Silver, as a “green metal”, contributes to a sustainable future by producing key materials for renewable energy, electric vehicles, and anti-bacterial uses. From below ground to above ground, the silver and gold we mine transforms from raw materials into everyday consumer products as well as precious metals investments.

**Our Value Chain**

**INPUTS**
- People
- Capital
- Equipment
- Water
- Energy
- Services

**PROCESS**
- Exploration & Discovery
- Feasibility & Permitting
- Mining Operations
- Ore Processing
- Reclamation & Closure
- Lasting Positive Legacy

**APPLICATIONS**
- Solar Panels
- Health Care
- Water Purifier
- Electric Vehicles
- Electronics
- Batteries
- Bars & Coins
- ETF’s
- Jewelry
- Silverware
- Semi-conductors
- Hydrogen Fuel Cells

**BENEFITS DISTRIBUTED**
- Direct & Indirect Jobs
- Social & Community Investments
- Taxes & Duties
- Suppliers & Contractors
- Shareholder Returns
