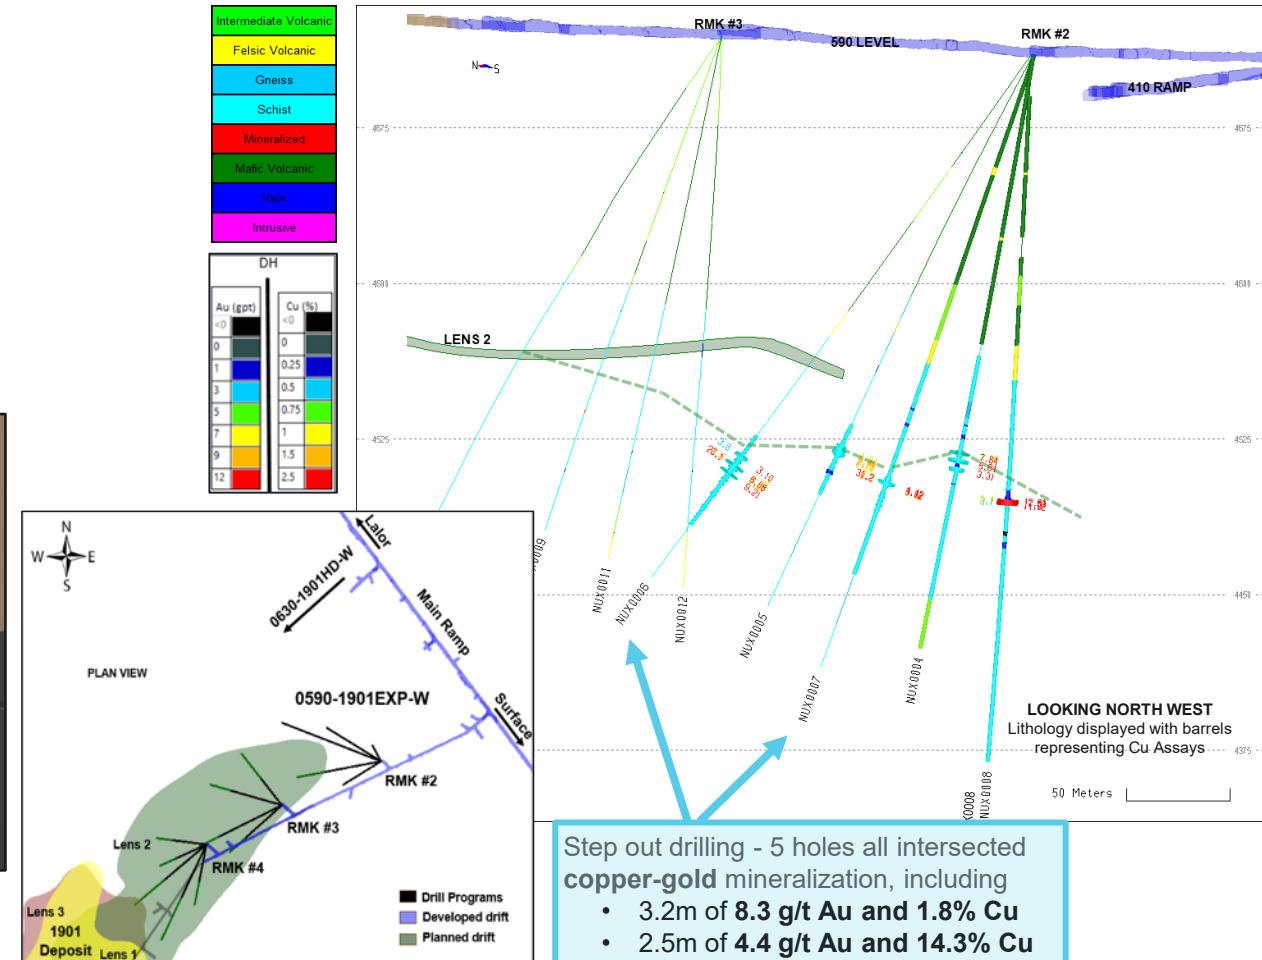

### 2024 ACCESS DRIFT DEVELOPMENT

- Development reached first zinc ore in Q2 2025.
- Initiated the development of an adjacent haulage drift to de-risk planned full production in 2027.
- 2024 step out drilling confirmed Cu-Au mineralization extends down plunge. Additional exploration drilling planned for 2025 to potentially extend orebody geometry and convert inferred.

### 1901 MINERALIZED LENSES

### EXPLORATION STEP OUT DRILLING<sup>1</sup>

# Talbot Copper-Zinc Project

## DRILL PROGRAM STARTED IN JULY WITH FIRST THREE HOLES ALL RETURNING POSITIVE RESULTS

ROCKCLIFF PREVIOUSLY DISCLOSED MINERAL RESOURCE ESTIMATE*	Tonnes (Kt)	Cu (%)	Au (g/t)	Zn (%)	Ag (g/t)
Talbot – Indicated Resources	2,190	2.33	2.1	1.79	36.0
Talbot – Inferred Resources	2,450	1.13	1.9	1.74	25.8

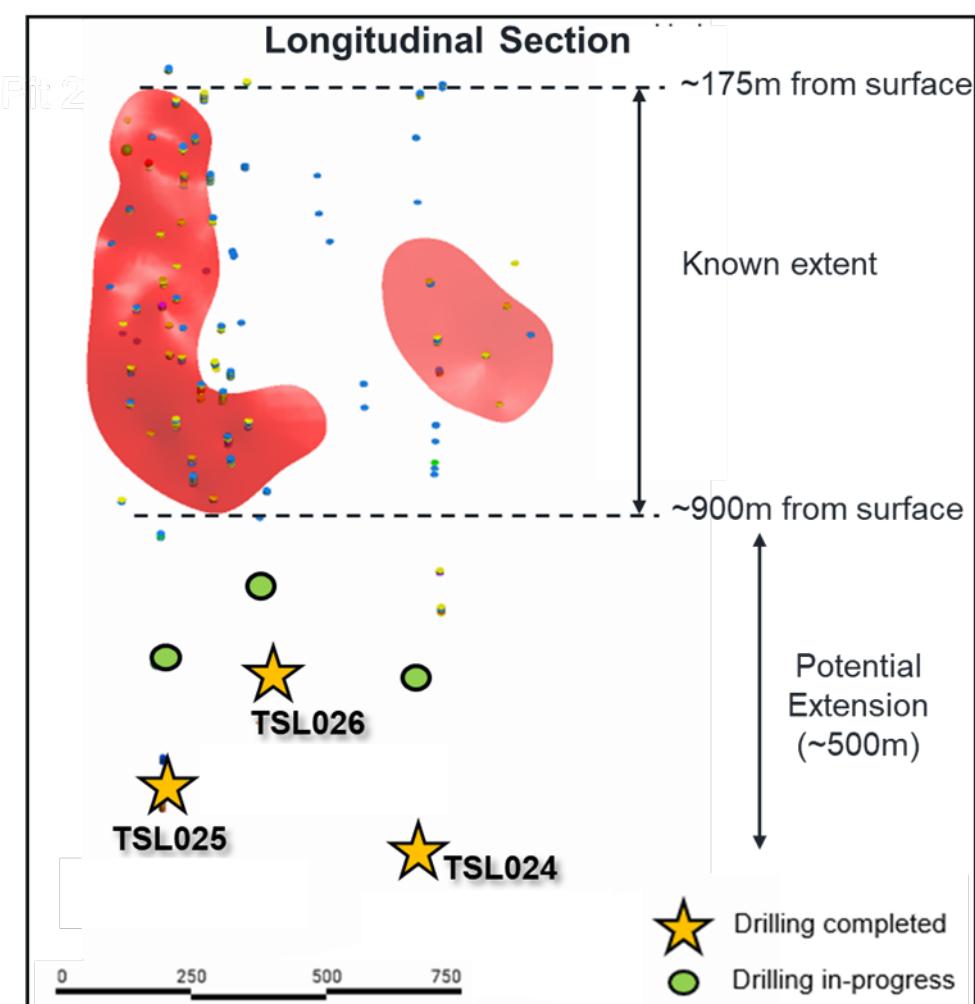

- Talbot is a **copper-zinc-gold deposit**, acquired in 2023 and is 100% owned by Hudbay.
- Talbot's **proximity to existing processing infrastructure in Snow Lake** makes it ideal additional ore feed to utilize the available processing capacity at the Stall mill.
- **Strengthening local Indigenous partnerships** through a Talbot exploration agreement signed with Mosakahiken Cree Nation in April 2025.

