INVESTOR PRESENTATION

NOVEMBER 2025

Cautionary Information

This presentation contains forward-looking information within the meaning of applicable Canadian and United States securities legislation. All information contained in this presentation, other than statements of current and historical fact, is forward-looking information. Often, but not always, forward-looking information can be identified by the use of words such as “plans”, “expects”, “budget”, “guidance”, “scheduled”, “estimates”, “forecasts”, “strategy”, “target”, “intends”, “objective”, “goal”, “understands”, “anticipates” and “believes” (and variations of these or similar words) and statements that certain actions, events or results “may”, “could”, “would”, “should”, “might” “occur” or “be achieved” or “will be taken” (and variations of these or similar expressions). Forward-looking information includes, but is not limited to, the consummation and timing of the JV Transaction, expectations regarding the anticipated benefits of the JV Transaction to Hudbay, Mitsubishi and the United States, the consummation and timing of the DFS, Hudbay’s expectations for the Copper World project, including its project sanctioning timelines, future spending, project economics, future production profile and life of mine plan, and the benefits, timing and consummation of the amended Wheaton Stream. All of the forward-looking information in this presentation is qualified by this cautionary note. Forward-looking information is not, and cannot be, a guarantee of future results or events. Forward-looking information is based on, among other things, opinions, assumptions, estimates and analyses that, while considered reasonable by the company at the date the forward-looking information is provided, inherently are subject to significant risks, uncertainties, contingencies and other factors that may cause actual results and events to be materially different from those expressed or implied by the forward-looking information. The risks, uncertainties, contingencies and other factors that may cause actual results to differ materially from those expressed or implied by the forward-looking information include, but are not limited to, risks associated with satisfying the conditions to the closing of the JV Transaction, including the timing, receipt and any conditions associated with regulatory approvals, risks associated with reaching a definitive agreement with Wheaton in respect of the enhanced precious metals stream as well as those risks that are described under the heading “Risk Factors” in our most recent annual information form for the year ended December 31, 2024 and our management’s discussion and analysis for the three and nine months ended September 30, 2025. Should one or more risk, uncertainty, contingency or other factor materialize or should any factor or assumption prove incorrect, actual results could vary materially from those expressed or implied in the forward-looking information. Accordingly, you should not place undue reliance on forward-looking information. Hudbay does not assume any obligation to update or revise any forward-looking information after the date of this presentation or to explain any material difference between subsequent actual events and any forward-looking information, except as required by applicable law.

This presentation contains certain financial measures which are not recognized under IFRS, such as adjusted net earnings (loss), adjusted net earnings (loss) per share, adjusted EBITDA, net debt, free cash flow, cash cost, sustaining and all-in sustaining cash cost per pound of copper produced, cash cost and sustaining cash cost per ounce of gold produced, combined unit operating costs and any ratios based on these measures. For a detailed description of each of the non-GAAP financial performance measures used in this presentation, please refer to Hudbay’s management’s discussion and analysis for the three and nine months ended September 30, 2025 available on SEDAR+ at www.sedarplus.ca and EDGAR at www.sec.gov.

All amounts in this presentation are in U.S. dollars unless otherwise noted.

better futures for communities.

Diversified Mid-Tier Copper Producer

ANNUAL COPPER PRODUCTION & CASH COSTS^{1,2}

REVENUE AND RESERVES BY METAL

Stable copper production with three operations in tier-1 mining jurisdictions generating significant free cash flow with industry-leading margins.

Industry-leading growth optionality from strong organic pipeline of copper development assets and highly prospective exploration.

Strongest balance sheet with unique gold exposure offering portfolio resilience.

Committed to sustainability by living our values and achieving our social and environmental goals.

- Hudbay's copper production shown for 2025 based on the midpoint guidance range from news release dated February 19, 2025, and 2026 and 2027 based on the midpoint guidance range from news release dated March 27, 2025. Copper production beyond 2027 based on disclosed mine plans in most recent NI 43-101 Technical Reports for Constancia, Lalar and Copper Mountain as well as Copper World PFS.
- Hudbay's consolidated cash costs, net of by-product credits, guidance range shown for 2025 based on the improved guidance range announced in the November 12, 2025 news release.
- 2024 revenue as of December 31, 2024, further details available in the February 19, 2025 news release.
- Total copper equivalent in situ reserves as per the news release dated March 27, 2025, calculated using select commodity pricing (\$4.25/lb Cu, \$2,200/oz Au, \$25.00/oz Ag, \$1.25/lb Zn, and \$15.00/lb Mo).

TSX & NYSE: HBM

HUDBAY

Constancia

LONG LIFE, LOW-COST COPPER MINE IN PERU

- 100%-owned, low cost, long life copper mine that has been in production since 2014. Constancia is one of the lowest cost open pit copper mine in South America².
- After acquiring the greenfield project in 2011, Hudbay completed best in class permitting, construction, commissioning and ramp up within three years.
- Developed constructive partnerships with local communities.
- Advancing opportunities to further enhance mill throughput starting in 2026.
- Potential to add long-term value through nearby satellite exploration deposits.

2024A Cash Cost

- Copper production and cash cost guidance range shown for 2025 based on news release dated February 19, 2025, and 2026 and 2027 copper production guidance range based on news release dated March 27, 2025.
- Based on total mine site costs including mining, processing and general and administrative costs on a per tonne basis. Sourced from Wood Mackenzie and includes primary copper, open pit sulphide mines in South America. Wood Mackenzie's costing methodology may be different than the methodology reported by Hudbay or its peers in their public disclosure.

TSX & NYSE: HBM

HUDBAY

Constancia Operational Excellence

CONTINUOUS OPERATIONAL IMPROVEMENTS AT CONSTANCIA HAVE INCREASED THROUGHPUT, ENHANCED EFFICIENCIES AND REDUCED COSTS

Throughput Expansion

- Mill consistently operates above design capacity with strong culture of continuous improvement.
- Constancia currently operating at average of 87,000 tpd in 2024, **exceeding its design capacity** of 76,000 tpd.
- Evaluating opportunities to further increase throughput by up to 10%.

Cost Efficiency

- Steady low unit operating costs have positioned Constancia as one of the lowest cost open pit copper mine in South America.

CONSTANCIA THROUGHPUT¹

LOW-COST SOUTH AMERICA OPEN PIT COPPER MINE²

1. 2017 – 2023 Avg. refers to an average of the quarterly average daily throughput per tonnes. Nameplate capacity refers to the 76,000 tpd designed capacity when built and approved permit refers to the average of 90,000 tpd daily throughput within the annual permitted ore milled.

2. Wood Mackenzie Q4 2024 dataset. Includes primary copper, open pit sulphide mines in South America only. Operating costs include mining, processing and general and administrative expenditures on a per tonne basis. Wood Mackenzie's costing methodology may be different than the methodology reported by Hudbay or its peers in their public disclosure.

TSX & NYSE: HBM

HUBBAY

Snow Lake

LOW-COST GOLD OPERATION WITH MEANINGFUL BASE METAL PRODUCTION

- 100%-owned Lalor mine in Snow Lake produces gold ore for the newly refurbished New Britannia mill and base metal ore for the Stall concentrator.
- New Britannia mill commenced production in late 2021 resulting in increased annual gold production to over 180,000 ounces.
- Lalor is operating at 4,500 tpd, significantly exceeding the original design capacity of 3,300 tpd and has plans to further increase ore production.
- New Britannia operating at more than 2,000 tpd, significantly exceeding its original design capacity of 1,500 tpd.
- Nearby 1901 deposit is scheduled to commence in 2027, increasing the total mine production rate to 5,000 tpd in Snow Lake and providing additional base metal and gold production.
- Successful use of battery-electric vehicles (BEV) underground at Lalor, with intentions to expand future fleet.
- Potential for further mine life extension from satellite deposits.

SNOW LAKE GOLD PRODUCTION PROFILE²

* Manitoba full year gold production tracking slightly below the low end of the 2025 production guidance range as a result of 2-month wildfire evacuations in the summer and winter storm power outages in October. For further information on production and cost guidance, please refer to Hudbay's Q3 news release or MD&A dated November 12, 2025.

