Significant is defined as a site with engineering or production facilities. As this is our global report, market or facility level data is not available and we do not intend to report it in future years.
	201-2	<b>Financial implications and other risks and opportunities due to climate change</b>	Varex has undertaken business continuity plans to identify risks and opportunities posed by climate change. Several of our sites have physical risks, including cyclones in Charleston and the Philippines, and earthquakes in California, and we are in the process of developing a strategy to quantify the financial implications. Data is currently unavailable. See also 2018 Annual Report on Form 10-K, p18, 34-36 <a href="http://investors.vareximaging.com/static-files/3828f08e-06bc-4913-8a50-cd48cacfd093">http://investors.vareximaging.com/static-files/3828f08e-06bc-4913-8a50-cd48cacfd093</a>

201-3	<b>Defined benefit plan obligations and other retirement plans</b>	<p>Outside the U.S. we have a defined benefit plan. Depending on the country, a separate fund exists to pay the plan's pension liabilities. There is currently an ongoing plan in process, which will allow us to make more specific estimations.</p> <p>Currently in the U.S., Varex matches the first 6% of employee contributions to their 401k plan. 92% of employees in the U.S. participate in the 401k retirement plan.</p> <p>For further information, please see note 16 in the Form 10-K (<a href="http://investors.vareximaging.com/node/7431/html#sc7b1d223170d4949a04f9e539c736b47">http://investors.vareximaging.com/node/7431/html#sc7b1d223170d4949a04f9e539c736b47</a>)</p>
201-4	<b>Financial assistance received from government</b>	<p>Varex receives \$1.3M in R&amp;D tax credits from the U.S. Department of the Treasury, and \$1.8M in Section 199 – Domestic Production Activities Deduction. Regionally, we also receive \$126K from the Utah Department of Revenue R&amp;D, and \$103K from the California Franchise Tax Board R&amp;D.</p> <p>Data for foreign governments (non-U.S.) is currently not available. We will look to disclose this data next year.</p>

<b>GRI 203: INDIRECT ECONOMIC IMPACTS 2016</b>		
203-1	Infrastructure investments and services supported	In 2018, Varex consolidated two leased spaces in the Chicago, IL, area into one owned space. VMI, an industrial inspection software company, was acquired in Pensacola, Florida. Glass fabrication in Santa Clara, CA, began its shutdown procedures. We have not yet done an assessment for the impacts of these investments and acquisitions. These investments and consolidations were commercial in nature. Data on the impact on communities and the local economy is not currently available.
203-2	Significant indirect economic impacts	As we continue to establish ourselves as a new global company, Varex looks to identify and track the positive and negative impacts. We innovate our products using our sustainability innovation criteria, allowing us to improve access to care. This enables more people to have access to medical diagnostics and security systems. As a newer company, we have not yet calculated the impacts of these efforts and therefore the data is currently unavailable. For other examples of positive impacts, see: A safer, more secure world: Preserving energy infrastructure, p15

	103-3	Evaluation of the management approach	Anti-Corruption Policy and training are evaluated annually under the Direction of the General Counsel. Alterations to the training are made based on this evaluation.
<b>GRI 205: ANTI-CORRUPTION 2016</b>			
	205-1	Operations assessed for risks related to corruption	We have assessed operations at 12 sites for risks related to corruption. We also consider our sales teams to be one operation as they span globally, and have assessed the risks of corruption at our sites as well as for our sales teams. While we have not identified any significant risks related to corruption, typically activities involving sales, distribution, and interaction with government officials carry. We provide in-person and web-based training to our sales teams every year, as well as in person-training to our representatives and distributors every other year. We encourage a culture of integrity, and have an ethical hotline where anyone can report a possible ethical concern.
	205-2	Communication and training about anti-corruption policies and procedures	The company's anti-corruption policies and procedures have been communicated to all seven of seven Board members. In addition, all of the company's employees globally are informed of the company's Code of Conduct, which includes guidance on anti-corruption policies and assigned anti-corruption training. 2,000 employees (99% of total) globally have certified to the Code of Conduct. 100% of incoming employees at all global operations are trained on the Code of Conduct, excluding any contracted workers.  The company requires all distributors and contract representatives to agree to comply with our Code of Conduct and anti-corruption policies. In addition, the company includes in its standard terms and conditions for service providers and suppliers a requirement to become aware of and comply with the company's Code of Conduct and anti-corruption policies, though we do not specifically track or audit this requirement. Non-compliance will subject the business partner to termination. Our Code of Conduct is available on our website, intranet, and upon request.
	205-3	Confirmed incidents of corruption and actions taken	We are not aware of any incidents of corruption in 2018 and there were no public legal cases related to corruption in 2018.