### 2025 TALBOT DRILLING PROGRAM

- Exploration underway to upgrade and expand the current resource with **4 drill rigs currently turning**.
- **Phase 1 (underway):** ~10 holes anticipated to be completed by the end of 2025.
  - Positive results from core logging on the initial 3 holes (TSL024, TSL025, TSL026) have established that typical Talbot Cu-Au mineralization continues at depth (assay results pending).
  - Fourth rig testing an electromagnetic anomaly ~2km NW of Talbot.
  - Testing the continuity of mineralization at depth will determine the future scope of a pre-feasibility study ("PFS"), i.e. shaft vs ramp access.
- **Phase 2:** Expected to commence in January 2026.
  - Complete infill and extension drilling to support the PFS.
  - Update the Rockcliff mineral resource estimate using Hudbay standard methods that have demonstrated high reserve conversion rates.

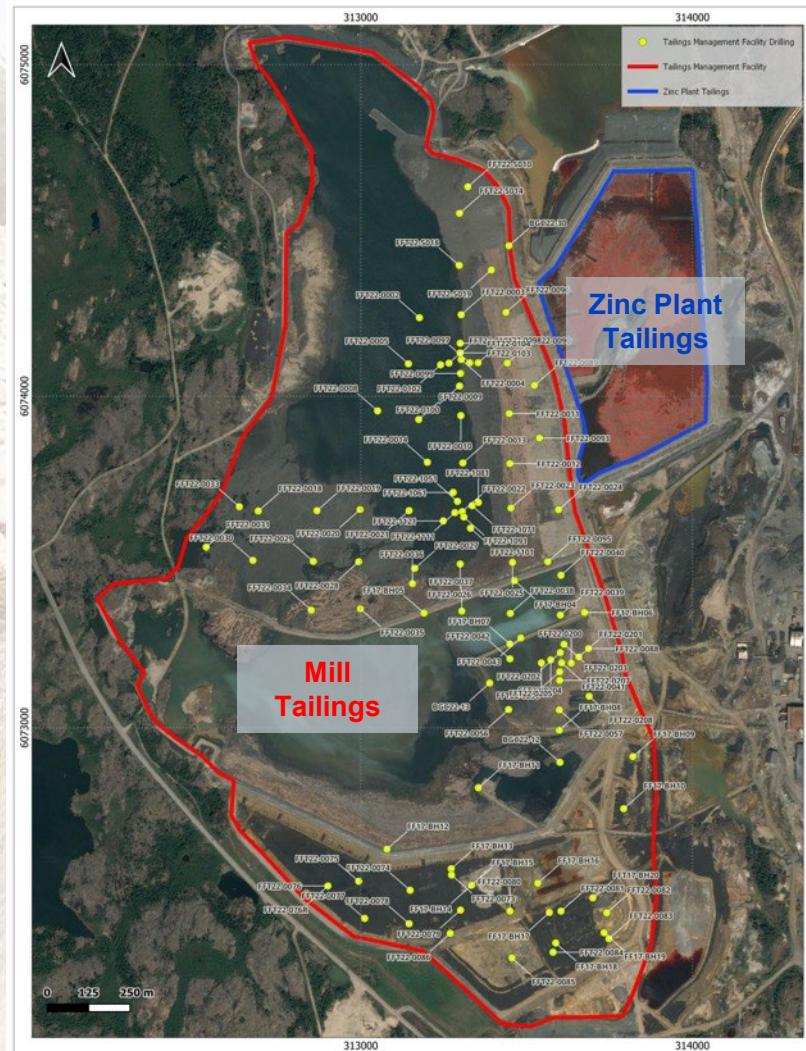

\*Note: Hudbay previously owned a 51% interest in the Talbot project until consolidating a 100% interest with the acquisition of Rockcliff Metals Corp. in Sept. 2023. The above resource estimate includes 100% of the Talbot mineral resources reported by Rockcliff in its 2020 NI 43-101 technical report published on SEDAR+. Mineral resources are exclusive of mineral reserves and do not have demonstrated economic viability. Mineral resources do not include factors for mining recovery or dilution.

### 2025 DRILLING TARGETS

# Flin Flon Growth Opportunities

## GROWTH POTENTIAL THROUGH TAILINGS REPROCESSING OPPORTUNITY AND EXPLORATION PARTNERSHIP

### ZINC PLANT TAILINGS REPROCESSING

- Opportunity to reprocess the tailings from the hydrometallurgical zinc facility where high grade gold and critical minerals tailings were deposited for more than 25 years.
- Drilling completed in 2023 and advancing preliminary economic studies for the potential development of Tailing Reprocessing Facility utilizing existing infrastructure.
- Potential products include copper, zinc, gold and silver doré, as well as molten elemental sulfur, gallium and germanium.

### EXPLORATION PARTNERSHIP WITH MARUBENI

- In March 2024, signed 5-year option agreement with Marubeni focused on three projects within trucking distance of Hudbay's processing facilities in Flin Flon.
- Marubeni will fund up to C\$12M in exploration activities carried out by Hudbay.
- All three properties host past producing mines with attractive copper and gold grades and remain highly prospective for further mineral discoveries.

### MILL TAILINGS REPROCESSING

- Opportunity to reprocess Flin Flon tailings where more than 100Mt of tailings have been deposited over 90 years.
- Potential for additional metal production while reducing long-term reclamation liabilities by reducing acid-generating tailings.
- 2022 drilling indicated higher zinc, copper and silver grades than historical records
- Additional work underway to determine reprocessing methodology and economic viability.

# Copper Mountain Mine Plan

## 19-YEAR MINE PLAN BASED ON PROJECT AND PROBABLE RESERVES ONLY

Updated mine plan for Copper Mountain operations reflects mine stabilization plan advancements and increased mine productivity.

COPPER MOUNTAIN OPERATIONS	2024A	2025A <sup>5</sup>	2026 <sup>5</sup>	2027 <sup>5</sup>	2028-2043 Avg.*	LOM Total*
<b>CONTAINED METAL IN CONCENTRATE</b>						
Cu Production (000s tonnes)	26	24	30 – 45	50 – 70	37	783
Au Production (000s ounces)	20	20	20 – 30	30 – 45	50	935
Ag Production (000s ounces)	280	253	230 – 345	455 – 680	240	5,590
<b>CAPITAL EXPENDITURES (US \$M)</b>						
Sustaining Capital, after capitalized stripping <sup>1</sup>	\$123	\$135	\$112	\$59	\$48	\$1,106
Growth Project Capital	\$8	\$75	\$69	\$6	-	\$126
<b>COPPER CASH COSTS (US\$/LB CU)</b>						
Cash Cost, net of by-product credits <sup>3</sup>	\$2.74	\$2.45 - \$3.45	\$1.89	\$1.90	\$1.83	\$1.84
Sustaining Cash Cost, net of by-product credits (excl. discretionary stripping) <sup>3,4</sup>	\$5.29	\$3.40*	\$2.74	\$2.45	\$2.41	\$2.53

\*Source: December 2023 Copper Mountain mine operations 43-101 technical report and company's updated guidance announced on March 27, 2025; Note that Sustaining Cash Cost in 2025 from the 43-101 does not align with updated Cash Cost guidance. Totals may not add up correctly due to rounding. "LOM" refers to life-of-mine total.