HUDBAY

New Britannia Mill Refurbishment Driving Higher Returns

TIMELY STRATEGIC CAPITAL ALLOCATION AND STRONG OPERATIONAL EXECUTION TO MAXIMIZE RETURNS

- ✓ 2015: **Acquired New Britannia** for \$12M as potential gold processing solution for Lalor high grade gold ore
- ✓ 2020: **Construction** commenced for \$115M project; Sanctioned at \$1,500/oz Au prices and projected 19% IRR for **1,500tpd nameplate capacity**
- ✓ 2020: Financed with **\$115M gold prepay** during COVID – forward sale of 25% of future gold production for 2 years (~4% of reserves)¹
- ✓ 2021: Project **completed on time**, but over-budget
- ✓ 2024: **Gold prepay fully repaid**; Full exposure to prevailing gold prices with ~2M ounces of Au reserves and 1.3M ounces of Inferred; **IRR improved to 36%**²

After 3 years of operations, investment is achieving even higher returns:

- New Britannia currently operating at more than 2,000 tpd, significantly **exceeding its design capacity** of 1,500 tpd
- Project **payback was achieved** after **2.5 years**
- Recently received permit approval to increase production up to 2,500 tpd

With ~2 million ounces of gold in current mineral reserves and another 1.3 million ounces in inferred mineral resources, New Britannia will continue to unlock significant value

NEW BRITANNIA THROUGHPUT¹

1. For information on New Britannia operating metrics including throughput and recoveries, please refer to the detailed results disclosed by Hudbay in the quarterly news release or MD&A for each reporting period.
 2. Internal Rate of Return (unlevered) after adjusting for higher production rates, stronger gold prices and current capital and operating costs.

Lalor Mine Life Extension

1.7M OZ OF GOLD RESERVES & 1.3M OZ OF GOLD INFERRED RESOURCES WITH FURTHER EXTENSION POTENTIAL

LALOR MINE LIFE EXTENSION

Stringent methodology constraining the resource within a stope optimization envelope is expected to lead to higher resource to reserve conversion.

LALOR NEAR MINE

Continuing to test down plunge and north extensions at Lalor.

Intersected high-grade copper-gold-silver zone discovery within 500m northwest of existing underground infrastructure:

- 3.5m @ 3.81% Cu, 3.75 g/t Au, 104.5 g/t Ag

Snow Lake Exploration Program

1. NEAR MINE – MINE LIFE EXTENSION

Testing mineralized extensions at Lalor and 1901 deposit to extend mine life & increase mineral reserves and resources.

1901 Access Drift and Step-out Drilling:

- Development reached first zinc ore in Q2 2025.
- Step out drilling confirmed Cu-Au mineralization extends down plunge & 2025 follow-up drilling underway.

1901 Access Drift & Step-Out

2. REGIONAL – PRODUCTION GROWTH

Exploration across Snow Lake region land package to test for satellite deposits to increase production utilizing available processing capacity at the Stall mill.

Regional Satellite Deposits:

Talbot, Rail, Pen II, Watts, Zone 3 and WIM

3. GEOPHYSICS – NEW ANCHOR DISCOVERY

Large modern geophysics program underway consisting of deep surface electromagnetic surveys to detect targets at depths of ~1,000m below surface.

2025 survey plans include surveying 800 km² area
(outlined in green)

Copper Mountain

LONG LIFE COPPER MINE WITH OPTIONALITY

- Copper Mountain mine is a conventional open pit with a 45,000 tpd plant capacity. Hudbay acquired 75% ownership in June 2023 and completed the consolidation of the remaining 25% ownership in April 2025.
- Recent operating performance demonstrates the successful implementation of Hudbay's stabilization initiatives with improvements in copper recoveries, mill throughput and mill availability achieved in 2024. Implementing optimization plans to further enhance operations to reach targeted expanded production levels.
- Mill optimization initiatives underway to increase mill throughput to 50,000 tonnes per day by mid-2026.
- Exceeded the targeted \$10 million in annualized corporate synergies and on track to realize the three-year annual operating efficiencies target of \$20 million.
- Significant upside potential for reserve conversion and extending mine life.

COPPER MOUNTAIN PRODUCTION PROFILE ^{1,2}

*British Columbia full year copper production expected to be below the low end of 2025 production guidance range as a result of the processing of additional low-grade stockpiles in Q3 and expected temporary lower mill throughput in Q4. For further information on production and cost guidance, please refer to Hudbay's Q3 news release or MD&A dated November 12, 2025.

Significant Investment in U.S. Critical Minerals

“MADE IN AMERICA” COPPER CATHODE TO SUPPORT DOMESTIC U.S. COPPER CONSUMPTION

INVESTING IN U.S. CRITICAL MINERALS INFRASTRUCTURE & SIGNIFICANT JOB CREATION

- Copper World represents one of the largest investments in southern Arizona's history.
 - Direct initial investment of \$1.5B¹.
- Copper World will be a significant contributor to U.S. job creation.
 - Project construction is expected to create more than 1,000 jobs and utilize U.S. union labour for project construction with letters of commitment currently in place with 7 unions.
 - Expected to create more than 400 direct jobs and up to 3,000 indirect jobs in Arizona once in production.
- Permitted concentrate leach facility to produce “Made in America” copper cathode to contribute to domestic U.S. supply chain and strengthen manufacturing capacity and national and energy security.
 - Concentrate leach facility reduces the operation's total energy consumption by 10% and total scope 1, 2, and 3 GHG emissions by 14% through eliminating overseas shipping, smelting and refining.

Copper World will be one of the largest open-pit copper mines in the U.S.²

U.S. COPPER BENCHMARKING – ANNUAL PRODUCTION (KT CU)²

\$600M Strategic Investment from Mitsubishi Corporation

HIGHLY ACCRETIVE JOINT VENTURE TRANSACTION WITH PREMIER PARTNER TO FUND COPPER WORLD PROJECT

TRANSACTION OVERVIEW

\$600M for 30% Interest	+90% Levered Project IRR to Hudbay	Joint Venture ("JV") Ownership 70% HUDBAY 30% Mitsubishi Corporation
Overview	- Mitsubishi to acquire 30% minority JV interest in Copper World for \$600M cash contribution Significant implied premium to consensus NAV¹	
Consideration	\$420M cash contribution at closing \$180M cash contribution due within 18-months from closing Future Pro-rata Contribution: 30% of remaining capital contributions	
Approvals, Conditions & Timing	- Subject to receipt of certain regulatory approvals and satisfaction of other customary closing conditions - Expected close in late 2025 or early 2026	

FURTHER DERISKS THE ADVANCEMENT OF COPPER WORLD

REALIZES ATTRACTIVE VALUE FOR COPPER WORLD

Highly accretive transaction provides external validation for the robustness and value of the project.

PROVIDES FURTHER FINANCIAL FLEXIBILITY TO HUDBAY

Maintains balance sheet flexibility and defers Hudbay's first capital contribution to 2028 at the earliest.

SECURES PREMIER LONG-TERM STRATEGIC PARTNER

Mitsubishi boasts an impressive track record of co-developing major copper projects globally.

FACILITATES MAJOR INVESTMENT IN U.S. CRITICAL MINERALS

Copper World is one step closer to delivering "Made in America" copper to strengthen the U.S. critical minerals supply chain.

Mitsubishi aligned on completion of Definitive Feasibility Study ("DFS") and project timelines

Partnership endorses Hudbay's technical capabilities

1. Average analyst consensus net asset value (NAV) estimate for 100% of Copper World is approximately \$1.16 billion as of August 12, 2025.

Reduces Hudbay's Remaining Equity Contribution to ~\$200M

FINANCIAL FLEXIBILITY WITH PRUDENT FINANCING PLAN AND STRENGTHENED BALANCE SHEET

+90%

Levered Project
IRR to Hudbay

~\$1B

Hudbay Pro Forma¹
Cash Balance

~\$200M

Remaining Hudbay
Equity Contribution

JOINT VENTURE EQUITY PROCEEDS & CAPITAL CONTRIBUTION

- \$600M of initial cash contributions from Mitsubishi plus future 30% pro-rata equity capital contributions from Mitsubishi.
- Reduces Hudbay's estimated share of the remaining equity contributions to ~\$200M and defers Hudbay's first capital contribution to 2028 at the earliest.
- Hudbay to retain 100% of existing U.S. federal and state net operating losses.

ENHANCED PRECIOUS METALS STREAMING AGREEMENT

- Agreed on terms with Wheaton Precious Metals Corp. to amend the existing precious metals streaming agreement
 - \$230M stream deposit payable during construction is unchanged.
- Additional contingent payment of up to \$70M on a future potential mill expansion recognizes the long-term potential of Copper World.
- Updated ongoing gold and silver payments from fixed pricing to 15% of spot prices to allow upside price exposure.

ACCELERATED GROWTH CAPITAL

- Hudbay announced increased Arizona 2025 growth capital guidance by \$20M for detailed engineering, some key long lead-time items and other derisking activities (spending advanced from future years).

OPTIMAL PROJECT FUNDING STRUCTURE²

1. Using Hudbay's cash and cash equivalents of \$626M as of June 30, 2025 plus \$420M in initial cash earn-in contribution from the JV partner.

2. Based on the initial capital investment and the \$3.75 per pound copper price used in the PFS published in September 2023 with assumptions of approximately \$145M for pre-sanctioning costs, \$230M from the precious metals stream, \$350M from project-level financing and approximately \$700M from the JV partner earn-in, matching contribution and capital contribution.