103-3	<b>Evaluation of the management approach</b>	Protecting the environment, p20-21 Resource stewardship, p22-23 Climate change, energy, and air quality, p24-25  The Environmental Health and Safety Policy outlines our expectations on resource stewardship, clearly stating that we will minimize the company's environmental impact by incorporating pollution prevention and resource conservation principles in the design, manufacture, marketing, distribution, packaging, use, service, and disposal of our products.  Our Environmental Health and Safety team is continually evaluating and reviewing our processes and procedures to confirm sound resource utilization and safe operational procedures. This effort is ongoing.

**GRI 301: MATERIALS 2016**

301-1	<b>Materials used by weight or volume</b>	Data is currently unavailable. We do not currently report the weight or volume of materials used, although we will consider doing so in the next several years. We have a large and complicated supply chain that makes measuring mass and volume of materials difficult. Varex's global operations place great emphasis on working with suppliers who follow good manufacturing practice and have an established quality system in place. We are working on developing full disclosure on all materials incorporated in our products. We anticipate this exercise will enable us to report on this in the future.  Non-renewable materials: We use the following to produce and package our products: metals, graphite, plastics, glass, dielectric oil, foam, natural gas, diesel, gasoline, ceramic. Renewable materials: We use the following renewable materials: water, paper, glycol, and rubber, wood.
301-2	<b>Recycled input materials used</b>	Data is currently unavailable. The recycled content of input materials is not currently tracked. Efforts are underway to quantify and track these materials, especially the metals including steel, aluminum, tungsten, and gold.

301-3	Reclaimed products and their packaging materials	<p>6% of X-ray tube packaging is refurbished, including foam, cardboard, and wood crates.</p> <p>X-ray customers are given a credit for housings which are reloaded with new tubes. In 2018, 8,300 end-of-life X-ray tubes were returned and approximately 95% of the material from those tubes was recycled or reused. 1,912 flat panel detectors were returned for repair and/or upgrades to extend useful life or recycled.</p> <p>Waste material is tracked by quantity of refurbished units divided by total units used. Efforts are underway to track the quantity of reclaimed products.</p>

103-3	Evaluation of the management approach	The Facilities and Sustainability teams routinely evaluate energy use and opportunities for efficiency improvements. A full inventory of energy use is conducted and practices are reviewed annually. New climate change and energy goals have been set as a result. Climate change, energy, and air quality, p24-25

**GRI 302: ENERGY 2016**

302-1	Energy consumption within the organization	<p>Total fuel consumption within the organization from non-renewable resources, in joules:  Natural gas: 83,397,024 MJ  Electricity: 174,528,396 MJ  Diesel: 431,665 MJ  Gasoline: 745,516 MJ  Liquefied propane: 131,187 MJ</p> <p>Total fuel consumption within the organization from renewable resources, in joules: 8,749,800 MJ  - Electricity consumption in watt hours: 48,480,110 kWh  - Steam: 1,158 MMBtu</p> <p>Total energy consumption within the organization in joules:  260,455,541 MJ</p> <p>For standards, methodologies, assumptions, and/or calculation tools used and the source of the conversion factors, see our basis for reporting. Numbers were calculated by collecting all sites' utility information and converting to the appropriate unit of measure. Conversion factors were sourced from the website <a href="http://www.convertunits.com">www.convertunits.com</a>.</p>
302-2	Energy consumption outside of the organization	This information is not available as we currently do not track energy use outside our organization.