1. Sustaining capital includes capitalized stripping.
2. Discretionary capitalized stripping based on 2023 43-101 technical report. Relates to a portion of accelerated stripping activities over 2024-2026 to access higher grade ore. Could be reduced or deferred to a later date based on further geotechnical evaluation and other considerations.
3. By-product credits calculated using the following commodity prices and foreign exchange assumptions: \$1,900 per ounce for 2025, \$1,800 per ounce for 2026, \$1,764 per ounce for 2027, \$1,725 per ounce for 2028 and \$1,700 per ounce long-term; silver price of \$24.00 per ounce for 2025 and 2026, \$23.75 per ounce for 2027, \$23.38 per ounce for 2028 and \$23.00 per ounce long-term; C\$/US\$ exchange rate of 1.35 in 2024 and 1.33 in 2025 onwards.
4. Sustaining capital guidance includes capitalized stripping and discretionary stripping; while it excludes right-of-use lease additions and additions as a result of equipment financing arrangements and non-cash deferred stripping. Cash costs and sustaining cash costs are non-GAAP financial performance measures. For further details on cash costs please refer to MD&A for the period ended December 31, 2024.
5. British Columbia full year production for 2025 includes fourth quarter production that is preliminary in nature and may be subject to change, as disclosed in news release dated January 16, 2025. See "Disclaimer Regarding Preliminary Financial Information" for further information. Cash cost guidance range shown for 2025 based on news release dated February 19, 2025. Guidance range for 2026 and 2027 production based on news release dated March 27, 2025.

# Copper Mountain Value Creation

## IMPROVING RELIABILITY AND OPTIMIZING OPERATIONS TO DRIVE SUSTAINABLE LONG-TERM VALUE

### STABILIZATION

Exceeded \$10 million annual corporate synergies target

#### ✓ Increased mining activities

- Fleet ramp-up plan to remobilize idle haul trucks, 28 trucks remobilized in 2023, and 5 additional trucks added in 2024
- Executing accelerated stripping campaign to drive improved flexibility in the mine with additional mining faces

#### ✓ On track to achieve operating efficiencies and achieved corporate synergies

- On track to generate annual operating efficiencies through improvements in copper recovery, throughput rates and lower combined unit operating costs
- Improved mill reliability
- Achieved annual corporate synergies target ahead of schedule

### OPTIMIZATION

Accessing higher grades and increasing mill throughput to drive higher production

#### ✓ Accelerated stripping to access higher grades

- 3-year campaign of accelerated stripping to access higher grade ore and mitigate the prior reduced stripping

#### ✓ Improved mill throughput and recoveries

- Advancing mill project to increase mill throughput in H2 2025 and ramp up to 50,000 tpd in 2026
- The mine plan assumes ~\$75M total growth capital spending in 2025
- Mill recoveries have improved with changes to the flotation reagents and replacement of key pumps and expected to further improve with a more consistent ore feed grade

### CONSOLIDATION

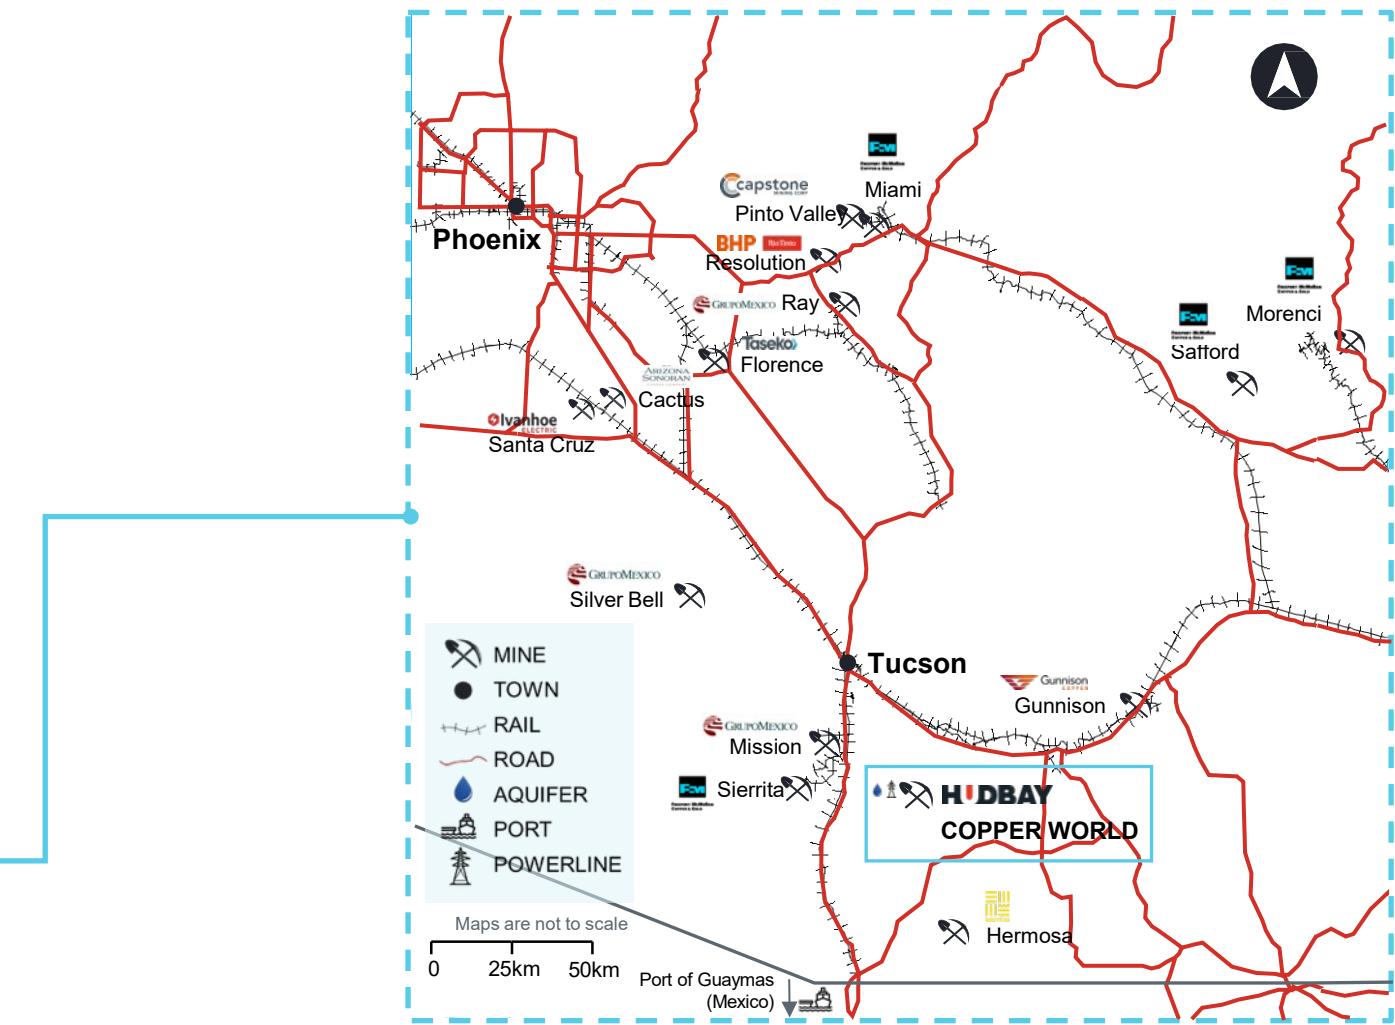

Consolidated 100% ownership of Copper Mountain in April 2025

#### ✓ Highly accretive transaction to acquire MMC 25% stake in Copper Mountain

- Further increase Hudbay's exposure to a long-life, high quality copper asset in tier-1 jurisdiction
- Resulting in 200% increase in attributable copper production in 2027 compared to 2024
- Reinforces Hudbay's position as the 2<sup>nd</sup> largest copper producer in Canada