3. Phase I Capex, net of equipment financing based on the PFS published in September 2023.

Copper World PFS Highlights

PHASE I PFS – LARGE SCALE, HIGH-GRADE COPPER PROJECT WITH ATTRACTIVE ECONOMICS

- **Large Reserve Base with Meaningful Resource Upside on a Significant Land Package:** 385Mt reserves support 20 years of Phase I mine life, which is only ~30% of the ~1.2Bt of M&I resources*
- **Low Capex, Low Complexity Project:** Low capital intensity of under \$13,000/t with conventional open pit truck and shovel operation and copper flotation process at a ~1,600 masl
- **Phase II to Unlock Further Value:** Opportunity to expand mining activities onto federal land to extend mine life and further enhances economics

SUMMARY OF 2023 PFS KEY METRICS

Valuation Metrics (Unlevered) ¹ (at \$3.75/lb Cu)	Units	Phase I		
Net present value @ 8% (after-tax)	\$ millions	\$1,100		
Net present value @ 10% (after-tax)	\$ millions	\$771		
Internal rate of return (after-tax)	%	19.2%		
Payback period	# years	5.9		
Project Metrics				
Growth capital – initial	\$ millions	\$1,323		
Construction length – initial plant	# years	2.5		
Growth capital – conc leach facility (year 4)	\$ millions	\$367		
Construction length – conc leach facility	# years	1.0		
Operating Metrics		Year 1-10	Year 11-20	Phase I
Copper production (annual avg.) ²	000 tonnes	92.3	77.5	85.3
EBITDA (annual avg.) ³	\$ millions	\$404	\$339	\$372
Sustaining capital (annual avg.)	\$ millions	\$33.9	\$19.4	\$27.1
Cash cost ⁴	\$/lb Cu	\$1.53	\$1.39	\$1.47
Sustaining cash cost ⁴	\$/lb Cu	\$1.95	\$1.62	\$1.81

1. Calculated assuming the following commodity prices: copper price of \$3.75 per pound, copper cathode premium of \$0.02 per pound (net of cathode freight charges), gold stream price of \$450 per ounce, silver stream price of \$3.90 per ounce and molybdenum price of \$12.00 per pound. Reflects the terms of the existing Wheaton Precious Metals stream, including an upfront deposit of \$230 million in the first year of Phase I construction in exchange for the delivery of 100% of gold and silver produced.
2. Copper production includes copper contained in concentrate sold and copper cathode produced from the concentrate leach facility. Average annual copper production excludes partial year of production in year 20.
3. EBITDA is a non-GAAP financial performance measure with no standardized definition under IFRS. For further information, please refer to the company's most recent Management's Discussion and Analysis.
4. Cash cost and sustaining cash cost exclude the cost of purchasing external concentrate, which may vary in price and or potentially be replaced with additional internal feed. By-product credits calculated using amortization of deferred revenue for gold and silver stream sales as per the company's approach in its quarterly financial reporting. By-product credits also include the revenue from the sale of excess acid produced at a price of \$145 per tonne. Sustaining cash cost includes sustaining capital expenditures and royalties. Cash cost and sustaining cash cost are non-GAAP financial performance measures with no standardized definition under IFRS. For further details on why Hudbay believes cash costs are a useful performance indicator, please refer to the company's Management's Discussion and Analysis.

For further information please refer to Hudbay's news release dated September 8, 2023, announcing the PFS results. Tonnes shown are metric tonnes.

* Based on Phase I of mine plan as disclosed in the 2023 PFS. Resource shown inclusive of reserves. Initial capital expenditures shown net of equipment financing

HUDBAY

Mason Project

LARGE OPEN PIT COPPER PROJECT WITH SIGNIFICANT LAND PACKAGE

- Acquired in 2018, Mason is 100%-owned by Hudbay and is located in the prolific Yerington Copper District of Nevada, with excellent infrastructure already in place including road access and nearby rail and power.
- In 2019 and 2020, Hudbay consolidated adjacent lands near Mason, including the Mason Valley and Bronco Creek properties, offering optimization and exploration upside.
- Robust PEA released in 2021, demonstrating strong project economics for 27-year mine life.
- Since 2021, Hudbay completed a geophysical program and additional drilling, while continuing to focus on ongoing social engagement. Metallurgical testing is also underway.

INVESTMENT THESIS

Robust Copper Market Outlook

STRONG LONG-TERM COPPER MARKET FUNDAMENTALS WITH SIGNIFICANT SHORTAGE SUPPLY

Declining Copper Grades

No Significant Projects Sanctioned in Past 3-Years

Protracted Permitting Timelines

Capital Inflation & Increasing Social Costs

Lack of New Discoveries of Copper Deposits

GROWING DEMAND FOR “GREEN COPPER”

Global De-carbonization & Transition to Renewable Energy

Electrification of Vehicles

Artificial Intelligence Data Centres

Industrialization & Urban Development

Deglobalization of Supply Chain

GLOBAL COPPER SUPPLY AND DEMAND¹

Copper markets are increasingly dependent on execution of early-stage development projects

1. Source: Wood Mackenzie, Global Copper Investment Horizon Outlook (Q3 2025 dataset)
 2. Supply gap in 2040 assuming supply contribution of anticipated Base Case Production and Probable Projects

Challenges of Supply Prediction

The analysis below compares the projected global copper production estimated by Wood Mackenzie, inclusive of development and expansion projects, as of **2020 Q3** to the **latest 2025 Q3 estimates and 2020-2024 production** actuals to understand how the market has changed following production shortfalls at operating mines and delays in executing upon expansion and development projects.

The market has a history of optimistic projections for new production → Suggesting the gap may be larger

1. Source: Wood Mackenzie, Base Metals Markets Tool as of Q3 2020 and Q3 2025; includes production from mines only.

HUDBAY

Proven Developer and Operator

HUDBAY HAS ~100 YEARS OF MINE DISCOVERY, DEVELOPMENT AND OPERATING EXPERTISE

1

VALUE CREATION THROUGH EXPLORATION

Consistent growth through discovery of new deposits + track record of mine life extensions

High-grade Pampacancha deposit near Constanica

777 and Lalor discoveries (1990's and 2000's)

Flin Flon (1910's), Chisel Basin (1950's), Trout Lake (1970's)

5

ENVIRONMENTAL SOCIAL AND GOVERNANCE

Committed to sustainability and environmental stewardship

All operations in the bottom half of the greenhouse gas curve

Recognized as the gold standard for community relations in Peru

40% community employment at the Constanica mine; 16% Indigenous employment in Manitoba

4

PRUDENT CAPITAL ALLOCATOR

"3-P" framework ensures capital discipline

Outperformed leverage target of 1.2x (0.5x as at Q3 2025)¹

Strong financial position (~\$611mm in cash²)

New Britannia, Copper Mountain & Copper World low capital intensity & high return

2

BEST-IN-CLASS MINE BUILDING EXPERIENCE

World-class management and operating team with proven mine building experience

Constanica - Recognized as gold standard for mine building and ramp-up

Developed 29 mines in the Flin Flon Belt and Snow Lake Belt in Manitoba

3

OPERATIONAL EXCELLENCE & IMPROVEMENTS CULTURE

Hudbay best-in-class operating team focused on continuous optimization

Constanica throughput and recovery optimizations

New Britannia successful refurbishment and operation well above design throughput

Copper Mountain operational turnaround

1. Net Debt to Adjusted EBITDA calculation based on most recent company public filings available as of November 12, 2025. Adjusted EBITDA is based on trailing twelve months for each period.
2. Sept. 30, 2025 cash and cash equivalents and available liquidity reflects cash and cash equivalents.

Several Near-Term Catalysts

FOCUS ON DELIVERING MANY NEAR-TERM GROWTH INITIATIVES ACROSS THE PORTFOLIO TO GENERATE SIGNIFICANT VALUE FOR STAKEHOLDERS

COPPER WORLD

- ✓ Close JV transaction in late 2025 or early 2026
- ✓ Complete definitive feasibility study by mid-2026
- ✓ Sanction decision in 2026
- ✓ Secure project level financing

PERU

- ✓ Expand throughput to further enhance production –
Evaluate future benefit from regulatory change allowing 10% increase in throughput above permitted levels
- ✓ Maria Reyna and Caballito exploration –
Drill permitting process underway by government

MANITOBA

- ✓ New Britannia further optimization
- ✓ Snow Lake regional exploration –
Near Lalor drilling, Cook Lake and Talbot exploration properties
- ✓ 1901 exploration and early mining
- ✓ Flin Flon tailings reprocessing

COPPER MOUNTAIN

- ✓ Execute optimization plans –
Transform mine into a reliable cash flow contributor
- ✓ Accelerate mill expansion to 50k tpd
- ✓ New Ingerbelle pit development
- ✓ Mine life extension –
Future exploration to convert large inferred resources to reserves

Hudbay's Attractive, Copper Weighted Production Growth

COPPER WORLD DELIVERS +50% GROWTH IN CONSOLIDATED COPPER PRODUCTION

ANNUAL CONSOLIDATED COPPER PRODUCTION¹

HUBBAY LONG-TERM PRODUCTION PROFILE²

GEOGRAPHIC MIX

COMMODITY MIX

Once Copper World is in production, Hudbay will become one of the largest Americas-focused pure-play copper producers with a well-balanced and geographically diversified portfolio of assets

1. Hudbay's copper production shown for 2025 based on the midpoint guidance range from news release dated February 19, 2025, and long-term production based on average annual copper production (2026-2027 guidance midpoint) of 149kt p.a. plus Copper World first 10-year average copper production of 92ktpa in Phase I of mine plan as disclosed in the 2023 PFS.

