

## FASIENAL

WHERE INDUSTRY MEETS INNOVATION ${ }_{w}$

## SAFE HARBOR STATEMENT

All statements made herein that are not historical facts (e.g., future operating results, long-term share gains, and business activity, as well as expectations regarding operations, including gross margin, future inventory levels, pricing, Onsite and weighted FMI device signings, the size of our U.S./Canada network of traditional branches, operating costs, capital expenditures, sales through our digital footprint, and supply chain matters) are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements involve known and unknown risks, uncertainties, and other factors that may cause actual results to differ materially. More information regarding such risks can be found in our most recent annual and quarterly reports filed with the Securities and Exchange Commission. Any numerical or other representations in this presentation do not represent guidance by management and should not be construed as such. The appendix to the following presentation includes non-GAAP financial measures. Information required by Regulation G with respect to such non-GAAP financial measures can be found in the appendix including a comparison and reconciliation to the comparable GAAP measures.

## CEO MESSAGES ON 4Q23

Daily Sales Rate (DSR) Growth

EPS
(Fully Diluted)

- 2023 saw two struggles. First, a sustained sub-50 PMI reflected soft business activity, including in 4Q23. Second, poorer execution than we expect of ourselves, manifested in leadership changes made during the year.
- 4Q23 daily sales were only $+3.7 \%$, though our EPS of $\$ 0.46$ increased $8.4 \%$. For full year 2023, net sales and daily sales were $+5.2 \%$ and $+5.7 \%$, respectively, which translated into EPS of \$2.02, an increase of 6.7\%
- The performance of our growth initiatives was uneven in 4Q23 and the year. Still, 2023 had further development of our key account model, growth in our installed base of Onsite locations and FMI devices, and an increase in our Digital Footprint. These efforts allowed us to defend our operating margin despite slow business activity and a less favorable pricing environment.
- Operating cash flow was a record \$1.43B in 2023, increasing $52.3 \%$ from 2022. We converted $124.0 \%$ of net earnings into operating cash, up from $86.6 \%$ in 2022.
- We paid a fifth dividend of $\$ 0.38$ per share in December 2023, the fourth such supplemental payout since going public in 1987. Total dividends paid to shareholders in 2023 were \$1.02B, or $80.0 \%$ of our free cash flow (operating cash less net capital spending and cash paid for acquisitions). We retain a high degree of confidence in the future cash generating capabilities of our business.

## 4Q23 GROWTH DRIVER UPDATE

Weighted FMI Device Signings and Installations (MEUs) ${ }^{(1)}$

- Onsites: We had 58 signings in 4Q23. Active sites finished at $1,822,+12.3 \%$ from 4Q22. Daily sales, excluding transferred branch sales, grew at a mid single-digit rate from 4Q22. Units operating since 2021 or earlier were down at a low single-digit rate, though on a per-unit basis to account for closures they grew at a mid single-digit rate.

We signed 326 Onsites in 2023. Our signings goal in 2024 is 375 to 400 locations.

- FMI Technology: We signed 5,462 weighted devices (88/ day) in 4Q23, versus 4,730 (76/day) in 4Q22. Our installed base was 113,138 weighted devices, $+10.8 \%$ from 4Q22. Activity through our FMI technology platform represented $41.5 \%$ of sales in 4Q23, versus $38.7 \%$ of sales in 4Q22 and $35.1 \%$ of sales in 4Q21.

We signed 24,126 MEU of FASTBin and FASTVend units in 2023. Our signings goal in 2024 is 26,000 to 28,000 MEU.

- eCommerce: Daily sales rose $28.3 \%$ in 4Q23. Large customer-oriented electronic data interface (EDI) was up $22.7 \%$, while web sales were up $45.5 \%$.
- Sales through our Digital Footprint (FMI technology plus non-FMI-related eCommerce) was $58.1 \%$ of sales in 4Q23, versus $52.6 \%$ in 4Q22. We anticipate sales running through our Digital Footprint will reach $66 \%$ at some point in 2024. Our long-term expectation of $85 \%$ is unchanged.
${ }^{(1)}$ Machine equivalent units (MEUs)

## GETTING CLOSER TO THE CUSTOMER

- Total in-market ${ }^{(1)}$ locations were 3,419 at the end of 4Q23, up $3.4 \%$ from 3,306 at 4Q22. Our total in-market location count continues to grow due to a rising installed base of Onsites. In 2015, Onsites constituted $9.1 \%$ of our inmarket locations; in 2023, they were $53.3 \%$.
- Our Onsite business began with a customer request $20+$ years ago. Over time, this morphed into our Onsite business model. This prompted us to revisit our branch network density, which we began to reduce in 2013.
- Over the last several years we have stated our U.S./Canada network would likely trend toward 1,450 traditional branches. We ended 2023 with 1,441 branches in the U.S./Canada markets and believe our branch count will remain between 1,400 and 1,500 .

|  | YOY Change |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 |
| U.S. \& Canada Branches | 0.9\% | (2.3\%) | (0.7\%) | (5.1\%) | (5.0\%) | (7.1\%) | (5.7\%) | (6.1\%) | (11.7\%) | (7.2\%) | (6.3\%) |
| All Other Branches \& Onsites | 19.1\% | 276.5\% | 17.4\% | 40.8\% | 40.7\% | 41.5\% | 22.7\% | 13.1\% | 11.5\% | 13.9\% | 11.9\% |
| Combined | 1.3\% | 6.1\% | 1.2\% | 0.6\% | 2.9\% | 4.5\% | 3.4\% | 1.2\% | (1.8\%) | 3.0\% | 3.4\% |

- At our peak United States branch count in 2013, we believe we had 30-minute access to $95.0 \%$ of the U.S. manufacturing base. Based on prior analysis of a target branch count of 1,450 , we believe we still have 30 -minute access to roughly $93.5 \%$ of the U.S. manufacturing base.
${ }^{(1)}$ In-market locations include traditional branches, international branches, and Onsites

## 4Q23 BUSINESS CADENCE

Product Category Daily Sales Rate (DSR) Growth

U.S. Industrial Production declined 0.1\% in Oct./Nov. 2023 over 4Q22, though heavier manufacturing components such as fabricated metal and machinery remained weaker than the broader index. U.S. PMI averaged 46.9 in 4Q23, making it 14 straight months of falling manufacturing activity.