# Arizona – U.S. Business Unit

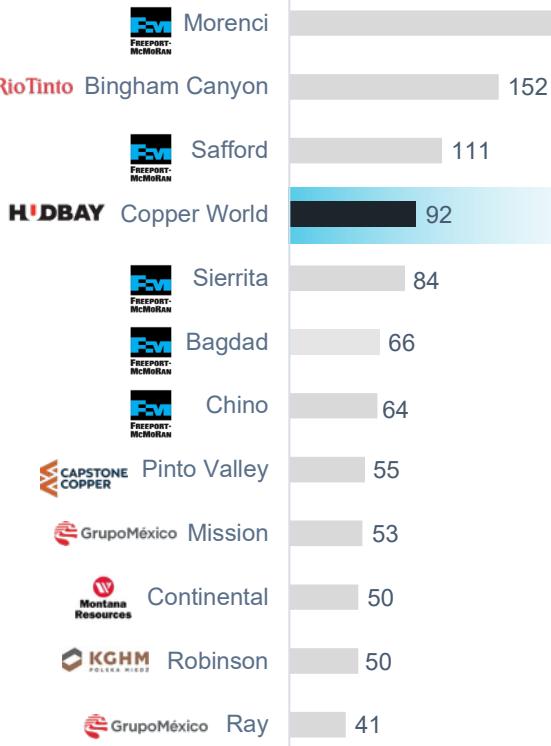

COPPER WORLD IS A LARGE SCALE, HIGH-GRADE OPEN PIT COPPER PROJECT WITH ATTRACTIVE ECONOMICS

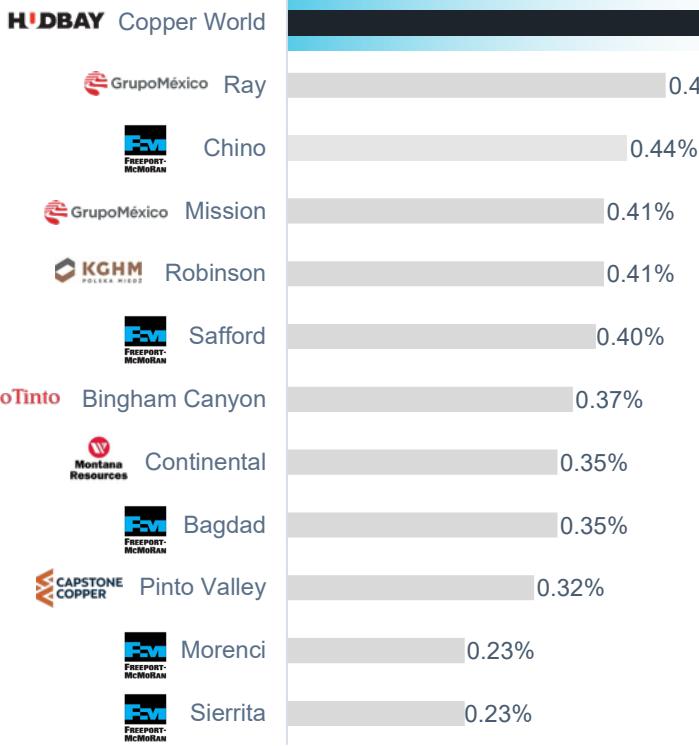

# U.S. Open Pit Copper Benchmarking

WILL BE ONE OF THE LARGEST OPEN PIT COPPER MINES IN THE U.S. WITH LOW CASH COSTS

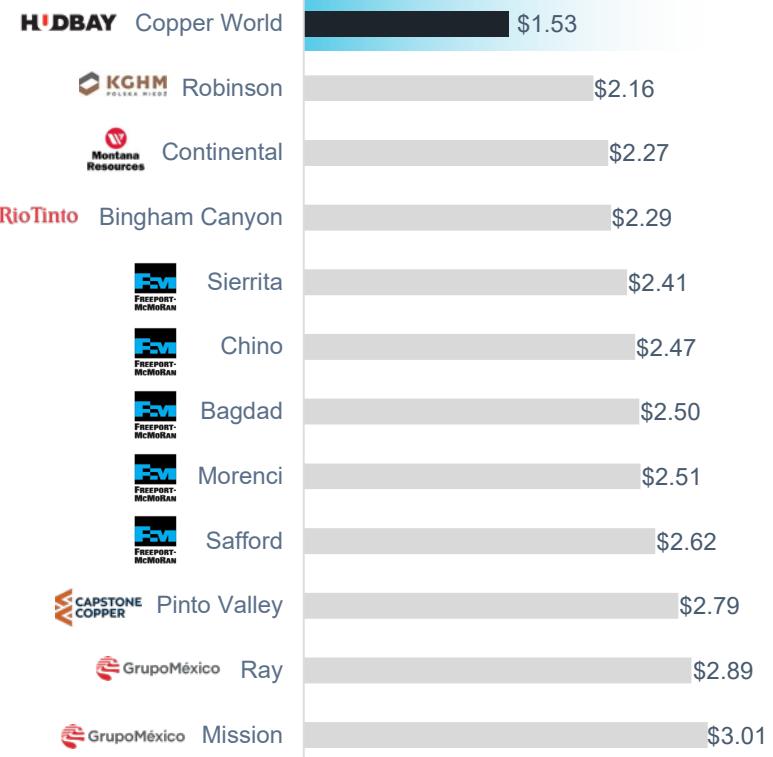

## ANNUAL PRODUCTION (KT CU)

## RESERVE GRADE (% CU)

## CASH COSTS (US\$/LB CU)

Largest Producing Asset in the U.S. Not held by a Major

One of the Highest-Grade Open Pit Copper Assets in the U.S.

Cost Base Compares Favourably to Operating Mines

1. Based on Phase I of mine plan as disclosed in the 2023 PFS. Resource shown inclusive of reserves. Initial capital expenditures shown net of equipment financing.

2. Calculated using initial capital cost estimates net of the precious metal stream proceeds divided by average annual copper production.

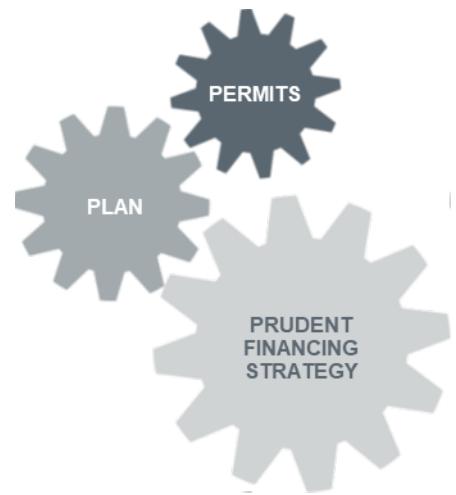

For further information please refer to Hudbay's news release dated September 8, 2023, announcing the PFS results. Tonnes shown are metric tonnes.

\*"stpd" = short tons per day

# Achieved “3-P” Plan for Copper World

## FULLY PERMITTED U.S. COPPER PROJECT WITH PRUDENT FINANCING IN PLACE

In late 2022, Hudbay unveiled a prudent financial plan with three key prerequisites to be achieved for a potential project sanctioning.

