***Donaldson system to go on all U.S. medium-duty engines from 2007 – 2009***

MINNEAPOLIS, MN (May 15, 2006) – Donaldson Company, Inc. (NYSE:DCI), a leading manufacturer of filtration systems, replacement parts and emission control systems, announced that it has been awarded all of the exhaust and emission aftertreatment device packaging for DaimlerChrysler's MBE 900 medium-duty engines in the U.S. market for 2007 through 2009.

"We are pleased that DaimlerChrysler has selected Donaldson as its exclusive medium-duty exhaust and emissions aftertreatment device supplier," said Tom Scalf, General Manager, Emissions Group at Donaldson. "This award further demonstrates that Donaldson's innovation, technology and development capabilities continue to be recognized by our OEM partners. This is the largest medium-duty business order awarded by an OEM to an emissions control systems provider for the U.S. market for 2007."

The company said that the aftertreatment device included packaging for Detroit Diesel and Mercedes Benz MBE900 engines designed for medium-duty vehicle brands. With this award, Donaldson will supply diesel oxidation catalysts (DOC) and diesel particulate filter (DPF) packaging that will be a part of the system used to meet U.S. EPA requirements.

For more information about Donaldson and Donaldson brand exhaust and emission aftertreatment, visit the company website at [www.donaldson.com/emissions](http://www.donaldson.com/emissions) or contact the company at (866) 484-8329.