2. Using mid-point of three-year annual production guidance plus the Copper World first 10-year average production in Phase I of mine plan as disclosed in the 2023 PFS. Calculated using select commodity pricing (\$4.25/lb Cu, \$2,200/oz Au, \$25.00/oz Ag, \$1.25/lb Zn, and \$15.00/lb Mo).

APPENDIX

World-Class Management Team

PETER KUKIELSKI
PRESIDENT & CEO

More than 30 years of sector experience in base metals, precious metals and bulk materials across the globe, including leadership positions at Nevsun, Anemka, ArcelorMittal, Teck and Noranda.

EUGENE LEI
CFO

Over 25 years of global mining investment banking, finance and corporate development experience. As CFO, he is responsible for financial reporting, IR, financial planning and treasury.

ANDRE LAUZON
COO

Over 30 years of experience, holding leadership roles at Vale. Leads international operating teams & responsible for business development, technical services, exploration and CSR.

ROBERT CARTER
SVP, CANADA

Over 25 years of mining industry experience in technical, operational and senior leadership roles. Responsible for the strategic oversight of Hudbay's business activities in Manitoba and British Columbia.

JAVIER DEL RIO
SVP, USA BUSINESS UNIT

Over 30 years of corporate and operational experience in open-pit, underground and expansion initiatives. Most recently he led our Peru business unit and is now responsible for our growing U.S. business unit.

PATRICK DONNELLY
SVP, LEGAL & ORGANIZATIONAL EFFECTIVENESS

Over 20 years of corporate & securities law experience, he joined in 2008 with expanding responsibilities over his tenure; responsible for all legal and HR matters.

OLIVIER TAVCHANDJIAN
SVP, EXPLORATION AND TECHNICAL SERVICES

Over 30 years of mineral industry experience. As SVP, he is responsible for the exploration strategy to create value through increasing the mineral reserves and resources and technical aspects of the company.

CANDACE BRULE
SVP, CAPITAL MARKETS & CORPORATE AFFAIRS

Over 15 years of capital markets, corporate development and investor relations experience in the mining sector. Responsible for leading the investor and external communications activities as well as financial planning and analysis, Canadian government relations and corporate sustainability reporting.

MARK GUPTA
SVP, CORPORATE DEVELOPMENT & STRATEGY

More than 15 years of investment banking and corporate development experience, including Lead Principal, Business Development at BHP. Responsible for optimizing Hudbay's portfolio of assets through acquisition, divestitures, investments and partnerships.

JON DOUGLAS
VP, TREASURER

WARREN FLANNERY
VP, COPPER WORLD

SEBASTIEN FORTIN
ACTING HEAD, BRITISH COLUMBIA BUSINESS UNIT

MARK HABER
VP, LEGAL AND CORPORATE SECRETARY

THOMAS KARANIKOLAS
VP, FINANCE

JOHN O'SHAUGHNESSY
VP, MANITOBA BUSINESS UNIT

AUDRA WALSH
VP, SOUTH AMERICA BUSINESS UNIT

Board of Directors

DAVID SMITH
CHAIR

David has more than 30 years of financial and executive leadership experience. He has had a career on both the finance and the supply sides of business within the mining sector, with extensive international exposure.

PETER KUKIELSKI
PRESIDENT & CEO

Peter has more than 30 years of experience within the base & precious metals and bulk materials sectors, having overseen operations across the globe.

JOHN ARMSTRONG
DIRECTOR

John has a long career as a strategic advisor, including CEO of Versamet Royalties and spent many years with BMO Financial Group. He has experience in investment banking strategy, execution across various industry verticals, as well as delivering corporate finance and advisory solutions to clients.

JEANE HULL
DIRECTOR

Jeane has over 35 years of operational leadership and engineering experience, most notably holding the positions of Executive Vice President and Chief Technical Officer of Peabody Energy Corporation and Chief Operating Officer for Kennecott Utah Copper Mine, a subsidiary of Rio Tinto plc.

CARIN KNICKEL
DIRECTOR

Carin has over 30 years' experience in the energy industry, holding senior operating, planning & business development positions throughout her career in the US & Europe

GEORGE LAFOND
DIRECTOR

George has held many leadership positions in business, education and social development. He is known for achieving strategic initiatives leading to First Nations engagement and is a citizen of the Saskatchewan Muskeg Lake Cree Nation.

STEPHEN A. LANG
DIRECTOR

Stephen has over 40 years of experience in the mining industry, including engineering, development and production at gold, copper, coal and platinum group metals operations.

COLIN OSBORNE
DIRECTOR

Colin is President, Samuel Son and Co., one of North America's largest commodity metals supply chain & has over 30 years' experience in capital-intensive metals, mining and industrial manufacturing businesses.

PAULA ROGERS
DIRECTOR

Paula has over 25 years of experience working for Canadian-based international public companies in the areas of corporate governance, treasury, mergers and acquisitions, financial reporting and tax.

LAURA TYLER
DIRECTOR

Laura has over 35 years global experience in the mining sector, most notably as Chief Technical Officer and Asset President for BHP and most recently as CEO for Adriatic Metals plc. She has held numerous operational and technical leadership roles, including various engineering, planning, geotech and geology roles.

HUBBAY

2025 Cost Guidance

CAPITAL EXPENDITURES¹ (\$M)

SUSTAINING CAPITAL	2025 Guidance ²	2024 Actuals
Peru ³	170	124
Manitoba	60	46
British Columbia ³	135	123
Total sustaining capital	365 (Reduced to 350)*	293
Peru	25	1
Manitoba ⁵	15	7
British Columbia ⁵	75	8
Arizona ⁶	110	29
Total growth capital	225 (Reduced to 205)*	45
Capitalized exploration	10	12
Total capital expenditures	600 (Reduced to 565)*	350

*Improved 2025 reduced total expected capital expenditure and consolidated cash cost guidance as per November 12, 2025 news release. Sustaining and growth capital figures for each operation do not equate to the reduced total capital expenditures figures.

- Capital expenditures excludes capitalized costs not considered to be sustaining or growth capital expenditures.
- Sustaining capital guidance excludes right-of-use lease additions and additions as a result of equipment financing arrangements and non-cash deferred stripping.
- Includes capitalized stripping costs and development costs.
- Peru 2024 exploration guidance excludes \$5 million of non-cash amortization of community agreements for exploration properties.
- 2025 Manitoba growth capital partially funded by approximately \$5 million in Canadian Development Expense flow-through financing proceeds (2024 - \$3 million). Manitoba exploration partially funded by approximately \$7 million in Canadian Exploration Expense flow-through financing proceeds for 2025 (2024 - \$11 million). 2025 Canadian capital expenditures guidance is converted into U.S. dollars using an exchange rate of 1.35 C\$/US\$.
- 2025 Arizona growth capital guidance was increased by an additional \$20 million, compared to the original 2025 guidance of \$90 million, updated as of August 13, 2025 news release.
- Cash cost and sustaining cash cost per pound of copper produced, net of by-product credits, and cash cost per ounce of gold produced, net of by-product credits, are non-GAAP financial performance measures with no standardized definition under IFRS. For further information, please see the "Non-GAAP Financial Performance Measures" section of this news release.
- Peru cash cost per pound of copper produced, net of by-product credits, assumes by-product credits are calculated using the gold and silver deferred revenue drawdown rates for the streamed ounces in effect on December 31, 2024 and the following commodity prices for 2025: \$2,500 per ounce gold, \$26.00 per ounce silver and \$18.00 per pound molybdenum.
- Manitoba cash cost per ounce of gold produced, net of by-product credits, assumes by-product credits are calculated using the following commodity prices for 2025: \$4.10 per pound copper, \$1.20 per pound zinc, \$26.00 per ounce silver and an exchange rate of 1.35 C\$/US\$. British Columbia cash cost per pound of copper produced, net of by-product credits, assumes by-product credits are calculated using the following commodity prices for 2025: \$2,500 per ounce gold, \$26.00 per ounce silver and an exchange rate of 1.35 C\$/US\$.