OBJECTIVE	COMPLETED				TO COME
	2022	2023	2024	2025	
PERMITS					
Receipt of all state level permits* required for Phase I	✓ MLRP Approved (Jul. '22)	✓ MLRP Upheld (May '23)	✓ APP (Aug. '24)	✓ AQP (Jan. '25)	POTENTIAL SANCTIONING DECISION 2026
PLAN					
Definitive feasibility study with IRR >15%	✓ PEA (Jun. '22) IRR 17%	✓ PFS (Sept. '23) IRR 19%			DFS mid-2026 ahead of sanction
PRUDENT FINANCING					
Leverage Net Debt/EBITDA <1.2x	2.0x ratio (Dec. '22)	1.6x ratio (Dec. '23)	✓ 0.6x ratio (Dec. '24)	✓ 0.5x ratio (Sept. '25) <sup>1</sup>	
Cash Minimum \$600M balance	\$226M (Dec. '22)	\$250M (Dec. '23)	\$582M (Dec. '24)	✓ \$611M (Sept. '25) <sup>2</sup>	
Joint Venture Partner		Relationship building with potential partners	✓ Initiate JV Process	✓ Secured JV Partner	
Stream Partner Renegotiate Wheaton precious metals stream				✓ Revised Stream Agreement <sup>3</sup>	
Project-level Debt Limited (<\$500M) non-recourse financing			Reduced the targeted project-level debt to \$350M		Secure project level financing mid-2026

\*State level permits referenced Mined Land Reclamation Permit (“MLRP”), Arizona Department of Environmental Quality (ADEQ) Air Quality Permit (“AQP”) and Aquifer Protection Permit (“APP”).  
LTM = Last Twelve Months.

1. Adjusted EBITDA is based on trailing twelve months for each period. Net Debt to Adjusted EBITDA calculation based on most recent company public filings available as of November 12, 2025.

2. Cash and cash equivalents and available based on most recent company public filings available as of November 12, 2025.

3. Pending execution of the definitive agreement. Agreed on terms with Wheaton Precious Metals to amend the existing precious metals streaming agreement as disclosed in the news release dated August 13, 2025.

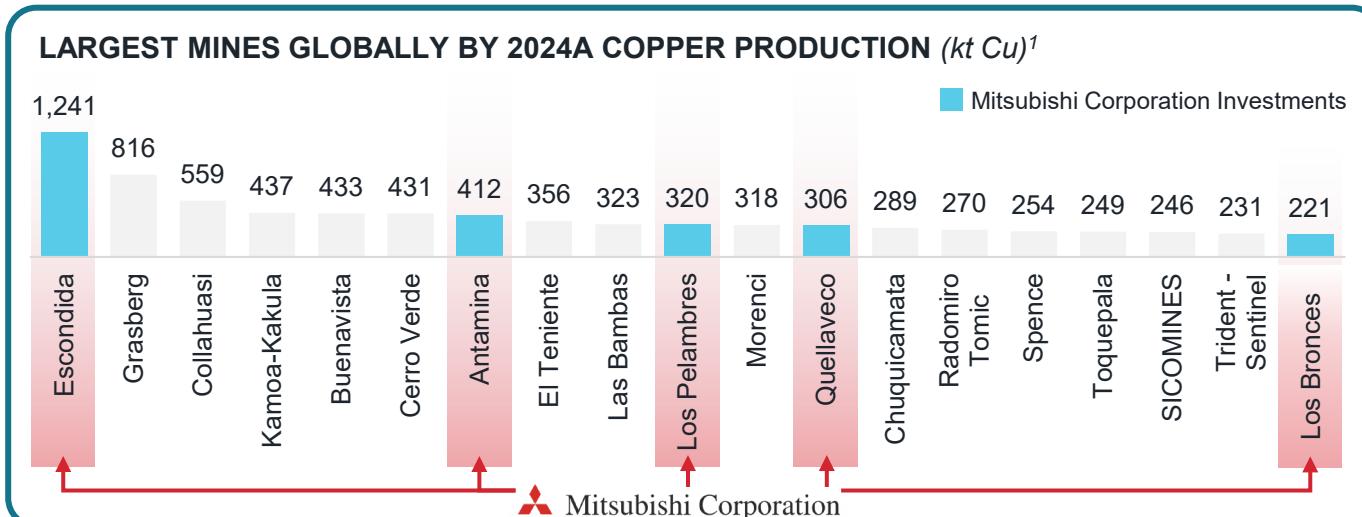

# Mitsubishi Corporation: Premier Strategic Partner

Mitsubishi Corporation

## LARGEST JAPANESE TRADING HOUSE & EXPERIENCED JV PARTNER AT WORLD-CLASS COPPER MINES

- Mitsubishi (~\$80B market cap) is a globally integrated trading and investment company that develops and operates businesses across multiple industries.
- As one of the largest Japan's major trading houses, it is the premier strategic partner of choice with current investments in five of the top twenty copper mines globally<sup>1</sup>.
  - Targeting equity copper production of over 400kt beyond 2030.
- Wholly-owned U.S. subsidiary, Mitsubishi Corp. (Americas), operates across various business sectors, including mineral resources, oil & gas, real estate, mobility, food, power, etc.
  - Manages the company's strategic investments with approximately \$9 billion in total assets and trading businesses in North America.

### Copper Investments

**Mitsubishi has minority stakes in some of the largest and highest-quality copper assets globally through partnerships with the largest global diversified miners**

**Antamina**  
Ancash Region, Peru  
Initial Investment: 1999

**Operating Mine**  

- 10% asset interest
- ~400ktpa Cu

**BHP Teck GLENCORE**

**Quellaveco**  
Moquegua Region, Peru  
Initial Investment: 2012

**Operating Mine**  

- 40% asset interest
- ~300ktpa Cu

**AngloAmerican**

**Copper World**  
Pima County, Arizona, U.S.  
Initial Investment: 2025

**Development Project**  

- 30% asset interest
- ~92ktpa Cu<sup>2</sup>

**Represents latest addition to Mitsubishi's world-class portfolio of large and high-quality copper assets**

**Operating Mine**  

- 8.25% asset interest
- +1Mtpa Cu
- World's #1 Cu mine

**BHP RioTinto**

**Operating Mine**  

- 5% asset interest
- ~300ktpa Cu

**ANTOFAGASTA PLC**

**Operating Mine**  

- 20.4% asset interest
- ~200ktpa Cu

**AngloAmerican**

Copper World represents Mitsubishi Corporation's first major copper investment since 2018

Source: Corporate disclosure; FactSet as of August 2025. Production figures are shown on a 100% consolidated basis. Listed assets include primary copper investments.