303-3	Energy intensity	Energy intensity ratio for the organization: 0.36 MJ/\$ sales, calculated on the basis of 2018 sales of \$773.4M. In these calculations, we included electrical power, natural gas, diesel fuel, gasoline, and propane consumption within the organization.
302-4	Reduction of energy consumption	As a result of efficiency initiatives, we have reduced energy (electricity) consumption by 8,657,341 MJ in the reporting year.  These reductions were calculated from verified utility provider incentive reports and the saving were calculated by the electrical utility provider based on individual project details. Calculations were based on the difference between 2018 and 2017 calculations. Numbers were calculated by collecting all sites' utility information and converting to the appropriate unit of measure. Conversion factors were sourced from the website <a href="http://www.convertunits.com">www.convertunits.com</a> .
302-5	Reductions in energy requirements of products and services	There were no known reductions in 2018 in the energy requirements of our products and services.

103-3	Evaluation of the management approach	The Sustainability and Environmental teams monitor water use as well as conducting an annual review against the goals on p8, noting additional areas for improvement. New goals have been developed as a result of the water use baselining undertaken.

### GRI 303: WATER 2016

303-1	Water withdrawal by source	The total volume of water withdrawn in the reporting year was: 229,232 m <sup>3</sup> . 15,597 m <sup>3</sup> were from ground water and 211,053 m <sup>3</sup> were withdrawn from municipal water supplies.
303-2	Water sources significantly affected by withdrawal of water	No water sources were significantly affected by our withdrawal of water. In Salt Lake City, we have a closed-loop water system. Varex has not undertaken any water impact assessment, as foreign water use is negligible.

303-3	Water recycled and reused	Varex uses closed-loop cooling systems in Salt Lake City, Utah, and Santa Clara, California. The amount of water is not tracked as it cycles through the loops.

103-3	Evaluation of the management approach	The Sustainability and Environmental teams monitor emissions as well as conducting an annual review against the goals on p25, noting additional areas for improvement. Several opportunities for improvement have been identified and will be implemented in 2019.

**GRI 305: EMISSIONS 2016**

305-1	Direct (Scope 1) GHG emissions	There were 17,652 metric tons (direct) of CO <sub>2</sub> equivalent emissions in 2018. All CO <sub>2</sub> emissions are non-biogenic. This calculation included all gases – CO <sub>2</sub> , CH <sub>4</sub> , N <sub>2</sub> O, HFCs, PFCs, SF <sub>6</sub> , and NF <sub>3</sub> – and factors provided by the U.S. EPA were used for the calculation.  The consolidation approach for emissions is operational control.  Standards, methodologies, assumptions: the Greenhouse Gas Protocol Corporate Accounting and Reporting Standard was used in conjunction with the EPA Climate Leadership reporting and the EPA GHG Calculator Tool. Estimates of energy use at sites of less than 631 m <sup>2</sup> .
-------	--------------------------------	---