TSX & NYSE: HBM

HUDBAY

Our People, Our Community, Our Planet

EMBRACING DIVERSITY AND PROVIDING A HEALTH & SAFE WORKPLACE

- All operations are required to be certified to ISO 45001, an internationally accepted standard for occupational health and safety management systems.
- Promotes an inclusive workplace and embraces diverse backgrounds:
 - 100% of Constancia mine employees are Peruvian, with 20% from the local communities
 - Indigenous employment of 15% in Manitoba and 13% in British Columbia
 - 18% overall female employment

PRIORITIZE MEANINGFUL CONNECTIONS WITH COMMUNITIES

- Understanding needs, assessing potential impacts and maintaining open dialogue, to create the foundation for long-term partnerships that support mutual growth and shared success.
- Hudbay conducts annual self-assessments aligned with the Mining Association of Canada's (MAC) Towards Sustainable Mining (TSM) Indigenous and Community Relationships Protocol.
 - Constancia achieved level AAA ratings across all five indicators
 - Manitoba achieved AAA ratings on three indicators, and AA ratings on two indicators.
 - British Columbia received level AAA ratings on two indicators and three level AA ratings

COMMITTED TO ADVANCING ENVIRONMENTALLY RESPONSIBLE MINING

- We track our use of resources and integrate eco-efficiency considerations into investment decisions and business planning processes.
- Our Biodiversity Conservation Standard aims to preserve healthy ecosystems and biodiversity throughout the mine lifecycle, aligned with the TSM Biodiversity Conservation Management Protocol and the IFC Ecosystem Services Performance Standard.
- Hudbay's updated climate change targets include 2030 GHG emissions reduction targets specific to each business unit and are focused on those areas where the Company believes it can achieve the biggest impact.

CLIMATE CHANGE TARGETS

Business Unit ¹	2030 GHG Emissions Reduction Target ²
Peru (2022 baseline)	99% reduction in Scope 2 GHG emissions intensity (tonnes of Scope 2 emissions per kilotonne of ore processed)
Snow Lake ³ (2022 baseline)	25% reduction in Scope 1 GHG emissions intensity (tonnes of Scope 1 emissions per kilometre)
British Columbia (2024 baseline)	5% reduction in Scope 1 GHG emissions intensity (tonnes of Scope 1 emissions per kilometre)

CASE STUDY: LOCAL BUSINESS SET-UP WITH 35% OF CONSTANCIA'S CONCENTRATE NOW TRUCKED BY COMMUNITIES

In 2021, Hudbay invited the communities of Chilloroya and Uchucarcco to participate in tender for transport of Constancia's concentrate to the port of Matarani.

Hudbay assisted in raising the standards of the Chilloroya company to that of a Tier 1 supplier.

In early 2022, the Chilloroya company started moving concentrate with a fleet of 21 trucks; the community of Uchucarcco followed a few months later with a fleet.

¹ Baseline year of 2022 for operations owned at inception of Hudbay's climate change strategy and first full year of operations for assets acquired since 2022.

² Site-level GHG reporting may vary from these targets as we use internationally accepted emissions factors for the data shown in this report and for corporate purposes. Kilometre results from each business unit may vary depending on the amount of uphill versus downhill hauling and other areas of material movement during mining operations.

³ Includes baseline year data for Snow Lake operations only and excludes impact of Flin Flon operations in Manitoba, which were closed in 2022.

South America Business Unit

INVESTOR PRESENTATION / NOVEMBER 2025

Constancia Mine Plan

17-YEAR MINE PLAN BASED ON PROVEN AND PROBABLE RESERVES ONLY

Mine plan for Constancia operations reflects higher copper and gold production into 2025 with the higher grades from the Pampacancha deposit and extended mine life to 2041 with the conversion of mineral resources to mineral reserves.

CONSTANCIA OPERATIONS	2023A	2024A	2025 ³	2026 ³	2027 ³	2028-2037 Avg.
CONTAINED METAL IN CONCENTRATE						
Cu Production (000s tonnes)	100	99	80 – 97	76 – 100	76 – 100	72
Au Production (000s ounces)	114	98	49 – 60	16 – 21	17 – 23	20
Ag Production (000s ounces)	2,505	2,708	2,475 – 3,025	1,610 – 2,070	1,415 – 1,915	1,805
Mo Production (000s tonnes)	1.6	1.3	1.3 – 1.5	1.3 – 1.5	1.4 – 1.8	1.1
CAPITAL EXPENDITURES						
Sustaining Capital ¹ (\$M)	\$132	\$124	\$170 ³	\$66	\$125	\$52
Growth Project Capital (\$M)	\$12	\$2	\$25 ³	-	-	-
COPPER CASH COSTS						
Cash Cost, net of by-product credits ² (\$/lb Cu)	\$1.07	\$1.18	\$1.35-\$1.65 ³			
Sustaining Cash Cost, net of by-product credits ² (\$/lb Cu)	\$1.81	\$1.86				

Source: March 2021 Constancia operations 43-101 technical report and company's updated guidance announced on March 27, 2025. Updated annual mineral reserve estimates announced on March 28, 2024 extended Constancia's mine life by four years to 2041, which is not reflected in the table above. Totals may not add up correctly due to rounding and mine plan changes reflected in near-term guidance.

1. After the impact of capitalized stripping and development costs.
2. Cash cost and sustaining cash cost are non-GAAP financial performance measures with no standardized definition under IFRS. For further details on why Hudbay believes cash costs are a useful performance indicator, please refer to the company's most recent Management's Discussion and Analysis.
3. Peru 2025 copper production expected within the guidance ranges, while gold production is expected to be above the top end of the guidance range, as disclosed in news release or MD&A dated November 12, 2025. Cash cost guidance range shown for 2025 based on news release dated February 19, 2025. Guidance range for 2026 and 2027 production based on news release dated March 27, 2025. Cash cost guidance not provided beyond 2025.

Llaguen Project

COPPER PIPELINE PROJECT IN A FAVOURABLE LOCATION

- 100% owned by Hudbay.
- The Llaguen project is in La Libertad region in northwestern Peru.
- Accessible by road, 62km from the Salaverry port and 40km from the Trujillo Nueva electric substation.
- Hosts shallow mineralization over a 1.3km strike length, with higher grade mineralization located close to surface that has the potential to be mined earlier in the mine life.

SECTIONAL VIEW OF PROJECT

MINERAL RESOURCE ESTIMATE AS AT JANUARY 1, 2025

Category	Metric Tonnes	Cu (%)	Mo (g/t)	Au (g/t)	Ag (g/t)	CuEq (%)
Indicated Global ($\geq 0.14\%$ Cu)	271,000,000	0.33	218	0.033	2.04	0.42
Including Indicated High-grade ($\geq 0.30\%$ Cu)	113,000,000	0.49	261	0.046	2.73	0.60
Inferred Global ($\geq 0.14\%$ Cu)	83,000,000	0.24	127	0.024	1.47	0.30
Including Inferred High-grade ($\geq 0.30\%$ Cu)	16,000,000	0.45	141	0.038	2.60	0.52
Total Waste	314,000,000					
Strip Ratio (x)	0.9					

Manitoba Business Unit

* Mining activities in Flin Flon were completed in June 2022; Flin Flon mill on care and maintenance with the potential to be restarted if there are future discoveries in the region.

Snow Lake Mine Plan

13-YEAR MINE PLAN BASED ON PROVEN AND PROBABLE RESERVES ONLY

Mine plan optimizes processing capacity in Snow Lake to maximize the NPV of the operations.

SNOW LAKE OPERATIONS ¹	2023A	2024A	2025 ³	2026 ³	2027 ³	2028-2037 Avg.
CONTAINED METAL IN CONCENTRATE AND DORÉ						
Au Production (000s ounces)	187	214	180 – 220	170 – 210	170 – 210	54
Ag Production (000s ounces)	852	995	800 – 1,000	750 – 950	1,000 – 1,200	340
Cu Production (000s tonnes)	12	13	9 – 11	11 – 13	12 – 14	6
Zn Production (000s tonnes)	35	33	21 – 27	21 – 25	21 – 27.5	20
CAPITAL EXPENDITURES ²						
Sustaining Capital (\$M)	\$56	\$46	\$60	\$66	\$48	\$18
Growth Project Capital (\$M)	\$14	\$7 ⁵	\$15 ⁵	-	-	-
GOLD CASH COSTS						
Cash Cost, net of by-product credits ⁴ (\$/oz Au)	\$727	\$606	\$650-\$850			
Sustaining Cash Cost, net of by-product credits ⁴ (\$/oz Au)	\$1,077	\$868				

Source: March 2021 Snow Lake operations 43-101 technical report and company's updated guidance announced on March 27, 2025. Updated annual mineral reserve estimates announced on March 28, 2022 extended Snow Lake's mine life by one year to 2038, which is not reflected in the table above. Totals may not add up correctly due to rounding and mine plan changes reflected in near-term guidance.