1. Based on mines with reported actual copper production for 2024.

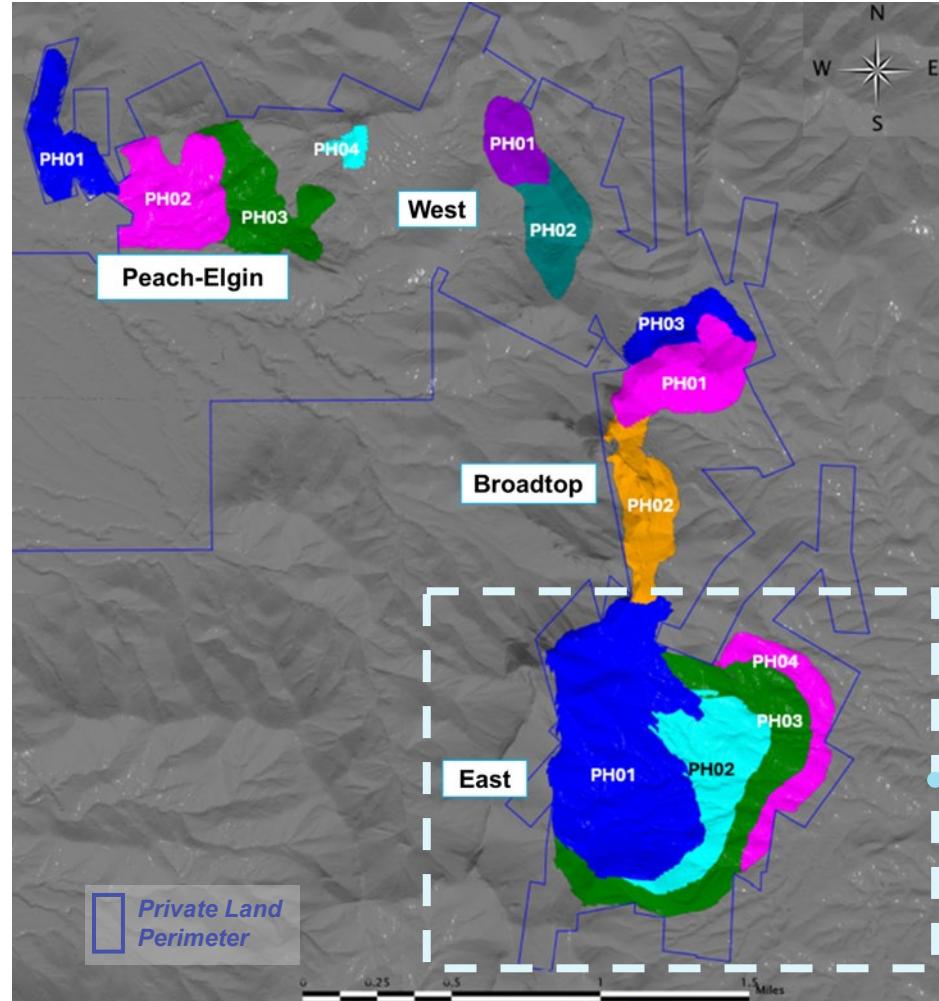

2. Based on Phase I average annual copper production for first 10 years in operation as disclosed in the 2023 PFS. Includes copper contained in concentrate sold and copper cathode produced from the concentrate leach facility.

TSX & NYSE: HBM

**HUDBAY**

# Copper World Reserves and Resources

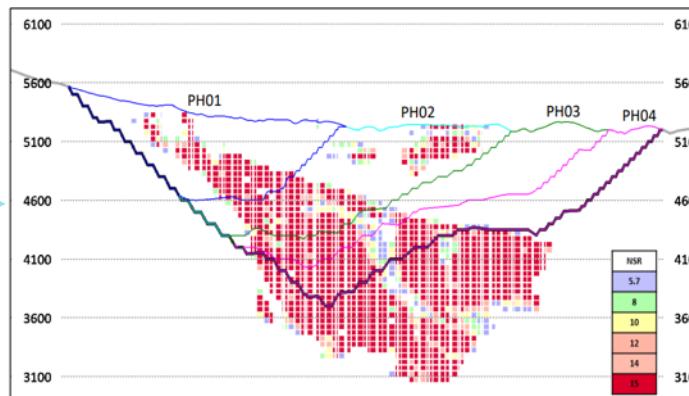

RESERVES REPRESENT 30% OF M&I RESOURCES, OFFERING ROBUST EXPANSION AND MINE LIFE EXTENSION POTENTIAL

## RESERVE AND RESOURCE BASE

- NI 43-101 compliant Reserve and Resource statement supported by extensive drilling totalling 355,371 meters
  - PFS mine plan and reserve and resource statement independently reviewed and validated by leading mining consultant WSP
- Reserves only account for 30% of M&I Resources
  - 83% of Reserves are classified as Proven

## EAST PIT CROSS SECTION (A-A')

Significant resources lie outside of the PFS reserve pits with future opportunity to unlock in Phase II, particularly in the East Pit

Source: 2023 PFS. For further information please refer to Hudbay's news release dated September 8, 2023, announcing the PFS results.

