^{**} Public cloud ARR is defined as the annual value at a point in time of all contracts related to public cloud implementations of Teradata Vantage and does not include ARR related to private or managed cloud implementations. The Company believes this is a useful metric to investors as it demonstrates progress toward achieving our strategic objectives as outlined in the Form 10-K and Form 10-Q.

^{2.} Teradata reports its results in accordance with GAAP. However, as described below, the Company believes that certain non-GAAP measures such as free cash flow, non-GAAP gross profit, non-GAAP operating income, non-GAAP net income, and non-GAAP earnings per diluted share, or EPS, all of which exclude certain items, and which may be reported on a constant

currency basis, are useful for investors. Our non-GAAP measures are not meant to be considered in isolation to, as substitutes for, or superior to, results determined in accordance with GAAP, and should be read only in conjunction with our condensed consolidated financial statements prepared in accordance with GAAP. Each of our non-GAAP measures do not have a uniform definition under GAAP and therefore, Teradata's definition may differ from other companies' definitions of these measures.

The following tables reconcile Teradata's actual and projected results and EPS under GAAP to the Company's actual and projected non-GAAP results and EPS for the periods presented, which exclude certain specified items. Our management internally uses supplemental non-GAAP financial measures, such as gross profit, operating income, net income, and EPS, excluding certain items, to understand, manage and evaluate our business and support operating decisions on a regular basis. The Company believes such non-GAAP financial measures (1) provide useful information to investors regarding the underlying business trends and performance of the Company's ongoing operations, (2) are useful for period-over-period comparisons of such operations and results, that may be more easily compared to peer companies and allow investors a view of the Company's operating results excluding stock-based compensation expense and special items, (3) provide useful information to management and investors regarding present and future business trends, and (4) provide consistency and comparability with past reports and projections of future results.

- i. Represents the income tax effect of the pre-tax adjustments to reconcile GAAP to Non-GAAP income based on the applicable jurisdictional statutory tax rate of the underlying item. Including the income tax effect assists investors in understanding the tax provision associated with those adjustments and the effective tax rate related to the underlying business and performance of the Company's ongoing operations. Of this amount, the adjustment for the tax impact of ceasing our operations in Russia created a favorable EPS impact of 0.03 and 0.05 cents, respectively, for the three and six months ended June 30, 2022. As a result of these adjustments, the Company's non-GAAP effective tax rate for the three months ended June 30, 2022 was 14.6% and June 30, 2021 was 21.7%. For the six months ended the non-GAAP effective tax rate was 25.9% for 2022 and 24.1% for 2021.
- 3. As described below, the Company believes that free cash flow is a useful non-GAAP measure for investors. Free cash flow does not have a uniform definition under generally accepted accounting principles in the United States (GAAP) and therefore, Teradata's definition may differ from other companies' definitions of this measure. Teradata's management uses free cash flow to assess the financial performance of the company and believes it is useful for investors because it relates the operating cash flow of the company to the capital that is spent to continue and improve business operations. In particular, free cash flow indicates the amount of cash generated after capital expenditures which can be used for among other things, investments in the company's existing businesses, strategic acquisitions, strengthening the company's balance sheet, repurchase of company stock and repay the company's debt obligations. Free cash flow does not represent the residual cash flow available for discretionary expenditures since there may be other non-discretionary expenditures that are not deducted from the measure. This non-GAAP measure should not be considered as a substitute for, or superior to, cash flows from operating activities under GAAP.