- Includes production and costs for Lalor, 1901, WIM and 3 Zone.
- 2025 Canadian capital expenditures guidance is converted into U.S. dollars using an exchange rate of 1.35 C\$/US\$. Sustaining capital guidance excludes right-of-use lease additions and additions as a result of equipment financing arrangements and non-cash deferred stripping.
- Manitoba full year gold production tracking slightly below the low end of the 2025 production guidance range as a result of 2-month wildfire evacuations in the summer and winter storm power outages in October, as disclosed in news release or MD&A dated November 12, 2025. Cash cost guidance range shown for 2025 based on news release dated February 19, 2025. Guidance range for 2026 and 2027 production based on news release dated March 27, 2025. Cash cost guidance not provided beyond 2025.
- Cash cost and sustaining cash cost are non-GAAP financial performance measures with no standardized definition under IFRS. For further details on why Hudbay believes cash costs are a useful performance indicator, please refer to the company's most recent Management's Discussion and Analysis.
- 2025 Manitoba growth capital partially funded by approximately \$5 million in Canadian Development Expense flow-through financing proceeds (2024 - \$3 million).

Snow Lake Process - 2025

INVESTOR PRESENTATION / NOVEMBER 2025

Snow Lake Growth Over Time

■ Reserves ■ Produced-to-date

1901 Development & Exploration Drift

53

ADVANCING ACCESS TO THE 1901 DEPOSIT FOR EXPLORATION AND FUTURE MINE DEVELOPMENT

The 1901 deposit was discovered in 2019 and is located within 1,000 metres of the Lalor underground ramp. Pre-feasibility studies in 2021 resulted in a mineral reserve and resource estimate with base metal and gold lenses.

2024 ACCESS DRIFT DEVELOPMENT

- Development reached first zinc ore in Q2 2025.
- Initiated the development of an adjacent haulage drift to de-risk planned full production in 2027.
- 2024 step out drilling confirmed Cu-Au mineralization extends down plunge. Additional exploration drilling planned for 2025 to potentially extend orebody geometry and convert inferred.

1901 MINERALIZED LENSES

EXPLORATION STEP OUT DRILLING¹

1. For further information on drill holes mineralization intersect for NUX0004, NUX0005, NUX0006, NUX0007, NUX0008, NUX0009, and NUX0010, please refer to the company's news releases dated March 27, 2025.

Talbot Copper-Zinc Project

DRILL PROGRAM STARTED IN JULY WITH FIRST THREE HOLES ALL RETURNING POSITIVE RESULTS

ROCKCLIFF PREVIOUSLY DISCLOSED MINERAL RESOURCE ESTIMATE*	Tonnes (Kt)	Cu (%)	Au (g/t)	Zn (%)	Ag (g/t)
Talbot – Indicated Resources	2,190	2.33	2.1	1.79	36.0
Talbot – Inferred Resources	2,450	1.13	1.9	1.74	25.8

- Talbot is a **copper-zinc-gold deposit**, acquired in 2023 and is 100% owned by Hudbay.
- Talbot's **proximity to existing processing infrastructure in Snow Lake** makes it ideal additional ore feed to utilize the available processing capacity at the Stall mill.
- **Strengthening local Indigenous partnerships** through a Talbot exploration agreement signed with Mosakahiken Cree Nation in April 2025.

2025 TALBOT DRILLING PROGRAM

- Exploration underway to upgrade and expand the current resource with **4 drill rigs currently turning**.
- **Phase 1 (underway):** ~10 holes anticipated to be completed by the end of 2025.
 - Positive results from core logging on the initial 3 holes (TSL024, TSL025, TSL026) have established that typical Talbot Cu-Au mineralization continues at depth (assay results pending).
 - Fourth rig testing an electromagnetic anomaly ~2km NW of Talbot.
 - Testing the continuity of mineralization at depth will determine the future scope of a pre-feasibility study ("PFS"), i.e. shaft vs ramp access.
- **Phase 2:** Expected to commence in January 2026.
 - Complete infill and extension drilling to support the PFS.
 - Update the Rockcliff mineral resource estimate using Hudbay standard methods that have demonstrated high reserve conversion rates.

2025 DRILLING TARGETS

*Note: Hudbay previously owned a 51% interest in the Talbot project until consolidating a 100% interest with the acquisition of Rockcliff Metals Corp. in Sept. 2023. The above resource estimate includes 100% of the Talbot mineral resources reported by Rockcliff in its 2020 NI 43-101 technical report published on SEDAR+. Mineral resources are exclusive of mineral reserves and do not have demonstrated economic viability. Mineral resources do not include factors for mining recovery or dilution.

Flin Flon Growth Opportunities

GROWTH POTENTIAL THROUGH TAILINGS REPROCESSING OPPORTUNITY AND EXPLORATION PARTNERSHIP

ZINC PLANT TAILINGS REPROCESSING

- Opportunity to reprocess the tailings from the hydrometallurgical zinc facility where high grade gold and critical minerals tailings were deposited for more than 25 years.
- Drilling completed in 2023 and advancing preliminary economic studies for the potential development of Tailing Reprocessing Facility utilizing existing infrastructure.
- Potential products include copper, zinc, gold and silver doré, as well as molten elemental sulfur, gallium and germanium.

MILL TAILINGS REPROCESSING

- Opportunity to reprocess Flin Flon tailings where more than 100Mt of tailings have been deposited over 90 years.
- Potential for additional metal production while reducing long-term reclamation liabilities by reducing acid-generating tailings.
- 2022 drilling indicated higher zinc, copper and silver grades than historical records
- Additional work underway to determine reprocessing methodology and economic viability.

EXPLORATION PARTNERSHIP WITH MARUBENI

- In March 2024, signed 5-year option agreement with Marubeni focused on three projects within trucking distance of Hudbay's processing facilities in Flin Flon.
- Marubeni will fund up to C\$12M in exploration activities carried out by Hudbay.
- All three properties host past producing mines with attractive copper and gold grades and remain highly prospective for further mineral discoveries.

Flin Flon Closure Cost Plan

75% OF CLOSURE AND RECLAMATION COSTS ARE TO BE INCURRED AFTER 2037¹

1. Hudbay's Q3 2021 news release dated November 3, 2021. Snow Lake mine life has since been extended to 2038 and the ultimate schedule of expenditures may differ from what is shown above.

British Columbia Business Unit

Copper Mountain Mine Plan

19-YEAR MINE PLAN BASED ON PROJECT AND PROBABLE RESERVES ONLY

Updated mine plan for Copper Mountain operations reflects mine stabilization plan advancements and increased mine productivity.

COPPER MOUNTAIN OPERATIONS	2024A	2025 ⁵	2026 ⁵	2027 ⁵	2028-2043 Avg.*	LOM Total*
CONTAINED METAL IN CONCENTRATE						
Cu Production (000s tonnes)	26	28 – 41	30 – 45	50 – 70	37	783
Au Production (000s ounces)	20	18.5 – 28	20 – 30	30 – 45	50	935
Ag Production (000s ounces)	280	245 – 365	230 – 345	455 – 680	240	5,590
CAPITAL EXPENDITURES (US \$M)						
Sustaining Capital, after capitalized stripping ¹	\$123	\$135	\$112	\$59	\$48	\$1,106
Growth Project Capital	\$8	\$75	\$69	\$6	-	\$126
COPPER CASH COSTS (US\$/LB CU)						
Cash Cost, net of by-product credits ³	\$2.74	\$2.45 - \$3.45	\$1.89	\$1.90	\$1.83	\$1.84
Sustaining Cash Cost, net of by-product credits (excl. discretionary stripping) ^{3,4}	\$5.29	\$3.40*	\$2.74	\$2.45	\$2.41	\$2.53

*Source: December 2023 Copper Mountain mine operations 43-101 technical report and company's updated guidance announced on March 27, 2025; Note that Sustaining Cash Cost in 2025 from the 43-101 does not align with updated Cash Cost guidance. Totals may not add up correctly due to rounding. "LOM" refers to life-of-mine total.

1. Sustaining capital includes capitalized stripping.
2. Discretionary capitalized stripping based on 2023 43-101 technical report. Relates to a portion of accelerated stripping activities over 2024-2026 to access higher grade ore. Could be reduced or deferred to a later date based on further geotechnical evaluation and other considerations.
3. By-product credits calculated using the following commodity prices and foreign exchange assumptions: \$1,900 per ounce for 2025, \$1,800 per ounce for 2026, \$1,764 per ounce for 2027, \$1,725 per ounce for 2028 and \$1,700 per ounce long-term; silver price of \$24.00 per ounce for 2025 and 2026, \$23.75 per ounce for 2027, \$23.38 per ounce for 2028 and \$23.00 per ounce long-term; C\$/US\$ exchange rate of 1.35 in 2024 and 1.33 in 2025 onwards.
4. Sustaining capital guidance includes capitalized stripping and discretionary stripping; while it excludes right-of-use lease additions and additions as a result of equipment financing arrangements and non-cash deferred stripping. Cash costs and sustaining cash costs are non-GAAP financial performance measures. For further details on cash costs please refer to MD&A for the period ended December 31, 2024.
5. British Columbia full year copper production expected to be below the low end of 2025 production guidance range as a result of the processing of additional low-grade stockpiles in Q3 and expected temporary lower mill throughput in Q4, as disclosed in news release or MD&A dated November 12, 2025. Cash cost guidance range shown for 2025 based on news release dated February 19, 2025. Guidance range for 2026 and 2027 production based on news release dated March 27, 2025.