# Designed to Reduce Energy Consumption and GHG Emissions

## “MADE IN AMERICA” COPPER CATHODE TO SUPPORT DOMESTIC U.S. COPPER CONSUMPTION

↓10%

lower energy consumption, including 30% decline related to downstream processing

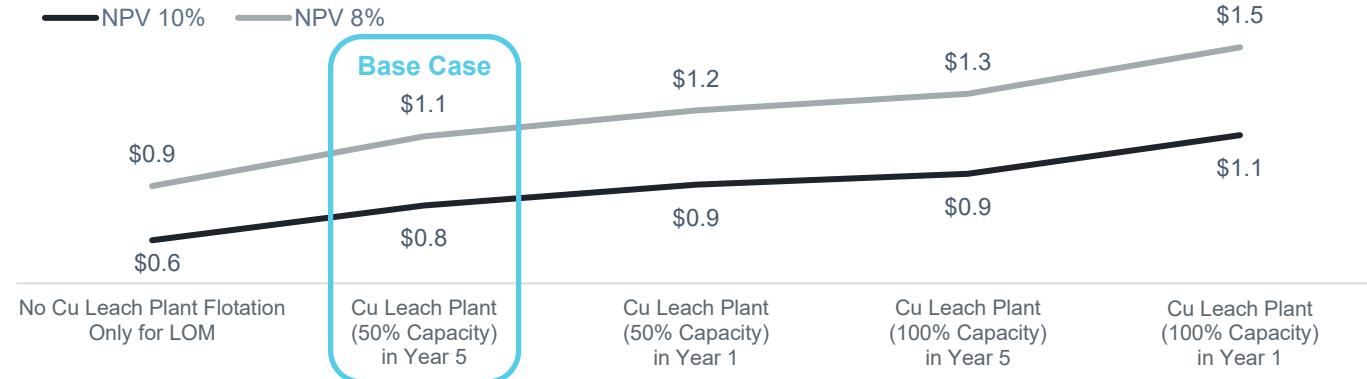

↓14%

reduction in total scope 1, 2 & 3 GHG emissions

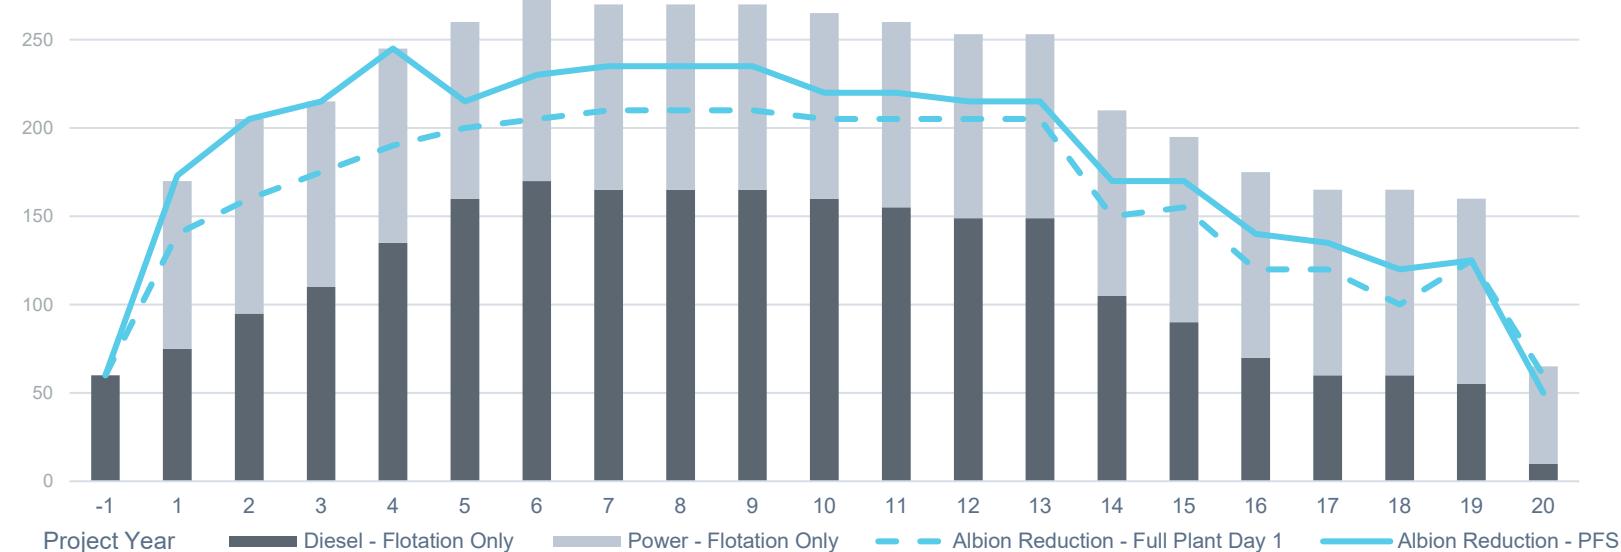

- Copper World copper cathode expected to be sold to domestic U.S. customers.
- Onsite cathode production reduces the operation's total energy consumption, GHG emissions and sulfur (SO<sub>2</sub>) emissions by eliminating overseas shipping, smelting and refining.
- Many local benefits, including over \$850M in U.S. taxes, more than 400 direct jobs and up to 3,000 indirect jobs in Arizona.

### CONCENTRATE LEACH FACILITY SENSITIVITY (\$B)

### GHG EMISSIONS (CO<sub>2</sub>e KT)

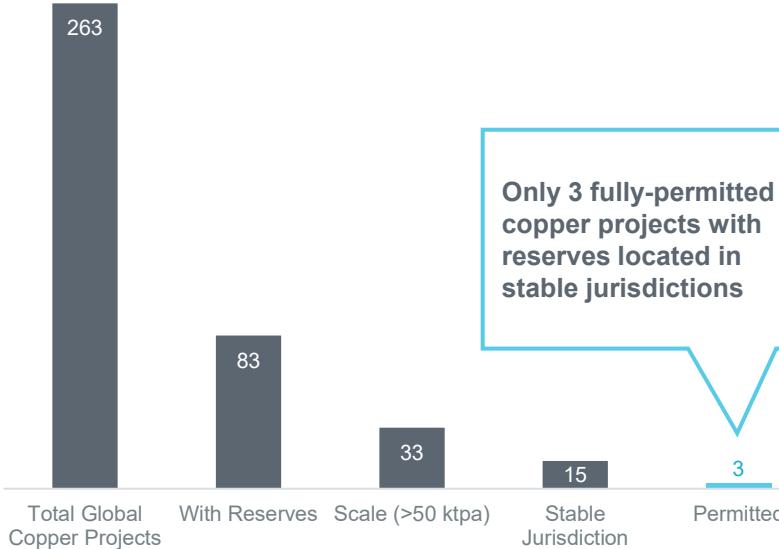

# Scarcity of Permitted Copper Projects

COPPER WORLD IS THE HIGHEST QUALITY, PERMITTED DEVELOPMENT PROJECT IN A STABLE JURISDICTION

★ Best in peer set

## GLOBAL COPPER PROJECT BREAKDOWN

INVESTOR PRESENTATION / JANUARY 2026

Source: Wood Mackenzie, Company public filings, S&P Market Intelligence.

1. Includes Argentina, Australia, Canada, Chile, Peru and the U.S.
2. Copper World metrics based on 2023 PFS. Hudbay current ownership is 100% of Copper World, once the joint venture transaction closes in late 2025 or early 2026, ownership will change to 70% Hudbay, 30% Mitsubishi.
3. Countries are scored based on S&P's 2023 sovereign risk indicators on a scale of AAA, AA, A, BBB, BB, B, CCC, and SD, respectively.
4. Commodity contribution based on breakdown of copper equivalent production as calculated applying technical report commodity prices.
5. First ten-years average.
6. As per Wood Mackenzie.
7. Copper World initial capital is shown net equipment financing (US\$167mm).
8. Based on Capstone Copper press release stating attributable capex.
9. Based on Teck press release of attributable capex.

2. Mineral resources do not include factors for mining recovery or dilution.
3. Gold mineral resources are estimated based on the assumption that they would be processed at the New Britannia concentrator.
4. Long-term metal prices of \$1,700 per ounce gold, \$1.25 per pound zinc, \$4.00 per pound copper and \$23.00 per ounce silver with an exchange rate of 1.33 C\$/US\$ were used to confirm the economic viability of the mineral reserve estimates.
5. WIM mineral reserves assume processing recoveries of 98% for copper, 88% for gold, and 70% for silver based on processing through New Britannia's flotation and tails leach circuits.
6. 3 Zone mineral reserves assume processing recoveries of 85% for gold based on processing through New Britannia's leach circuit.
7. New Britannia mineral resource estimates have been reported at a minimum true width of 1.5 metres and with a cut-off grade varying from 2 grams per tonne (at the lower part of New Britannia) to 3.5 grams per tonne (at the upper part of New Britannia).

# Snow Lake Reserves & Resources – Other Base Metals (AS AT JANUARY 1, 2025)

BASE METAL MINERAL RESERVE AND RESOURCE ESTIMATES <sup>1,2,3,4,5,6</sup>	CATEGORY	TONNES	Au (g/t)	Zn (%)	Cu (%)	Ag (g/t)
<b>Indicated Resources</b>						
Pen II	Indicated	470,000	0.3	8.89	0.49	6.8
Talbot*	Indicated	2,190,000	2.1	1.79	2.33	36.0
<b>TOTAL INDICATED (BASE METALS)</b>		<b>2,660,000</b>	<b>1.8</b>	<b>3.04</b>	<b>2.01</b>	<b>30.9</b>
<b>Inferred Resources</b>						
Watts	Inferred	3,150,000	1.0	2.58	2.34	31.0
Pen II	Inferred	130,000	0.3	9.81	0.37	6.8
Talbot*	Inferred	2,450,000	1.9	1.74	1.13	25.8
<b>TOTAL INFERRED (BASE METALS)</b>		<b>5,730,000</b>	<b>1.3</b>	<b>2.39</b>	<b>1.78</b>	<b>28.3</b>

Note: totals may not add up correctly due to rounding.

\*Includes 100% of the Talbot mineral resources previously reported by Rockcliff Metals Corp. in its 2020 NI 43-101 technical report published on SEDAR. Hudbay previously owned a 51% interest in the Talbot project until consolidating a 100% interest with the acquisition of Rockcliff in Sept. 2023.

1. Mineral resources are exclusive of mineral reserves and do not have demonstrated economic viability.
2. Mineral resources do not include factors for mining recovery or dilution.
3. Base metal mineral resources are estimated based on the assumption that they would be processed at the Stall concentrator.
4. Watts and Pen II mineral resources were initially estimated using metal price assumptions that vary marginally over the assumptions used to estimate mineral resources at Lalor. In the Qualified Person's opinion, the combined impact of these small variations does not have any impact on the mineral resource estimates.
5. Watts mineral resources are estimated using a minimum NSR cut-off of C\$150 per tonne, assuming processing recoveries of 90% for copper, 80% for zinc, 70% for gold and 70% for silver.
6. Pen II mineral resources are estimated using a minimum NSR cut-off of C\$75 per tonne.

