Our Role in the World

MetLife Foundation

Since 1976, MetLife Foundation has provided more than $822 million in grants and $85 million in program-related investments to make a positive difference for the individuals, families and communities we serve. Through all of our work—grant making, volunteer engagement and impact investing—our goal is to build healthier and more resilient communities worldwide.

In 2018, MetLife Foundation realized its five-year goal to provide $200 million in grants to advance financial inclusion worldwide. Going forward, the Foundation will broaden its focus to financial health, providing solutions to help lower-income people effectively manage household budgets, recover from the unexpected and plan for the future.

Committed to the Environment

Our sustainability journey has taught us that bold environmental goals drive innovation, ambition and effective solutions. In 2018, we maintained our carbon neutral status by continuing to improve operational efficiency and finance carbon offset projects around the world. We are on target to exceed our 2020 energy and climate goals by implementing energy efficiency projects and investing in green building design, sustainable behavior campaigns and real estate consolidation.

MetLife’s Global Sustainability Team, within Global Technology & Operations, oversees environmental management, energy efficiency and performance, including engaging employees and suppliers. Risk Management monitors potential disruptions to our operations and supply chain from climate change, such as natural disasters and health crises, while our business continuity, facilities and crisis management teams prepare for such eventualities.

Paid approximately $48 billion to policyholders in 2018

$588.7 billion\textsuperscript{12} in combined managed assets that help finance job creation, business growth and community development around the world

$16.6 billion in green investments\textsuperscript{13}

Explanatory Note on Non-GAAP Financial Information

Total Assets Under Management ("Total AUM") is a financial measure based on methodologies other than accounting principles generally accepted in the United States of America ("GAAP"). Total AUM are comprised of GA AUM, plus Indexed SA AUM plus TP AUM (each as defined below). MetLife believes the use of Total AUM enhances the understanding of the depth and breadth of its investment management services on behalf of its general account investment portfolio, separate account index investment portfolios and unaffiliated/third party clients.

General Account Assets Under Management ("GA AUM") is a financial measure based on methodologies other than GAAP. MetLife utilizes GA AUM to describe assets in its general account investment portfolio which are actively managed and stated at estimated fair value. MetLife believes the use of GA AUM enhances the understanding and comparability of its general account investment portfolio. GA AUM are comprised of general account Total Investments and cash and cash equivalents, excluding policy loans, other invested assets, contractholder-directed equity securities and fair value option securities, as substantially all of these assets are actively managed in MetLife’s general account investment portfolio. Mortgage loans and certain real estate investments included in GA AUM have been adjusted from carrying value to estimated fair value. Classification of GA AUM by sector is based on the nature and characteristics of the underlying investments which can vary from how they are classified under GAAP.

Passive-Indexed Separate Account Assets Under Management ("Indexed SA AUM") are passive-indexed insurance company separate account investment portfolios, which are stated at estimated fair value, managed by MetLife that track the return of industry market indices. Indexed SA AUM represent separate account assets of MetLife insurance companies which are included in MetLife, Inc.’s consolidated financial statements at estimated fair value.

Third Party Assets Under Management ("TP AUM") are non-proprietary assets managed by MetLife on behalf of unaffiliated/third party clients, which are stated at estimated fair value. TP AUM are owned by such unaffiliated/third party clients; accordingly, TP AUM are not included in MetLife, Inc.’s consolidated financial statements.

MIM’s investment strategy incorporates relevant environmental, social and governance ("ESG") considerations in the decision making process to support sustainable long-term returns. Responsible Investments are the portion of Total Assets Under Management that include the following four categories: Impact and Affordable Housing Investments, Green Investments, Infrastructure Investments and Municipal Bonds (i.e., Municipal). All Other Investments are the portion of Total Assets Under Management that exclude Responsible Investments.