Copper Mountain Value Creation

IMPROVING RELIABILITY AND OPTIMIZING OPERATIONS TO DRIVE SUSTAINABLE LONG-TERM VALUE

STABILIZATION

Exceeded \$10 million annual corporate synergies target

✓ Increased mining activities

- Fleet ramp-up plan to remobilize idle haul trucks, 28 trucks remobilized in 2023, and 5 additional trucks added in 2024
- Executing accelerated stripping campaign to drive improved flexibility in the mine with additional mining faces

✓ On track to achieve operating efficiencies and achieved corporate synergies

- On track to generate annual operating efficiencies through improvements in copper recovery, throughput rates and lower combined unit operating costs
- Improved mill reliability
- Achieved annual corporate synergies target ahead of schedule

CONSOLIDATION

Consolidated 100% ownership of Copper Mountain in April 2025

✓ Highly accretive transaction to acquire MMC 25% stake in Copper Mountain

- Further increase Hudbay's exposure to a long-life, high quality copper asset in tier-1 jurisdiction
- Resulting in 200% increase in attributable copper production in 2027 compared to 2024
- Reinforces Hudbay's position as the 2nd largest copper producer in Canada

OPTIMIZATION

Accessing higher grades and increasing mill throughput to drive higher production

✓ Accelerated stripping to access higher grades

- 3-year campaign of accelerated stripping to access higher grade ore and mitigate the prior reduced stripping

✓ Improved mill throughput and recoveries

- Advancing mill project to increase mill throughput in H2 2025 and ramp up to 50,000 tpd in 2026
- The mine plan assumes ~\$75M total growth capital spending in 2025
- Mill recoveries have improved with changes to the flotation reagents and replacement of key pumps and expected to further improve with a more consistent ore feed grade

1. Based on average production and cash costs per pound of copper produced, net of by-product credits for the mine life published in the Copper Mountain operations 43-101 technical report on December 5, 2023.

Arizona – U.S. Business Unit

COPPER WORLD IS A LARGE SCALE, HIGH-GRADE OPEN PIT COPPER PROJECT WITH ATTRACTIVE ECONOMICS

Copper World Project Overview

LARGE SCALE, FULLY-PERMITTED OPEN PIT COPPER PROJECT IN THE U.S. WITH ATTRACTIVE ECONOMICS

PROJECT HIGHLIGHTS

Large Reserve Base with Meaningful Resource Upside on a Significant Land Package

- 385Mt reserves support 20 years of Phase I mine life, which is **only ~30% of the 1.2Bt of M&I resources**¹

Large Scale, High-Quality Copper Project

- Expected to produce ~92ktpa Cu (first 10 years avg.) with a **peer leading** low LOM cash costs (US\$1.47/lb Cu)
- Designed to produce **"Made in America" copper cathode** to contribute to domestic U.S. supply chain and reduce GHG emissions

Low Capex, Low Complexity Project

- Initial capex of \$1.3B**¹
- Low capital intensity of under \$13,000/t²
- Conventional open pit truck and shovel operation and copper flotation process at a **~1,600 masl**

Experienced Developer and Operator

- Technical team with a **proven track record** for mine building and operational excellence

Phase II to Unlock Further Value

- Opportunity to expand mining activities onto federal land to **extend mine life and further enhance economics** with significant upside potential

	2023 PFS – PHASE I	2022 PEA – PHASE I
MINE LIFE	20-YEAR STATE AND LOCAL PERMITTING	16-YEAR STATE AND LOCAL PERMITTING
Total Production	1.6Mt Cu	1.4Mt Cu
Avg. Annual Production	85kt (92kt in first 10 years)	86kt
Avg. Mill Head Grade	0.54%	0.47%
Sulfide Concentrator Capacity	60k stpd*	60k stpd* (Add'l ~20k stpd oxide leach)
Concentrate Leach Facility	50% capacity Starting in year 5	100% capacity Starting in year 1
Project Capex	\$1.3B	\$1.9B

1. Based on Phase I of mine plan as disclosed in the 2023 PFS. Resource shown inclusive of reserves. Initial capital expenditures shown net of equipment financing.

2. Calculated using initial capital cost estimates net of the precious metal stream proceeds divided by average annual copper production.

For further information please refer to Hudbay's news release dated September 8, 2023, announcing the PFS results. Tonnes shown are metric tonnes.

*"stpd" = short tons per day

Achieved “3-P” Plan for Copper World

FULLY PERMITTED U.S. COPPER PROJECT WITH PRUDENT FINANCING IN PLACE

In late 2022, Hudbay unveiled a prudent financial plan with three key prerequisites to be achieved for a potential project sanctioning.

		COMPLETED					TO COME	
		2022	2023	2024	2025		2026	
PLAN	PERMITS	OBJECTIVE					POTENTIAL SANCTIONING DECISION 2026	
		Receipt of all state level permits* required for Phase I	✓ MLRP Approved (Jul. '22)	✓ MLRP Upheld (May '23)	✓ APP (Aug. '24)	✓ AQP (Jan. '25)		
PRUDENT FINANCING		Definitive feasibility study with IRR >15%	✓ PEA (Jun. '22) IRR 17%	✓ PFS (Sept. '23) IRR 19%			DFS mid-2026 ahead of sanction	
	Leverage	Net Debt/EBITDA <1.2x	2.0x ratio (Dec. '22)	1.6x ratio (Dec. '23)	✓ 0.6x ratio (Dec. '24)	\$512M in net debt reductions in 2024	\$90M in net debt reductions year-to-date.	✓ 0.5x ratio (Sept. '25) ¹
	Cash	Minimum \$600M balance	\$226M (Dec. '22)	\$250M (Dec. '23)	\$582M (Dec. '24)			✓ \$611M (Sept. '25) ²
	Joint Venture Partner		Relationship building with potential partners			✓ Initiate JV Process	✓ Secured JV Partner	
	Stream Partner	Renegotiate Wheaton precious metals stream						✓ Revised Stream Agreement
	Project-level Debt	Limited (<\$500M) non-recourse financing	Reduced the targeted project-level debt to \$350M				Secure project level financing mid-2026	

*State level permits referenced Mined Land Reclamation Permit (“MLRP”), Arizona Department of Environmental Quality (ADEQ) Air Quality Permit (“AQP”) and Aquifer Protection Permit (“APP”).
LTM = Last Twelve Months.

1. Adjusted EBITDA is based on trailing twelve months for each period. Net Debt to Adjusted EBITDA calculation based on most recent company public filings available as of November 12, 2025.

2. Cash and cash equivalents and available based on most recent company public filings available as of November 12, 2025.

Copper World Reserves and Resources

RESERVES REPRESENT 30% OF M&I RESOURCES, OFFERING ROBUST EXPANSION AND MINE LIFE EXTENSION POTENTIAL

RESERVE AND RESOURCE BASE

- NI 43-101 compliant Reserve and Resource statement supported by extensive drilling totalling 355,371 meters
 - PFS mine plan and reserve and resource statement independently reviewed and validated by leading mining consultant WSP
- Reserves only account for 30% of M&I Resources
 - 83% of Reserves are classified as Proven

EAST PIT CROSS SECTION (A-A')

Significant resources lie outside of the PFS reserve pits with future opportunity to unlock in Phase II, particularly in the East Pit

Source: 2023 PFS. For further information please refer to Hudbay's news release dated September 8, 2023, announcing the PFS results.

Designed to Reduce Energy Consumption and GHG Emissions

“MADE IN AMERICA” COPPER CATHODE TO SUPPORT DOMESTIC U.S. COPPER CONSUMPTION

↓10%

lower energy consumption, including 30% decline related to downstream processing

↓14%

reduction in total scope 1, 2 & 3 GHG emissions

- Copper World copper cathode expected to be sold to domestic U.S. customers.
- Onsite cathode production reduces the operation's total energy consumption, GHG emissions and sulfur (SO₂) emissions by eliminating overseas shipping, smelting and refining.
- Many local benefits, including over \$850M in U.S. taxes, more than 400 direct jobs and up to 3,000 indirect jobs in Arizona.