# B.C. Mineral Reserves & Resources (AS AT JANUARY 1, 2025)

75

MINERAL RESERVE AND RESOURCE ESTIMATES <sup>1,2,3,4,5,6</sup>	TONNES	Cu (%)	Au (g/t)	Ag (g/t)
<b>Reserves</b>				
Proven	172,900,000	0.269	0.124	0.72
Probable	173,100,000	0.222	0.109	0.62
<b>TOTAL PROVEN AND PROBABLE</b>	<b>346,000,000</b>	<b>0.245</b>	<b>0.116</b>	<b>0.67</b>
<b>Resources</b>				
Measured	31,900,000	0.213	0.092	0.72
Indicated	92,800,000	0.209	0.109	0.66
<b>TOTAL MEASURED AND INDICATED</b>	<b>124,700,000</b>	<b>0.210</b>	<b>0.105</b>	<b>0.68</b>

Note: totals may not add up correctly due to rounding.

1. Mineral resource estimates are exclusive of mineral reserves. Mineral resources are not mineral reserves as they do not have demonstrated economic viability.
2. Mineral reserves are estimated using a 0.1% copper cut-off grade and assuming metallurgical recoveries (applied by ore type) of 86% for copper, and 68% for gold and silver on average for the life of mine.
3. Long term metal prices of \$4.15 per pound copper, \$1,900 per ounce gold and \$23.00 per ounce silver were used to confirm the economic viability of the mineral reserve estimates and to estimate mineral resources.
4. Mineral resource estimate tonnes and grades constrained to a Lerch Grossman revenue factor 1 pit shell.
5. Mineral resources are estimated using 0.1% copper cut-off grade.
6. Mineral reserve and resource estimates presented on a 100% basis.

<b>TOTAL INFERRED</b>		<b>275,000,000</b>	<b>0.32</b>	<b>0.11</b>	<b>82</b>	<b>0.01</b>	<b>2.2</b>

Note: totals may not add up correctly due to rounding.

1. Mineral resource estimates are exclusive of mineral reserves. CIM definitions were followed for the estimation of mineral resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
2. Long term metal prices of \$4.00 per pound copper, \$12.00 per pound molybdenum, \$1,700 per ounce gold and \$23.00 per ounce silver were used to confirm the economic viability of the mineral reserve estimates.
3. Mineral reserve estimates are limited to the portion of the measured and indicated resource estimates scheduled for milling and included in the financial model of the Copper World PFS.
4. Mineral resources are constrained within a computer-generated pit using the Lerchs-Grossman algorithm.
5. Mineral resource estimates were reported using a 0.1% copper cut-off grade and an oxidation ratio lower than 50% for flotation material and a 0.1% soluble copper cut-off grade and an oxidation ratio higher than 50% for leach material.
6. Long-term metals prices of \$3.75 per pound copper, \$12.00 per pound molybdenum, \$1,650 per ounce gold and \$22.00 per ounce silver were used to estimate mineral resources.
7. Estimate of the mineral reserve does not account for marginal amounts of historical small-scale operations in the area that occurred between 1870-1970 and is estimated to have extracted approx. 200,000 tonnes, which is within rounding of the current reserve estimates.

# Mason Mineral Resources

(AS AT JANUARY 1, 2025)

MINERAL RESOURCE ESTIMATES <sup>1,2,3,4,5</sup>		TONNES	Cu (%)	Mo (g/t)	Au (g/t)	Ag (g/t)
Mason	Measured	1,417,000,000	0.29	59	0.031	0.66
	Indicated	801,000,000	0.30	80	0.025	0.57
<b>TOTAL MEASURED AND INDICATED</b>		<b>2,219,000,000</b>	<b>0.29</b>	<b>67</b>	<b>0.029</b>	<b>0.63</b>
Mason	Inferred	237,000,000	0.24	78	0.033	0.73

Note: totals may not add up correctly due to rounding.

1. Mineral resource estimates that are not mineral reserves do not have demonstrated economic viability.
2. Mineral resource estimates do not include factors for mining recovery or dilution.
3. Metal prices of \$NS3.10 per pound copper, \$11.00 per pound molybdenum, \$1,500 per ounce gold, and \$18.00 per ounce silver were used to estimate mineral resources.
4. Mineral resources are estimated using a minimum R cut-off of \$6.25 per tonne.
5. Mineral resources are based on resource pit designs containing measured, indicated, and inferred mineral resources.

# Llaguen Mineral Resources

(AS AT JANUARY 1, 2025)

MINERAL RESOURCE ESTIMATES <sup>1,2,3,4,5,6</sup>	TONNES	Cu (%)	Mo (g/t)	Au (g/t)	Ag (g/t)	CuEq (%)
<b>Indicated Global (≥ 0.14% Cu)</b>	<b>271,000,000</b>	<b>0.33</b>	<b>218</b>	<b>0.033</b>	<b>2.04</b>	<b>0.42</b>
Including Indicated High-grade (≥ 0.30% Cu)	113,000,000	0.49	291	0.046	2.73	0.60
<b>Inferred Global (≥ 0.14% Cu)</b>	<b>83,000,000</b>	<b>0.24</b>	<b>127</b>	<b>0.024</b>	<b>1.47</b>	<b>0.30</b>
Including Inferred High-grade (≥ 0.30% Cu)	16,000,000	0.45	141	0.038	2.60	0.52

Note: totals may not add up correctly due to rounding.

1. CIM definitions were followed for the estimation of mineral resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
2. Mineral resources are reported within an economic envelope defined by a pit shell optimization algorithm. This pit shell is defined by a revenue factor of 0.33 assuming operating costs adjusted from Hudbay's Constancia open pit operation.
3. Long-term metal prices of \$3.60 per pound copper, \$11.00 per pound molybdenum, \$1,650 per ounce gold and \$22.00 per ounce silver were used for the estimation of mineral resources.
4. Metal recovery estimates assume that this mineralization would be processed at a combination of facilities, including copper and molybdenum flotation.
5. Copper-equivalent ("CuEq") grade is calculated assuming 85% copper recovery, 80% molybdenum recovery, 60% gold recovery and 60% silver recovery.
6. Specific gravity measurements were estimated by industry standard laboratory measurements.

# Additional Information

The reserve and resource estimates included in this presentation were prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) and the Canadian Institute of Mining, Metallurgy and Petroleum Standards on Mineral Resources and Reserves: Definitions and Guidelines.

The mineral resource estimates in this presentation are exclusive of mineral reserves. Mineral resources that are not mineral reserves do not have demonstrated economic viability. The totals in the tables may not add up correctly due to rounding.

The technical and scientific information in this presentation related to the Constancia mine, Snow Lake operations and Copper World project has been approved by Olivier Tavchandjian, P. Geo., Senior Vice President, Exploration and Technical Services. The technical and scientific information in this presentation related to the Copper Mountain mine has been approved by Marc-Andre Brulotte, P. Geo., Director, Global Exploration and Resource Evaluation. Messrs. Tavchandjian and Brulotte are qualified persons pursuant to NI 43-101.

Additional details on the company's material mineral projects, including a year-over-year reconciliation of reserves and resources and metal price assumptions, is included in Hudbay's Annual Information Form for the year ended December 31, 2024, which is available on SEDAR+ at <http://www.sedarplus.ca/>.

With respect to the historical estimate of mineral resources at Caballito and the historical drill results for Maria Reyna, a qualified person has not independently verified this historical data or the associated quality assurance and quality control program for Hudbay and, as such, Hudbay cautions that this information should not be relied upon by investors.

With respect to Hudbay's disclosure herein, the Mason preliminary economic assessment is preliminary in nature, includes inferred resources that are considered too speculative to have the economic considerations applied to them that would enable them to be categorized as mineral reserves and there is no certainty the preliminary economic assessments will be realized. Additional details on the Mason preliminary economic assessment (including assumptions underlying the mineral resource estimates) are included in Hudbay's news release dated April 6, 2021.

This presentation has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of United States securities laws. Canadian reporting requirements for disclosure of mineral properties are governed by NI 43-101. For this reason, the information contained in this presentation containing descriptions of the Company's mineral deposits may not be comparable to similar information made public by United States companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.