- Daily sales grew $3.7 \%$ in 4Q23. December daily sales grew $5.3 \%$, beating normal sequential seasonality. Warehousing, a component of other end markets, had strong holiday-related sell-through, favorable product mix, and easier comparisons. Excluding warehousing, November and December daily sales beat the seasonal benchmark more narrowly. Regional feedback reflects soft but stable activity in non-Warehousing markets.
- Fastener daily sales fell reflecting the cyclical nature of the product and the steeper slide in price contribution. Other Products slowed on cyclical factors; less-cyclical janitorial was the strongest component. Safety was strong reflecting good FASTVend signings and strength from warehousing customers.
- Pricing remains stable with contribution to growth from price in 4Q23 within normal historical ranges.
- National Accounts' daily sales rose $8.5 \%$ in 4Q23, with 59 of our Top 100 customers growing. Non-National Account daily sales fell $3.2 \%$ in 4Q23, with $53.4 \%$ of our in-market locations growing.

## 4Q23 MARGIN SUMMARY

Gross Profit Margin

Operating Income Margin

- 4Q23 gross margin was $45.5 \%$, up from $45.3 \%$ in 4Q22. Better product margin and slightly favorable price-cost more than offset the negative effect of customer and product mix.
- Price-cost dynamics were comparable to the third quarter of 2023. We continue to experience a stable pricing environment and slightly lower costs related to shipping. The benefit largely recaptures the price-cost deficit we experienced in the comparable prior-year period. Our goal remains to be price-cost neutral, and our expectation is that we will trend back to that over the next several quarters.
- Our 4Q23 operating margin was 20.1\%, up from 19.6\% in 4Q22. Operating expenses were $25.3 \%$ of net sales, from $25.7 \%$ in 4Q22 despite the low daily sales growth.
- We achieved modest leverage of occupancy costs reflecting our reduced branch base and lower vending expenses related to the roll-off of machine depreciation. We achieved healthy leverage of our other operating and administrative expenses resulting from easier comparisons, tighter cost discipline, greater contribution from supplier collaboration programs, and higher income from asset sales.

## 4Q23 CASH FLOW PROFILE

## Net Capital Expenditures

(in millions)

- 4Q23 operating cash flow was $\$ 354.0$, or $132.9 \%$ of net earnings. For the full year of 2023, operating cash flow was $\$ 1,432.7$, or $124.0 \%$ of net earnings. The absence of last year's supply chain constraints, slower business activity, and internal process improvements resulted in working capital being a significant source of cash in 2023.
- The strong cash flow, and our confidence in the sustained cash generating capability of our model, allowed us to pay out a supplemental dividend in December 2023. As a result, we returned $\$ 417.3$ of capital to shareholders through dividends in 4Q23 and \$1,016.8 in 2023.
- We remain conservatively capitalized, with balance sheet debt at $7.2 \%$ of total capital in 4Q23, versus $14.9 \%$ in 4Q22.
- Accounts receivable rose $7.3 \%$ from 4 Q 22 as a result of sales growth, a shift in our sales mix toward larger customers, and slower year-end payments. Inventory fell $10.8 \%$ from 4Q22, reflecting shorter order cycles for imported products, softer business activity, modest product deflation, and internal process improvements.
- Net capital spending was $\$ 160.6$ in 2023 , versus $\$ 162.4$ in 2022. This was below our targeted range due to the timing of certain outlays and the impact of slow business activity on spending. Our 2024 net capital spending range is $\$ 225.0$ to $\$ 245.0$ on investments in hub capacity and facility picking capabilities, FMI purchases, and IT spending.

## APPENDIX

## Non-GAAP Financial Measures

The appendix includes information on our Return on Invested Capital ('ROIC'), which is a nonGAAP financial measure. We define ROIC as net operating profit less income tax expense divided by average invested capital over the trailing 12 months. We believe ROIC is a useful financial measure for evaluating the efficiency and effectiveness of our use of capital and believe ROIC is an important driver of shareholder return over the long-term. Our method of determining ROIC may differ from the methods of other companies, and therefore may not be comparable to those used by other companies. Management does not use ROIC for any purpose other than the reasons stated above.

The tables that follow on page 10 include a reconciliation of the calculation of our return on total assets ('ROA') (which is the most closely comparable GAAP financial measure) to the calculation of our ROIC for the periods presented.

* The January average is based on the historical change in January vs. the prior year's October. All other months are sequential.
** The benchmark for each month is the average of the previous five years for that month. As COVID-19-related surge sales made sequential averages in 2020 unrepresentative, the benchmark uses a preceding five-year average that excludes 2020. We also exclude the impact of the 2017 Mansco acquisition in the 2023 benchmark.

## Notes:

- Good Friday was in April of 2020, 2021, 2022, 2023, and will be in March of 2024.
- Amounts may not foot due to rounding differences.