Mitsubishi Corporation: Premier Strategic Partner

67

LARGEST JAPANESE TRADING HOUSE & EXPERIENCED JV PARTNER AT WORLD-CLASS COPPER MINES

- Mitsubishi (~\$80B market cap) is a globally integrated trading and investment company that develops and operates businesses across multiple industries.
- As one of the largest Japan's major trading houses, it is the premier strategic partner of choice with current investments in five of the top twenty copper mines globally¹.
 - Targeting equity copper production of over 400kt beyond 2030.
- Wholly-owned U.S. subsidiary, Mitsubishi Corp. (Americas), operates across various business sectors, including mineral resources, oil & gas, real estate, mobility, food, power, etc.
 - Manages the company's strategic investments with approximately \$9 billion in total assets and trading businesses in North America.

LARGEST MINES GLOBALLY BY 2024A COPPER PRODUCTION (kt Cu)¹

Copper Investments

Mitsubishi has minority stakes in some of the largest and highest-quality copper assets globally through partnerships with the largest global diversified miners

		1901	1,157,000	2.3	8.31	0.31	25.4
	Probable	Lalor	574,000	1.6	5.05	0.28	34.4
		1901	274,000	0.8	11.31	0.30	28.3
	Total Proven and Probable – Base Metal		5,636,000	2.4	6.10	0.35	29.9
PROVEN AND PROBABLE – LALOR			11,156,000	3.9	2.26	0.66	29.4
PROVEN AND PROBABLE – 1901			1,584,000	2.1	8.13	0.40	24.8
TOTAL PROVEN & PROBABLE (GOLD AND BASE METAL)			12,740,000	3.7	2.99	0.62	28.8

Note: totals may not add up correctly due to rounding.

1. Mineral resources are exclusive of mineral reserves and do not have demonstrated economic viability.
2. Mineral resources do not include factors for mining recovery or dilution.
3. Lalor mineral reserves and resources are estimated using a NSR cut-off ranging from C\$154 to C\$182 per tonne, assuming a long hole mining method and depending on mill destination.
4. Individual stope gold grades at Lalor and 1901 were capped at 10 grams per tonne. This capping method resulted in an approximate 3% reduction in the overall gold reserve grade.
5. 1901 mineral reserves and resources are estimated using a minimum NSR cut-off of C\$166 per tonne.
6. Base metal mineral resources are estimated based on the assumption that they would be processed at the Stall concentrator while gold mineral resources are estimated based on the assumption that they would be processed at the New Britannia concentrator.
7. Long-term metal prices of \$2,090 per ounce gold, \$1.25 per pound zinc, \$4.30 per pound copper and \$24.30 per ounce silver with an exchange rate of 1.33 C\$/US\$ were used to confirm the economic viability of the mineral reserve estimates and to estimate mineral resources.

TOTAL INFERRED (BASE METALS)		5,730,000	1.3	2.39	1.78	28.3

Note: totals may not add up correctly due to rounding.

*Includes 100% of the Talbot mineral resources previously reported by Rockcliff Metals Corp. in its 2020 NI 43-101 technical report published on SEDAR. Hudbay previously owned a 51% interest in the Talbot project until consolidating a 100% interest with the acquisition of Rockcliff in Sept. 2023

1. Mineral resources are exclusive of mineral reserves and do not have demonstrated economic viability.
2. Mineral resources do not include factors for mining recovery or dilution.
3. Base metal mineral resources are estimated based on the assumption that they would be processed at the Stall concentrator.
4. Watts and Pen II mineral resources were initially estimated using metal price assumptions that vary marginally over the assumptions used to estimate mineral resources at Lalor. In the Qualified Person's opinion, the combined impact of these small variations does not have any impact on the mineral resource estimates.
5. Watts mineral resources are estimated using a minimum NSR cut-off of C\$150 per tonne, assuming processing recoveries of 90% for copper, 80% for zinc, 70% for gold and 70% for silver.
6. Pen II mineral resources are estimated using a minimum NSR cut-off of C\$75 per tonne.

B.C. Mineral Reserves & Resources (AS AT JANUARY 1, 2025)

75

MINERAL RESERVE AND RESOURCE ESTIMATES ^{1,2,3,4,5,6}	TONNES	Cu (%)	Au (g/t)	Ag (g/t)

Leach	Measured resources	159,000,000	0.28	0.20			
	Indicated resources	70,000,000	0.26	0.20			
	Total measured and indicated resources – Leach	229,000,000	0.27	0.20			
	Inferred resources	83,000,000	0.26	0.19			
TOTAL MEASURED AND INDICATED		844,000,000	0.35	0.09	104	0.01	2.9
TOTAL INFERRED		275,000,000	0.32	0.11	82	0.01	2.2

Note: totals may not add up correctly due to rounding.

1. Mineral resource estimates are exclusive of mineral reserves. CIM definitions were followed for the estimation of mineral resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
2. Long term metal prices of \$4.00 per pound copper, \$12.00 per pound molybdenum, \$1,700 per ounce gold and \$23.00 per ounce silver were used to confirm the economic viability of the mineral reserve estimates.
3. Mineral reserve estimates are limited to the portion of the measured and indicated resource estimates scheduled for milling and included in the financial model of the Copper World PFS.
4. Mineral resources are constrained within a computer-generated pit using the Lerchs-Grossman algorithm.
5. Mineral resource estimates were reported using a 0.1% copper cut-off grade and an oxidation ratio lower than 50% for flotation material and a 0.1% soluble copper cut-off grade and an oxidation ratio higher than 50% for leach material.
6. Long-term metals prices of \$3.75 per pound copper, \$12.00 per pound molybdenum, \$1,650 per ounce gold and \$22.00 per ounce silver were used to estimate mineral resources.
7. Estimate of the mineral reserve does not account for marginal amounts of historical small-scale operations in the area that occurred between 1870-1970 and is estimated to have extracted approx. 200,000 tonnes, which is within rounding of the current reserve estimates.

Mason Mineral Resources (AS AT JANUARY 1, 2025)

Including Indicated High-grade (≥ 0.30% Cu)	113,000,000	0.49	291	0.046	2.73	0.60
Inferred Global (≥ 0.14% Cu)	83,000,000	0.24	127	0.024	1.47	0.30
Including Inferred High-grade (≥ 0.30% Cu)	16,000,000	0.45	141	0.038	2.60	0.52

Note: totals may not add up correctly due to rounding.

1. CIM definitions were followed for the estimation of mineral resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
2. Mineral resources are reported within an economic envelope defined by a pit shell optimization algorithm. This pit shell is defined by a revenue factor of 0.33 assuming operating costs adjusted from Hudbay's Constancia open pit operation.
3. Long-term metal prices of \$3.60 per pound copper, \$11.00 per pound molybdenum, \$1,650 per ounce gold and \$22.00 per ounce silver were used for the estimation of mineral resources.
4. Metal recovery estimates assume that this mineralization would be processed at a combination of facilities, including copper and molybdenum flotation.
5. Copper-equivalent ("CuEq") grade is calculated assuming 85% copper recovery, 80% molybdenum recovery, 60% gold recovery and 60% silver recovery.
6. Specific gravity measurements were estimated by industry standard laboratory measurements.

Additional Information

The reserve and resource estimates included in this presentation were prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) and the Canadian Institute of Mining, Metallurgy and Petroleum Standards on Mineral Resources and Reserves: Definitions and Guidelines.

The mineral resource estimates in this presentation are exclusive of mineral reserves. Mineral resources that are not mineral reserves do not have demonstrated economic viability. The totals in the tables may not add up correctly due to rounding.

The technical and scientific information in this presentation related to the Constancia mine, Snow Lake operations and Copper World project has been approved by Olivier Tavchandjian, P. Geo., Senior Vice President, Exploration and Technical Services. The technical and scientific information in this presentation related to the Copper Mountain mine has been approved by Marc-Andre Brulotte, P. Geo., Director, Global Exploration and Resource Evaluation. Messrs. Tavchandjian and Brulotte are qualified persons pursuant to NI 43-101.

Additional details on the company's material mineral projects, including a year-over-year reconciliation of reserves and resources and metal price assumptions, is included in Hudbay's Annual Information Form for the year ended December 31, 2024, which is available on SEDAR+ at <http://www.sedarplus.ca/>.

With respect to the historical estimate of mineral resources at Caballito and the historical drill results for Maria Reyna, a qualified person has not independently verified this historical data or the associated quality assurance and quality control program for Hudbay and, as such, Hudbay cautions that this information should not be relied upon by investors.

With respect to Hudbay's disclosure herein, the Mason preliminary economic assessment is preliminary in nature, includes inferred resources that are considered too speculative to have the economic considerations applied to them that would enable them to be categorized as mineral reserves and there is no certainty the preliminary economic assessments will be realized. Additional details on the Mason preliminary economic assessment (including assumptions underlying the mineral resource estimates) are included in Hudbay's news release dated April 6, 2021.

This presentation has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of United States securities laws. Canadian reporting requirements for disclosure of mineral properties are governed by NI 43-101. For this reason, the information contained in this presentation containing descriptions of the Company's mineral deposits may not be comparable to similar information made public by United States companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.