305-2	<b>Energy indirect (Scope 2) GHG emissions</b>	<p>- Gross location-based energy indirect (Scope 2) GHG emissions: 15,518 metric tons of CO<sub>2</sub> equivalent</p> <p>- Gross market-based energy indirect (Scope 2) GHG emissions: 25,730 metric tons of indirect CO<sub>2</sub> equivalent</p> <p>For these calculations, we included all gases (CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFCs, PFCs, SF<sub>6</sub>, NF<sub>3</sub>) and 2017 will be our baseline year as it is our first reporting year.</p> <p>Market-based factors for Salt Lake City, UT, were provided by Rocky Mountain Power. Santa Clara, CA, factors were provided by Silicon Valley Power. All remaining U.S. factors are from U.S. EPA electric grid for location-based, and state specific for market-based emissions. Any action-based factors outside the U.S. were taken from the International Energy Agency 2017 report, and from the Association of Issuing Bodies for European Residual Mixes for market-based factors.</p> <p>We used an operational control consolidation approach for emissions.</p> <p>Standards, methodologies, assumptions, and/or calculations tools used: the Greenhouse Gas Protocol Corporate Accounting and Reporting Standard was used in conjunction with the EPA Climate Leadership reporting tool, and the 2018 EPA GHG calculator. Estimates of energy use at sites of less than 631 m<sup>2</sup>.</p>
305-3	<b>Other indirect (Scope 3) GHG emissions</b>	<p>Please see last year's report for baseline numbers. For 2018, only employee business travel was tracked for Scope 3 emissions, totaling 4,498 CO<sub>2</sub>e. We are continuing to develop methods to better monitor other Scope 3 emissions.</p>
305-4	<b>GHG emissions intensity</b>	<p>GHG emissions intensity ratio for the organization:</p> <ul style="list-style-type: none"> <li>- Location based – 42 grams CO<sub>2</sub>e/\$ sales</li> <li>- Market based – 56 grams CO<sub>2</sub>e/\$ sales</li> </ul> <p>As the denominator, we used the 2018 sales of \$773M.</p> <p>For calculating the intensity ratio, we included Scope 1, 2 (direct and indirect), and 3 GHG emissions. Scope 3 was included based on an estimate from previous year, with an 8% increase. For this calculation, we included all gases: CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFCs, PFCs, SF<sub>6</sub>, and NF<sub>3</sub>.</p>
305-5	<b>Reduction of GHG emissions</b>	<p>We achieved a reduction of 6,556 metric tons of CO<sub>2</sub>e from energy efficiency projects in 2018, compared to 2017 emissions, which is our first reporting year. In these calculations, we have included all gases: CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFCs, PFCs, SF<sub>6</sub>, and NF<sub>3</sub>.</p> <p>Emissions reductions took place in Scope 2, 22 metric tons of CO<sub>2</sub>e savings from electric car charging stations, and Scope 3 by employee commute.</p> <p>Standards, methodologies, assumptions, and/or calculation tools used: the Greenhouse Gas Protocol Corporate Accounting and Reporting Standard was used in conjunction with the EPA Climate Leadership reporting tool. Estimates of energy use at sites of less than 631 m<sup>2</sup>.</p>
305-6	<b>Emissions of ozone-depleting substances (ODS)</b>	<p>Varex Imaging did not produce any emissions of ozone-depleting substances in 2018.</p>

305-7	<b>Nitrogen oxides (NOx), sulfur oxides (SOx), and other significant air emissions</b>	<p>Significant air emissions, in metric tons or multiples, for each of the following:</p> <ul style="list-style-type: none"> <li>- NOx: .45 metric tons</li> <li>- SOx: .08 metric tons</li> <li>- No persistent organic pollutants (POP)</li> <li>- VOCs: .10 metric tons, 4,535.2 MMBtu of VOCs oxidized</li> </ul> <p>None or no significant emissions of hazardous air pollutants (HAP), particulate matter (PM), or other standard categories of air emissions identified in relevant regulations.</p> <p>For these calculations, we used U.S. EPA emission factors and U.S. EPA standards.</p>

**GRI 306: EFFLUENTS AND WASTE 2016**

306-1	<b>Water discharge by quality and destination</b>	<p>Total volume of planned and unplanned water discharges: - 6,427 m<sup>3</sup> of water treated and discharged to the sanitary sewer.</p> <p>The discharged water was treated to meet permit requirements, undergoing neutralization and clarification. None of the water we discharged was reused by another organization.</p>
306-2	<b>Waste by type and disposal method</b>	<p>Total weight of hazardous waste in 2018 was 46.54 tons. We diverted 16.23 tons, and 30.31 tons were incinerated. We did not track how much of this waste was reused. For 2018, we are only reporting on waste for Salt Lake City, as we are still tracking verifiable information for satellite operations.</p> <p>Total weight of non-hazardous waste was 284 tons. We recycled 218 tons. We did not track how much of our waste was reused in 2018.</p>
306-3	<b>Significant spills</b>	<p>We did not have any significant spills globally in 2018.</p>
306-4	<b>Transport of hazardous waste</b>	<p>There was a total of 46.54 tons of hazardous waste transported by recycling/disposal vendors to recycling/disposal site. This is for Salt Lake City operations only as we could not get confirmation on satellite offices. We are in the process of gathering this information for the coming years.</p>

306-5	Water bodies affected by water discharges and/or runoff	All water discharges are to sanitary or municipal storm sewers and there are no significant impacts to water bodies or habitats as a result.

103-3	Evaluation of the management approach	We are adding environmental criteria into our Supplier Quality program to identify where the negative impacts lie in order to address them going forward. We will be reviewing our new Supplier Quality program once a year in order to evaluate its effectiveness going forward. The program will help us to achieve our responsible supply chain goals, p36-37. Our Conflict Mineral Policy was developed and published in 2018. This is still an ongoing process.

**GRI 308: SUPPLIER ENVIRONMENTAL ASSESSMENT 2016**

308-1	New suppliers that were screened using environmental criteria	Our Master Services Agreements and purchase order terms and conditions include environmental criteria including REACH, WEEE, and other relevant criteria. Suppliers will be screened every four years. These policies were established in 2018 and we have not set up any new suppliers this year.
308-2	Negative environmental impacts in the supply chain and actions taken	Our Master Services Agreements and purchase order terms and conditions include environmental criteria including REACH, WEEE, and other relevant criteria. These policies were established in 2018 and we have not set up any new suppliers this year. We have not identified any suppliers with potential negative environmental impacts.

103-2	<b>The management approach and its components</b>	<p>Empowering people and communities, p26-27          Being an employer of choice, p28-29          Ethical business, p34-35          Governance, p33          Hotline reporting  <a href="https://www.vareximaging.com/company/mission-vision">https://www.vareximaging.com/company/mission-vision</a>          Code of Conduct  <a href="https://www.vareximaging.com/file/5286/download?token=PQBTWWBe">https://www.vareximaging.com/file/5286/download?token=PQBTWWBe</a></p> <p>Our Employee Health and Safety Policy states: "It is Varex's policy to provide employees with a safe and healthy work environment and to prevent injuries by implementing effective accident prevention programs."</p>
103-3	<b>Evaluation of the management approach</b>	<p>Health and safety is a joint responsibility shared by management and employees. The Environmental Health and Safety Executive Council conducts an annual review of the performance and management of the organization. Local representatives at each site assess and evaluate the performance at each site.</p>

**GRI 403: OCCUPATIONAL HEALTH AND SAFETY 2016**

403-1	<b>Workers representation in formal joint management-worker health and safety committees</b>	<p>Formal joint management worker health and safety committees typically operate at the site level. 16% of Varex workers are represented by formal joint management-worker health and safety committees.</p>
403-2	<b>Types of injury and rates of injury, occupational diseases, lost days, and absenteeism, and number of work-related fatalities</b>	<p>Types of injury, injury rate (IR), occupational disease rate (ODR), lost day rate (LDR), absentee rate (AR), and work-related fatalities for all employees:          - By region: U.S.: 1.19 OSHA rate, 0.30 Dart rate; Europe had no reported injuries. Safety data was not collected outside the U.S.          - By gender: U.S.: 32% female, 68% male. Gender data was not tracked in other regions in 2018.</p> <p>Injuries include accidents, slips and falls, repetitive motion, lifting, and cuts. In recording and reporting accident statistics, we followed country-specific rules at each location.</p>
403-3	<b>Workers with high incidence or high risk of diseases related to their occupation</b>	<p>Muscular skeletal risks are the key occupational related health risk identified at Varex. Due to this reason, we train and perform ergonomic risk assessments, and provide employees with the resources to minimize this risk. Workers are monitored for noise, lead, and radiation exposure, with no incidents in 2018.</p>
403-4	<b>Health and safety topics covered in formal agreements with trade unions</b>	<p>Health and safety agreements with Works Councils cover employees in Germany and the Netherlands. We do not disclose which health and safety topics are covered by these agreements.</p>

103-3	Evaluation of the management approach	When an employee is hired, promoted, or transferred, the manager or supervisor assigns necessary training based on the employee's education, background, experience, and assigned responsibilities. The employee is responsible for completing any assigned training on time and must provide his or her manager with documentation of any required training that is not tracked in the learning management system.
-------	---------------------------------------	---

**GRI 404: TRAINING AND EDUCATION 2016**

404-1	Average hours of training per year per employee	Our current training system does not have an accurate way to calculate and verify an average for training hours. We can, however, confirm our employees completed 19,350 training courses in 2018.
404-2	Programs for upgrading employee skills and transition assistance programs	In the U.S., we provide a tuition reimbursement program for U.S. employee college courses.  We do not have a program for employee termination or retirement training; however, we will look into developing this as needed.
404-3	Percentage of employees receiving regular performance and career development reviews	Being an employer of choice, p28-29 All employees (100%) received a regular annual performance review.

**Diversity and equal opportunity**
